
What People Are Saying

about our Special Benefits Program's

Liquid Dietary Supplement

Following are some true reports of people's personal experience with the all-natural liquid dietary supplement supplied through our Special Benefits Program. These reports are unsolicited and unpaid. **These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.**

“My finger joints don't hurt anymore...”

—Submitted by Julie A. Pinn

I have been taking this Noni supplement every morning and night for several months. It is totally remarkable that my finger joints don't hurt anymore. I have better circulation in my body, and one toe on my left foot isn't numb any more. My back and neck pain have greatly diminished. My emotions don't seem to bother me as much, i.e. I am less stressed and have no feelings of being nervous or bad worrying. This has truly been a blessing to me.

The floaters in my eyes are greatly diminished, and my eyes are less sensitive to the sun. I

have better concentration, and when I do misplace something I find it right away as I can think/remember where I put it.

When I'm in conversation I don't forget what I am saying in the middle of a sentence, and am able to continue with ease where I left off.

I get sinus colds and bronchial related problems regularly. Noni has greatly helped me in this area. Around the middle of last month I was very sick (as were many people in Illinois) with this Illinois bug. I had run out of my Noni that same week, and I noticed

everything was beginning to regress. When my new bottle arrived I recovered quickly from a bad virus that has put many people in the hospital or kept them at home for weeks.

This wonderful supplement has given me more energy and very good sound sleep. I wake up bright-eyed and bushy-tailed with energy to go all day.

It is helping me to lose weight and keep it off as it seems to curb my appetite. I am eating good food, too, and walking every day. I haven't felt this good in years.

“Now David is happy, smiles a lot, and his eyes sparkle...”

—Submitted by David and Kathy Deuney

My name is Kathy. My grandson David was diagnosed as having ADHD (attention deficit hyperactivity disorder) and was having trouble controlling his anger. The school he was going to couldn't deal with children like our David.

The atmosphere at school induced anger in David, which you could see in his eyes (like daggers). He stayed in that school for two years like that then he said to my daughter: "This is enough, I won't go to school if I have to go there!" So together with the

counselor, we decided to send him to a school called 'Sojourner'.

Even with meds, David had to meet many challenges. He was taking 8 meds a day. He started with Ritalin but that just made him wilder. The teachers called to say his behavior was worse than

before. And then they gave him Dextrosat (a form of Dexadrine). We took him to a therapist to find out what was bothering him and getting him into trouble with the police. His grades dropped to nearly failing (C's, D's and F's).

My daughter decided to try this Noni supplement, and David agreed. Right away we saw a change in him. We started to see if anyone else could see the difference. The school had an open house in October.

One of his teachers asked: "Who are you sending to school in David's clothes?" Let me say that we were pretty excited. Then something happened. We ran out of the Noni. It took up to two weeks for our next shipment.

David's teacher called one day and said to come and get David from school. He had gotten upset over something and had knocked a chair over. The teacher said he didn't want him to ruin his good record.

The next day, we received our shipment and soon after we were getting good reports again. His grades went up to A's and B's. In fact, he got the highest grade in one class. He also is beginning to be mainstreamed into the middle school, one class this quarter, two classes next quarter. After being removed from religion class two years ago, he is now being confirmed with his class.

The other day, my daughter had a chance to talk to David's

hockey coach. He plays on the New Prague Pee Wee "A" team. The coach was saying how much of a change he sees in David from last season to this. He was also saying that some of the parents were telling him about the great difference they saw in David. And my daughter said: "Yea, he hasn't been in the penalty box as much."

David is now down to 3-4 pills a day. Our doctor suggested we change David's meds this summer to one pill a day.

This story started at 9-10 years old and David is now 13 1/2 years old.

P.S. Now David is happy with himself, smiles a lot, and his eyes sparkle.

"No words on planet earth would ever allow me to express the gratitude for what you have gifted to me..."

—Submitted by Tim Corbett

There are no words on planet earth that would ever allow me to express the gratitude for what this program has gifted to me. My body and spirit were depleted of life-energy and I was "down for the long count" with the most extreme case of bipolar illness.

I had no life as I was drugged to the maximum and lived in the world of despair. I lived in emotional darkness and lost everything, and slowly I was pulling out of life.

My self-esteem was shattered and my dark thoughts frightened me. I have attempted every conceivable and possible way to find a path for just some relief and everything led me to more disappointment and rivers of tears.

I am unable to tell you of the agony of this illness as it has torn the very soul out of my life ... all my life! I send this report to you because the picture shows the complexity of a man trying to piece himself together and that's what I have been trying to do, however... I have been desperately trying in the dark.

The miracle by which this Noni supplement came my way is the most phenomenal of all coincidences and yet: I have always believed that we all come into one another's life for a reason.

This special product has lived up to its deepest meaning for me as only a gift from God could have intervened to restore my health and outlook on life.

I no longer live behind closed doors and I am shame-free with a life of hope and new dreams. I am truly thrilled at this moment to share my story with the world because, I absolutely know there are many, many others who are imprisoned with the darkness of depression. Perhaps this Noni miracle can give them the relief and the chance of a lifetime that it gave to me.

I am compelled to share my story with the world and I now understand the meaning and the message of the words "God works in wondrous and mysterious ways."

This is truly a path with a heart. Thanks for this special program and product in my life.

“Doctors said that he would not live more than a year...”

—Submitted by Mrs. Lee Pitchford

My husband is now 87 years old. Twenty seven years ago he suffered a massive heart attack at which time the Doctors said he would not live for more than a year at best. With good home care, proper diet supplements and lots of good Food Supplements we have kept him with us all these years. However, his heart has never been strong and with age he developed Congestive Heart Failure and has been under constant care of his Doctor and in and out of the Hospital.

Recently he developed what many Heart patients and Diabetic patients develop – very poor circulation in his feet and legs and beginning in his hands. His feet were badly swollen and almost purple in color. Then he started to

develop bad sores on his feet and legs.

We have had him to five different Doctors – two of them Specialists. All of them said it was very serious and this sort of thing could lead down the line to amputations. All they recommended was bed rest and when he was up sitting in a chair to be sure to elevate his feet. They all took the same attitude – Old Age, Congestive Heart Failure and Poor Circulation, and there wasn't much they could do for him.

In desperation we decided to put him on this special Noni liquid with doses of ½ ounce every few hours throughout the day and also during the night if he was up and awake. We kept him on this dosage for two weeks and also

soaked cotton in liquid and taped it on all of the sores – changing these every evening.

Within two weeks all of the swelling and discoloration was gone and his feet and legs looked normal, also all of the sores were completely healed. We now have him down to an ounce or two a day and he feels and looks simply wonderful – is busy and active again and driving the car, shopping and living quite a normal life.

We are so happy and relieved to think we have found an answer to his many problems. He no longer has arrhythmia or water retention and his heart seems to be better than it has for many, many years.

“After being on this for thirteen days the pain has completely disappeared...”

—Submitted by Russ Hopkins

I started taking Noni for Patella Tendonitis. This pain was in my left leg and every morning I would get out of bed, put pressure on my leg and pain would shoot down my leg from my knee to the bottom of my heel. After being on the supplement for 13 days (taking 2 tbsp. 3 times a day) the pain has completely disappeared.

The best story is about my 6 year old grandson, Grayson.

At age 3 he was diagnosed with ADHD (Attention Deficit w/ Hyperactivity). Ritalin was prescribed beginning with small dosages and increasing several times a year.

In January, after seeing his doctor, he was increased on the Ritalin to 10 mg. three times a

day. This is when the family put their foot down and decided to start him on the Noni.

We increased the dose and decreased the Ritalin little by little, and he is doing just fine! We plan to have him completely off the Ritalin by early Spring. He is a normal 6 year old boy (without the Ritalin side effects).

We are so thankful.

“The constant sneezing, itchy, watery eyes, head congestion, irritability, and fatigue felt like an evil curse...”

— Submitted by Elizabeth Bourque

I have always suffered from pet, pollen, and ragweed allergies.

At times, the constant sneezing, itchy, watery eyes, head

congestion, irritability, and fatigue felt like an evil curse that would

never end. I also needed an inhaler for mild asthma that would wake me up in the middle of the night. I had problems with itchy skin and eczema as well. A few years ago, I got a cat as a companion knowing full well of the irritating consequences. Prescription meds didn't work and caused drowsiness. Benadryl gave some relief, but I didn't like the side effects even at low doses...

...And then I met my Prince. I met my fiancé he gave me a green bottle of magic when we started getting to know each other. I wasn't drinking enough at first to

make a difference in my health, but when I did some research on Noni, I started over with the "loading dose" and noticed changes in just a few weeks. I started falling asleep easier and slept more deeply through the night than I had in a long time. I started to dream again. I wasn't getting tired in the afternoon anymore, and my eczema seemed to be less bothersome after a month or two.

....Now here's the kicker!!! I still have my beloved cat, and we now have 3 dogs as well! After about 3 months of consistently drinking Noni, I noticed that I wasn't having

sneezing fits as frequently. I could breathe easier, and I've only used my inhaler 1 or 2 times in the past 8 months. The pine trees outside are releasing big puffs of yellow pollen and all of the trees are flowering around here...and I am happy and healthy and very, very grateful for Noni, a gift from God. This product has made a tremendous difference in my health. I still notice positive changes in my health as time goes on. Neither of us got sick this winter when everyone else around us had colds, flu, and just felt the winter blahs. Yay to this special program and its benefits!

“With God's blessing, anything is possible...”

—Submitted by Ned Castrence

I have been taking Noni since June 2004. Prior to using it, I was suffering from Allergy (ragweed, dust, pollen, mold and cats). When my allergy goes, my asthma acts up. In July 2014, I went to visit a relative in Florida and I noticed that my symptoms did not come when I was exposed to their cat. Three months before I was using Noni, I was rushed into the

hospital because my allergy got so bad that I had an Asthma attack. That was impressive. My son, who suffers from migraine headaches when the barometric pressure is high did not complain about it even if it rained 4 days out of the 8 we spent in Florida back in July. I developed mild ulcer because of stress. I could not eat spicy food for it would send me to the

medicine cabinet and drink a bottle of Pepto to relieve the burn. I am happy to say that since drinking this Noni product, we have been eating hot curry 4 times a week and I have not had any heartburn or discomfort.

It is amazing what this miracle can do. With God's blessing, anything is possible.

“My allergies were gone in less than 4 days...”

— Submitted by Raymond Pasley

I presently work for a lawn care company and low and behold, I've found that I have a real bad allergy to grass and tree pollen.

Well after a few years of taking over-the-counter medicine for the relief I was fed up with the way

they made me feel, i.e.: dizzy, headache, I just felt awful.

Well my wife heard of this special benefit plan from a co-worker of hers and I read up on it from the Internet website she gave me. Also after a little bit of

convincing on her behalf she convinced me to try it.

Well to my surprise my allergies were gone in less than 4 days of taking the Noni drink offered through the program, and I feel so much better.

“Since I starting on this two months ago I have not used my asthma puffer...”

—Submitted by *Barbara Adelaide*

Hi all my name is Barbara. I am type 2 Diabetic, also asthmatic.

Since I starting on the special Noni supplement two months ago I have not used my asthma puffer, or my machine and my Diabetes has gone down.

I have gone from 7 tablets a day to 4 also I have more energy. And I am not taking as many pain killers for arthritis in fact only 2 tablets a day, some days none.

I have put my husband on it too, also my 3 married sons , my Mother, and my Brother.

I could have started on this supplement 1 year ago but I was wary – if only I had started then. I will never be out of this wonderful product again.

“Within three months of taking Noni, my back pain was gone...”

—Submitted by *Marye Peterson*

I found out about the amazing and ancient remedy when I attended a holistic health fair in Stowe, Vermont, last summer. Since then, I have been drinking Noni daily without missing a day!!! I began by taking 1 oz. for the first 7 days and then began to drink between 2-4 oz. daily. Initially, I was interested in taking it to alleviate the back pain that I was still experiencing after my back surgery in June 2004.

Right away, I experienced more energy, and I no longer had any more symptoms of constipation nor any more

headaches. Within the next three months of taking it, my back pain was gone, and the seasonal allergies which had plagued me for over fifteen years were no longer plaguing me. I could finally breath freely, talk without sounding like I had a cold (no post-nasal drip), and smell again. Likewise, my food allergies (to tomatoes and strawberries which came about after my back surgery) went away during this time.

I increased my dosage during especially difficult times (up to 6-8 oz. daily). As a rule of thumb, for

every year that you are not healthy, it takes your body one month to heal.

Today, I drink between 1-3 oz. daily and I am healthier than I have ever been – no colds/flu, no back pain, no allergies, no skin breakouts, no weight gain, and more energy plus, plus, plus.

Many blessings unfold as you begin to experience this awesome and ancient blessing. Try it for yourself, on a consistent basis. Give your body, at least 90 days, and allow your body to begin to heal naturally.

“The 2nd day when JC woke, he was breathing and feeling so much better...”

—Submitted by *Nancie J. Fleming*

My son was diagnosed with having Bronchial Asthma after he had a severe case of the Flu. I took him and had his lungs X-rayed and while at the doctors office he was given a breathing treatment.

The Doctor suggested antibiotics, decongestant and steroid therapy for 7 days. I did not want to use the steroids (and had told the Dr. this) but he wrote

the script for him anyway. My son has allergies to dust, dirt & mold and we live in Florida where they are abundant in almost every building here.

When we arrived home I started giving JC a shot glass (1 oz.) of Noni every hour for the next 8 hours (8 oz. the 1st day) The following day we did a Shot glass full every 2 hours giving 6 oz. to his sick lungs.

The second day when JC woke he was breathing and feeling so much better. We continued to give him 1 oz. three times a day for the next few days and his Challenge with the Virus / Asthma was so remarkable. NOTE: I chose Not to give my son the Steroids and used Noni as his therapy.

All summer JC has no symptoms of his allergies until he goes back to school then his nose

will run and his eyes get red and watery. This year he is drinking 1 oz. of Noni as soon as he gets up

and has not had the symptoms of the previous years. If he feels a cold coming on we just increase

his dose till the symptoms are gone.

“Our son has suffered from chronic sinusitis since the age of six...”

—Submitted by Kevin and Marcia Dummer

Our son Keenan, who will be ten years old this summer has suffered from Chronic Sinusitis since the age of six. He has tried numerous medications, allergy testing, and eventually ended with sinus surgery. His symptoms never improved.

I was introduced to Noni by a friend which I saw had made a positive affect in her health problems. So we decided to give Noni a try for three months.

Keenan told us he could tell the difference with in a few weeks. After a year our pediatrician suggested we try taking him off

Noni for awhile and just stay with the medications he was also taking for his sinuses.

So after a couple months without Noni our son asked us to get Noni for him again. He came to us, and we feel his decision as a young child told us the story of how he was truly feeling.

“Noni is such a blessing to our lives...”

—Submitted by Cindy

I have a wonderful testimony about my daughter and allergies and we tried everything from all the herbs to colonics to MD's to lots of Chiropractors and even moved to Colorado.

And the first thing that took it away – Bingo, Gone! – was Noni, but it took 8 weeks of persistence,

Rosalyn (my daughter) had pollen allergies and sat up to sleep in Florida for most of her first 8 years, her hearing was bad and it was a nightmare with her teachers, they were furious at me, thought I should be able to do something and when she got better here in Kansas after 2 years

of school here, her teacher would say well Rosalyn why don't you have allergies and you can hear!

She sat at the front of the class and lip read before and what it all boiled down to I believe was a lack of enzymes Noni provided.

“My sinus problems cleared within 3 days of starting Noni...”

— Submitted by Leland & Alice Strommen

Alice: My sinus problems cleared within 3 days of starting Noni and my lungs are much clearer. The cloudy film over my eyes has cleared – a symptom that has been with me for years. It is so wonderful to see clearly again.

Whenever I would travel it never seemed to fail that I would get sick upon arriving at my destination, and I would be sick till

after I had returned home for several days. I have taken several trips since starting on Noni and have not gotten sick once!

I suffer from arthritis and have been on pain medications for many years. I am now FREE of all pain medication and no longer am in the debilitating pain that I was in before.

Leland & Alice: We both feel much better; general well being,

more alert mentally, both of our gray hair has gotten darker and Leland is growing new hair at the top of his head! That is exciting for any man. And, we no longer crave sweets!

Alice: "I've even lost inches!"

Noni is such a blessing to our lives and is such a wonderful product.

“The very next day after taking Noni, he was able to breathe normally...”

—Submitted by Karen J. Carlson, R.N.

Doug's cousins in Minnesota introduced us to Noni last November. We started taking Noni on December 9th. Doug had developed asthma over the past couple years, and has had a long history of severe sinus infections. He also took allergy injections for awhile. (Has always battled with allergies.) He has had difficulty breathing through his nose for YEARS.

The very next day after taking Noni he was able to breathe normally. His wheezing went away. In the early 70's he was diagnosed with rheumatoid arthritis. He had been taking 16 Aspirin a day. One of the reasons we moved to Texas was that the heat is better for his joints. The

heat helped, but he'd still ache when we had cold or damp weather.

He no longer has aching joints, and his feet aren't "lame" when he first gets up in the morning !!!

In November I scheduled a GYN appointment for January 6th as I was having pre-menopausal systems ... insomnia, irritability, some short term memory loss and other symptoms too embarrassing to mention!!!

Since taking Noni, these symptoms have gone away!!! I also have a terrific amount of energy and accomplish more in a day. I have had a surgeon aspirate fluid from cysts in my breasts several times (anywhere from 2cc-10cc withdrawn in a

syringe at a time). In March, I noticed that I no longer have lumps (which means no pain!).

My mother has had the same genetic problem. She has developed no new breast cysts since taking Noni, and the "fatty tumors" in her arms have gone down in size. Over the years, I have struggled with mild depression off and on, and also PMS related depression which is cyclic.

I have noticed no depressive symptoms since taking Noni. The greatest effect of Noni is having more energy and an improved sense of "well being". For this, I am thankful!!!

“My right knee was swollen and painful...”

—Submitted by Robert Herringer

In mid-December three years ago, after a busy weekend of wrapping cedars, and putting up Christmas lights, my right knee was swollen and painful – so much so that I was walking with a limp. I had obviously overdone it on the weekend or somehow put some stress on my knee.

When this condition refused to get better on its own, I visited my doctor immediately after Christmas. He took one look and told me that I have osteoarthritis. Being a reasonably active 57 year old who did lots of walking to keep in shape, I was somewhat in denial. My doctor sent me for x-rays to confirm his diagnosis.

Ten days later, I was back to get the bad news. “It is most important that you keep active,” cautioned my doctor as he started

writing a prescription. “Not much modern medicine can do for arthritis, except to control the swelling and the pain.”

“Hold it on the prescription doc” I said. “If it is all right with you, I am going to treat it with Noni.”

Incredulously, he asked, “What the heck is that?” When I told him, he simply said that it sounded like a natural material to him and that it should be harmless – so go ahead.

Having been given this green light, I immediately embarked on my own course of treatment: anywhere from four to six ounces of Noni per day.

About four months later, I was back in my doctor's office with a list of health-related issues that were much improved over my last visit. At the top of the list was

osteoarthritis. I was claiming 90% victory over this condition. The reason it was 90% and not 100% was I could still feel a slight surge of pain when going up and down stairs, and I still couldn't kneel on my right knee. However, I was walking as long and as far as I wanted without any discomfort or any after effects.

I noted other improvements, as well. I was enjoying better digestion, more energy, acid reflux was under control, athlete's foot problem all but gone, and a winter skin condition did not return. At the top of my wife's list, was the fact that after a couple of months on Noni, my snoring had all but ceased. After eight or nine months, she was also reporting victory over almost daily bouts with headaches.

After some 10 months on 'the program's juice', my victory over osteoarthritis was 100% – and

continues to this date – over three years later.

“After three weeks my knees were back to normal...”

—Submitted by Claire Wilkinson

Back in 1998 I started to suffer with Arthritis in my hands and knees, I do Kick Boxing In my spare time and I used to struggle with some of the exercises, especially the ones that involved bending. They didn't used to improve in the summer like you would expect, I used to wear knees supports even to sleep in but they used to irritate the back of my knees.

In August 02 I was introduced to Noni, I was a bit skeptical and didn't think it would work even after reading testimonials and articles from doctors.

After three weeks my knees were back to normal, I even went for a run which I hadn't done for years but I was feeling more energetic.

At one point I ran out of my Noni for a time and I was without it

for a few days, I noticed that I started to go back over and old Kick Boxing injuries started reappearing which I hadn't noticed disappearing, as soon as my Noni arrived I started taking it and went back to normal. It took a while longer for Noni to reach my hands but they feel a lot better.

“I want to thank you from the bottom of my heart for sharing Noni with me...”

—Submitted by Lee Pitchford

I want to thank you from the bottom of my heart for introducing me to Noni! I got off to a bad start in life by not having proper nutrition or even much of the time enough to eat, and have had many health problems all my life which lead me to constantly search for ways to not only help myself but also help others. I have spent my life studying nutrition and good diet and anything to improve people's lives. I have taken all kinds of vitamins, minerals, herbs and so many things and changed my diet completely. I am sure it has made a great improvement in my life and kept me going, but I still had health problems.

Recently I got this terrible flu which is going around. I don't know when I have ever been so sick and nothing seemed to help. Then dear friend, you came to the rescue and sent me a bottle of Noni. I started taking an ounce three times a day and in two days I was completely well, up and

back to work and taking care of my home and felt like I had never even been sick! Then I cut back to two ounces a day and then recently to just one.

I noticed many other changes in my health problems. I am a diabetic, and while I kept it pretty well under control just with diet and a few health products which are recommended for diabetics without taking insulin or oral medication. I still found that with extreme stress, illness or working too hard, I had weakness, dizziness and fatigue and was experiencing numbness in my feet. After being on Noni now for about three weeks, all of these problems have disappeared.

I have had sinus problems for five years, which my Doctor or a Specialist were not able to help at all. At times my face would hurt so badly it made my ears and teeth ache and my whole head ache. Much of the medication given for this just gives temporary relief and makes one so drowsy you can't

drive a car or anything so I wouldn't take it. I now have no pain or infection whatsoever!

As the years have passed my arthritis was getting worse and the pain in my left knee and hip as well as my back and shoulders and then beginning to affect my hands, kept me awake nights and often I would find myself at night with my fingers curled into a fist and was unable to straighten them without rubbing and pulling on them. This was the final blow as I am a musician and was unable to enjoy my beautiful grand piano or organ. I took as few pain pills as necessary for they aren't good for anyone. Well, again after taking Noni, the arthritis is greatly diminished and I sleep well without pain pills and can use my hands so much better, and feel sure it will finally go away entirely.

My worst problem by far has been diverticulitis which I have suffered with for years and have been in the hospital several times, and often unable to be away from

my home due to the extreme pain and either my digestive system not working at all or else the reverse. Well again, after three

weeks on Noni my family is amazed that the lump is totally gone. I have no pain, no swelling, and my digestive organs, bladder

and kidneys are functioning normally!

“In less than one week, I have no more arthritis pain, my blood pressure is lower, my knees feel great...”

—Submitted by *Priscilla Green*

I had been suffering from arthritis in both legs, my back and shoulder. I had one knee operation and my Doctor discussed the possibility of having the other knee replaced. I also experienced high blood pressure, and I smoked for over 40 years.

My brother introduced me to this great program and the Noni product, and in less than one week, I have no more arthritis pain, my blood pressure is lower, my knees feel great and my energy level has gone through the roof. I sleep great and wake up

energized. After several failed attempts to quit smoking, I have quit cold turkey by swooshing Noni in my mouth before swallowing. I even washed my car by hand twice in one week! This is a wonderful product.

“It was becoming increasingly difficult for me to run...”

—Submitted by *Warren Smith*

I'm 44 years old and I'm an avid runner. I've been running for over 7 years and have raced in over 80 road races including the Pittsburgh and Boston Marathons. Needless to say, I really love the sport and plan on doing it for as long as I can. However, due to arthritis and a long list of minor and major injuries, it was becoming increasingly difficult to run as long and as hard as I once did. A very good friend told me about Noni because she knew that I'm unable to take any anti-inflammatory drugs. Since I

started drinking Noni, I'm running pain free and my race times are improving. Noni did not make me run faster! However, for the first time in my life I can now do interval training, and I have substantially increased my mileage. But more importantly, on Sunday March 1st, the day after the race, I ran 20 miles. This was only the third time in well over 2 years I have run that distance, and once again experienced no problems whatsoever!

As I said, because of the side effects I experience with traditional

anti-inflammatory drugs I decided to try Noni. Prior to this, I have taken only one other natural food supplement. I had modest success but no longer use it. I'm not a professional salesman. I'm an Assistant Vice President at a major financial institution and have never recommended anything like this in my life. It's just that I can't emphasize enough how well this product has worked for me! Also, since I started taking Noni I'm also experiencing many other health benefits.

“At times I could not walk, and my children would have to carry me to bed...”

—Submitted by *Maxwell Toliver*

At age of 25 I began to experience some pain in my back, knees and shoulders. I went to see a doctor and was told that I had Rheumatoid Arthritis. I was told that it would advance throughout my body.

Everything was find for a while. But as I got closer to age 26 things started to get worst. My wife and I had two children that year. I again just ignored the pain and started to take "Advil" quiet often. As time went by and I got older my condition got worst. In a

seven year time period I became so bad that at times I could not walk and my children would have to carry me to bed, where I would lay crying and screaming in pain.

I continued to work another seven years in pain. After doing some research into arthritis I

found out that there is no cure. But, I did find out that my sister lived in Arizona which has been grate for people with my condition. After some investigation, it appeared as though the weather and climate (dry and hot) were ideal for Arthritis sufferers.

After our children were finished Jr. High School we all agreed to move to AZ. To try and save what could have been my last few years walking up right.

When we arrived in AZ I found the temperature to be hot and dry like I was told. I was still experiencing some pain but the intensity was like being in Spring or Fall living on the East Coast. I am able to handle that pain. But I was still having problems with swelling around my joints and being unable to feel and grasp small things. My joints were still stiffening during the winter months in AZ.

A little over one year ago I was introduced to Noni by a good friend. He explained to me what Noni does for people. "It helps the body cells do what they were designed to do." It works

differently on each person that drinks it. I have been drinking Noni for a little over a year. When I stop or run out I feel the pain and stiffness come back into my bones in as little as two or three days.

For those who are readying my story for the first time please understand the following:

- I might of been in a wheelchair by now.
 - My children 17 and 18 year old boys don't have to see their dad as a week person at 44 years old.
 - My wife does not have to continue to cry at night because her husband is in so much pain.
- Instead:
- I feel great, I stand up right, and I look good for my age.
 - I am as limber as I was in my early 30s.

All the money in the world can't replace this reprieve I have gotten on my life. My wife and I are getting ready to turn 45 years old and we now have a new born baby girl. I look forward to playing and running with her in the park when she turns 10 years old.

Added note:

1. My mom suffers from High Blood Pressure. She has tried prescription drugs, over the counter drugs and Herbal lotions and potions. Nothing worked. Her blood pressure leveled out after drinking Noni for only two weeks and has never gone back up.

2. My niece is a Diabetic type 1 and resistant to her insolent. Her sugar count was always up. She felt the difference right away after drinking only 8oz of Noni.

3. My sister suffers from Menstrual Migraines for over 20 years. She stop having them after drinking Noni for only two weeks.

4. My wife who just delivered our baby girl. She has been drinking Noni all during her pregnancy and 6oz the day of delivery. Delivered a healthy baby naturally. She got up all the way up to pushing the baby out before she even experienced any major pain. The pain she reports was not even close to what she experienced when she delivered our other two children. She was in labor for all of four hours and did not even know it because she was not in pain.

"I began to write 'no pain' on my calendar..."

—Submitted by *Euretha L. Lawson*

I have rheumatoid arthritis and always have severe pain in knees, shoulder, neck, and hands. In the past, I have often been unable to walk for many months.

I began taking Noni in July. At first I was taking one ounce per day. My cousin, who also takes Noni informed me that I should take 2 ounces two times a day, In August, I began taking 2 ounces

twice a day. After taking the 4 ounces per day for one month, I noticed that I wasn't having any pain. I began to write "no pain" on my calendar. It has been 2+ months now that I haven't had any pain and I have been going to worship services since the middle of September. I am so thrilled. I feel really great now. I know that Noni is helping my immune

system, because rheumatoid arthritis affects one's immune system. I will continue to use Noni instead of NSAIDS, other medication. In Jan I had been taking VIOXX, and ended up in the hospital with a bleeding ulcer and had to have 7 bags of blood. Thank you for Noni! And thanks to this special program for making it available!!

“I can do things now that I never dreamed I would be able to do again...”

—Submitted by Philip Denby

I am 54 years old and have suffered with spondylitis and osteoarthritis for the past twenty-five years. I have spent fortunes on chiropractors, osteopaths, physiotherapists, acupuncture and anything else that I thought might help. But my condition deteriorated. Three years ago my osteopath who had kept me going for ten years told me because my condition was so bad he could do nothing more for me. I was in agony, so my GP arranged for me to see a consultant at Atkinson Morley, who then performed a microdiscectomy and a

laminectomy. My pain after the operation increased dramatically. I am registered disabled and have had to use a mobility scooter to go shopping. I really have been unable to live a normal life having to spend at least two days a week in bed. The pain has been so bad that I have not slept properly for years.

My son introduced me to Noni around the 1st week in July and I must say I was very skeptical, but just to please him I took it. After 7 days I was convinced it wasn't helping but I continued taking it. After 9 days I realized I had

increased movement in my joints and slightly less pain. After 5 weeks on from my first taste of Noni I felt I had been released from prison. I can do things now that I never dreamed I would be able to do again.

I am actually sleeping through the night, which is something I haven't done for many years. I stopped taking my blood pressure pills five weeks ago and my blood pressure is better than it's been for a long time. All I can say is I am so grateful for Noni.

“Going up and down stairs had become pure torture...”

—Submitted by Phil Olson

"Oh My Aching Knees!" Have you ever uttered those words? Or maybe it's your back, or legs that cause you PAIN. Well, pull up your chair and listen to my GOOD FORTUNE!

Ever since 1988 when I suffered knee misfortune due to an accident, I have endured pain – that's eight years ago now! As a result, going up and down stairs had become pure torture. Our shower at home is in the basement; going up and down those steps had become a challenging experience as well.

On November 11th (being only 73 years young) I took my first "swig" of Noni.

After about five days I found that getting out of bed was not such a painful experience. My walking started to improve and my limp gradually crept back into the woodwork; and surprises of surprises – going up and down steps once again became possible WITHOUT THE FORMER PAIN! Needless to say, I was ecstatic!

While this was going on, I suddenly realized that some sores in my mouth had vanished, and a

couple of sensitive teeth had quieted down – hot and cold foods and beverages did not cause me pain any more.

Crossword puzzles became easier to solve, and playing the piano and organ became easier. Seems as though my thinking became more focused. I began to sleep much better at night and required less.

All of these benefits from that bottle of Noni!

You can be sure it has a prominent spot at the very front of our refrigerator.

“Within two and a half weeks of taking Noni, the severe pain in my back disappeared, and I could stand up straight again...”

—Submitted by Marion Lackey

For years I have been in lots of pain from arthritis and had to roll

out of bed slowly and climb up the furniture to stand up. Within two

and a half weeks of taking Noni the severe pain in my back

disappeared and I could stand up straight again.

I went to my good friend Dot and pranced about the kitchen.

"Can you believe this is me; I've been out raking leaves with my daughter, and I can even jog again." Since then I have even shoveled snow, which I have not done in years!

I also had a bad stomach that hurt whenever I ate anything. I actually got sick every time I ate. I

never quite knew for sure if it was an ulcer or what.

Noni burned at first when I began taking it, but I kept right on because I have faith that it would help me, and I prayed that it would. I think this burning was part of the healing when it was doing some good to repair the things that were not working for so long in my stomach. Within a couple of days it started to be better, and

then it just improved until I could eat anything without a problem.

My prayers were definitely answered, and now I can enjoy my meals and eat what I like without worrying, and I am PAIN FREE!

Thank you for this wonderful product. I am telling everyone about it every day. No one can stop me from sharing this wonderful life-giving, health preserving Noni.

"We are so thankful for Noni because it has truly changed our lives..."

—Submitted by Chuck and Sharon Rigge

I can personally tell you that Noni eliminated about 90% of my back and hip pain (severe hip pain of 10 years duration) over the first month and gave me a great deal more energy.

After taking Noni for six months I had no hip pain at all and continued to see more improvements in my health. I can now drag a 480 Lb. snowmobile around the garage with no hip pain and no fear of pain the next day!

In January and February I was snowmobiling in the Big Horn Mountains of Wyoming with friends up to 25 years younger than myself. This is extreme snowmobiling at 9500 feet altitude and deep powder. Its one of the most strenuous things you could ever do!

I had no problems and no pain. Sharon and I used to go through nearly a 500 count bottle of Advil a month and now we don't take any! Our bottle of Advil is now almost 2 years OLD! I'm not stiff like before. I don't mind being 52 years old anymore because now I can do what I did when I was 30 and at the same pace or better!

After eleven months of taking only 1 ounce a day of Noni I made an amazing discovery, which

explains why I feel so much better and have so much more energy and can think more clearly now.

Here is how it happened. In September I heard a testimony about a man with severe Diabetes and poor circulation in his legs. They were afraid he would need toes amputated.

Prior to Noni he could only walk 5 minutes at a time and at the Minnesota State Fair he walked 6 hours straight! His wife went on to tell what his Doctor had explained about poor circulation : When the hair follicles on the legs don't receive enough oxygen they will not grow hair!

Her husband, prior to Noni, had no hair whatever on his legs and after taking Noni for 7 months he is like a 6 year old kid showing everybody the hair on his legs. The importance of this, is if you don't have hair growing on your legs and you did when you were younger, you could have a serious circulation problem.

For the past 15 years I hadn't had any hair on my legs from my knees to my toes and always thought it was because of over the calf athletic socks.

In the past few years I was beginning to suspect I had poor circulation because my feet would

get so cold in the winter at times that they would hurt and I couldn't stand to wear my boots in the summer because they were to hot. Last winter my feet were somewhat better and by August 97 while on Vacation, there was no problem wearing my boots even out in Utah with the temperatures in the high 90's and low 100's!

A few days after that meeting I remembered to look at my legs and was I surprised to find hair growing on my legs, knees to toes and up to 3/8 inch long! This was after 11 months of taking 1 ounce of Noni consistently every day and I estimate the hair growth started at around 9 months!

I couldn't tell this improvement in circulation was happening because it happened so slowly and subtly. Pain is a nuisance but it generally isn't fatal like poor circulation which could lead to heart attacks or strokes.

Sharon has had surgery on her right foot twice in the last three years. The second time was May 96 and the Surgeon Dr. Connors said he'd never seen a joint with arthritis that bad, he said there was no cartilage left, it looked like polished marble! He removed some bone spurs and stated she

would be able to bend her foot more but when she couldn't stand the pain anymore, a third surgery would be required with a choice of either having the joint fused or completely taken out!

This third surgery would have meant she wouldn't be able to walk normally ever again for the rest of her life! The pain and swelling never went away all summer and into the fall, she couldn't bend her foot anymore than before, she took up to four Advil three to four times a day. She could only wear about two pairs of her shoes with 1/2 inch flat heels and even occasionally had to wear her bedroom slippers to work.

She started taking one ounce a day of Noni in October 06 and After one month, she didn't need to take Advil at all, and she was even wearing some of her high heels he wouldn't believe it.

She can walk again without getting tears in her eyes because of the pain!

Noni has continued to help the arthritis in her hands, her thumbs were so bad she couldn't carry a can of pop in either hand, now she is able to with no pain. Her elbows and shoulders don't hurt anymore! She just keeps feeling better all the time!

In August of 07 on our Vacation in Utah, and Colorado, we did a lot of hiking. I kept hearing Sharon say, I couldn't do this a year ago, over and over and over!

One of our hikes went like this at Natural Bridge National Park in Southern Utah. We climbed 500 feet down a canyon wall and walked about five miles up and down and over some very rocky terrain and jagged rocky river bottom and then climbed 500 feet back out of the canyon and walked over 2 miles to get back to

the Jeep over some very rugged terrain!

P.S. the temperatures were in the mid 90's and the altitude was over 6500 feet! In October 06 prior to Noni if Sharon walked across a smooth floor that changed to carpeting and stepped on the lip of carpeting it would almost bring her to her knees with pain! Now she can walk day in and day out on some of the most rugged and severe terrain and rocks and mountains you could ever imagine!

Both of us have noticed a big improvement in our memory. Sharon used to transpose numbers all the time and even words in her sentences. She never does it any more which makes it a whole lot easier for us to talk to each other!

We are so thankful for Noni because it has truly changed our lives and helped our friends and families.

“Because of being over-weight for a long time, I was making myself ill...”

—Submitted by Jerry Lou Frieszell

I am a 54-year old women, grandmother to 9. With a body that was slowly falling apart. Because of being overweight for a long time, I was making myself ill. The more I got sick , the sicker I got.

Because of the Arthritis there were days when every move I made, my body reacted with PAIN. For year's I took Arthritis Medicine. It made me sick – as all arthritis medicines do. So about a year ago I stopped the medicine. But the cartilage was gone in both knees. Ate up by my Arthritis. In May of this year I had Total Knee Replacement on the right. While in the hospital my Diabetes went out of control. I took shots while in the hospital and 4 pills a day after returning home.

Today's reading was 78 after 3 1/2 month's on Noni. I also have Chronic Fatigue Syndrome, High Blood Pressure, Bladder Infections, Respiratory problems, Asthma, Seizure Disorder, and Sleep Apnea. Just to name a few. I was on pills of all kinds and not sleeping at night, so I also took nerve pills to help to sleep.

In July I was visiting my family in Indiana.. My sister and Mom started telling me I should try this new product, and about how they were feeling so much better. More energy, sleeping better, and less pain.

I was there for several days and in a lot of pain. That's when I gave in and my life has made a complete turn around since then. It didn't happen over night. With

so many things wrong with me, it has taken time.

I was seeing my family doctor because of a car accident on 8/28/96. He hadn't seen me for a few months and seen a difference right away. All the tests he ran was much better. Blood pressure, skin color, chest, and my bruising from the accident healed much faster. He was very interested in seeing what it would do for my Chronic Fatigue Syndrome.

I told him how I was having less days of being so tired I couldn't walk across the room. Today I am not taking anything for pain, or using my cane much to walk.

I am also able to keep up with all my grandkids, who just happen to live very close, and in & out all the time.

As a bonus – I lost 20 pounds. (First time in 30 years). The weight lost it self will help with

everything I have wrong with me. I like feeling better, more energy, less stressful, and sleeping better

at night. I am a much better person to be around.

“Until that moment, I didn't realize my pain was gone! Noni had healed me...”

—Submitted by Jacques Hacquebord

I am an energetic 16 yr. old. At my high school I play a lot of sports. This past spring, during track season, my left hip started to pain very badly. It would hurt most when I run and right after I run. I decided not to tell my mom about it so that she wouldn't get all worried about nothing. Soon, though, the pain became too intense so I decided to tell her.

At one track meet, after I ran the pain was at its worst. The next day my mom took me to my doctor who is the head of the Sports

Medicine of the University of Wisconsin Athletic Program. The doctor said I had a crack in my growth plate in my hip. He said the quad muscle was pulling too quickly and forcefully on my hip, and thus cracking it at its weakest point. The growth plate, caused it. He said that it wasn't very serious yet, that if I don't take extremely good care of it that it would cause the quad to become completely detached from my hip.

Soon after that I started to take Noni. I took it just because my

mom told me to. Never in my wildest dreams did I think that it could help me. At that time, I also competed in the State track meet, and as you can guess my hip was very sore.

I continued to take Noni. About two weeks later my mom asked me how my hip was, and until that very moment I didn't realize that my pain was completely gone!

Noni had healed me!! No longer did I have a cracked growth plate. If it weren't for Noni, I would still be suffering from severe pain.

“I am pain-free as long as I take Noni...”

—Submitted by Various Named Individuals

The following individuals have given permission to share their story about what Noni has done for them or their family members.

Jill Russell, R.N., has had rheumatoid arthritis for several years, only partially pain-managed with Naprosyn, an anti-inflammatory medication.

She states, "I am pain-free as long as I take Noni. Noni takes care of what Naprosyn didn't". Her joints used to hurt when touched.

Within three days after taking Noni she reported "lots of energy" and also requires less sleep per night. She used to have ankle swelling when on her feet all day or when traveling. This also had improved.

Her father has heart problems, is taking heart and blood pressure medicine. He had shortness of breath, could only work one day per week, could only do part of the

yard work, could only walk for short distances, was aching due to arthritis, and had NO ENERGY.

He is no longer short of breath, can walk for long distances, his blood pressure has returned to normal, can do yard work all day because he has more energy, is not aching, and is very motivated!!! Noni has changed his life in a very short time.

Jill's sister, Pam, has recently been diagnosed with type II Diabetes. She started out taking 2 oz. of Noni in the morning and her blood sugar dropped to subnormal right away. She is now taking 1 oz. twice per day and is monitoring the effects of Noni. Several other diabetics have noticed significant improvement in their blood sugar levels.

Another family member no longer has constipation. Noni promotes regularity!!!

Mary Fallon, R.N., has a 29 year old son, Patrick, who had a closed head injury at age 21. He is not able to care for himself and needed 24 hour nursing care. He takes anti-convulsion medication for various types of seizures (petit mal to grand mal in severity), has bladder spasms which causes significant pain which results in increased agitation.

Mary gave Patrick Noni at first to help his allergy and sinus symptoms.

Another nurse, Donna Shule, L.V.N., who cared for him on weekends had gotten allergy relief from Noni so she no longer needed her allergy medication !!!

This testimonial encouraged Mary to try it on Patrick!!! The allergy and sinus symptoms improved significantly (less sneezing and congestion).

Mary ran out of Noni, and after 4 days, Patrick had a grand mal seizure and had increased bladder spasms. I got more to her. She reports that Patrick's improvement is very gradual; the spasticity during a seizure is not as severe, seizures are less frequent, and his facial tics have subsided. He has

longer periods of "awareness" and attempts to communicate.

Mary is documenting his progress and plans to continue giving 3 oz. of Noni to him per day.

Leda Seabury, a 78-year-old woman, slipped and fell across wooden joists where they were

building a new deck. She struck her right underarm and right side of her face severely. She applied Noni topically with a cotton ball to her face. During the follow days, she had absolutely no bruising on her face where she put the Noni. She arm was completely black and blue.

“I experienced my first full night's sleep in ten years...”

—Submitted by *Angelia Wilkerson*

After sustaining a tremendous injury to both arms some years ago, I underwent three surgeries, and was informed by more than ten specialists to "get used to it, the pain will only get worse, the older you get." I was only 21 years old when I was injured, and just couldn't accept that I would live like that for the rest of my life). The pain did continue to get worse, the pain medications, although stronger and stronger, did not do any good. I still woke up several times every night without fail, crying in pain. In late 2001, I was blessed to discover Noni. In only two days, I experienced my first full night's sleep in ten years. I

felt like a new person. I wanted to find out what else this Noni could do for me, and my family, and to my surprise, after a little while, I noticed that for the first time in my adult life, my blood pressure was completely normal; without medication.(I had been on numerous medications for this, with no success, since my teens.) This wonder of nature has continued to help me, and has given my children superior health benefits, as well. For example, for several years now, I have been told that my oldest son should be on medication for ADHD.I didn't feel that would be best. After drinking Noni, he brought up four

grades at school,(one came up 17 points) simply because he was now able to concentrate better. My youngest son has severe allergies, but would live in the great outdoors, if he could. The meds just made him groggy, not feeling like doing much. Just a few days drinking Noni, changed all of that. I can no longer even tell he has allergies. We rarely need to seek medical help anymore, since Noni has built our immune systems so much, and enabled our own bodies to fight off many illnesses. Needless to say, we **WOULD NOT EVER WANT TO BE WITHOUT OUR NONI!!!**

“Both bones in my lower right leg were broken...”

—Submitted by *David A. Carlson*

I am 47 years old and I live in Iowa.

In December several years ago, I was out pheasant hunting with a friend. There had been some snow and ice the night before so the roads were slick. We had been hunting for a few hours and decided to quit for the day.

We were walking up the side of the road to our pickup when we saw a car coming toward us over the top of a hill. The driver hit his brakes and started sliding toward us. I was hit by the car and thrown

125 feet. Both bones in my lower right leg were broken.

I later developed osteomyelitis (infection of the bone) in my leg and have underwent numerous surgeries (14 within 6 years) since the accident. My doctor has told me that there is really nothing more that can be done for me, even though the leg is crooked and I have a lot of pain and swelling. The lower part of my right leg is much larger than my left leg.

I have had to buy carpenter pants to wear to work because by

the end of the day my leg was so swollen up that a normal pair of pants would not fit over it. It was so painful that I was taking up to 16 ibuprofen each day just so I could get through the work day.

Then I spent my evenings and weekends laying down with my leg elevated trying to reduce the pain and swelling. I have not been able to stand up from a kneeling or squatting position without using some sort of support to pull myself up with and have been suffering with pain in both knees.

I was introduced to "Noni" last December. I was really skeptical at first.

It was hard for me to believe that a fruit could really help people with serious health problems. I decided that it wouldn't hurt to try it, so I started taking two tablespoons each morning before leaving for work.

I noticed a difference the very first day. When I got home from

work, my leg wasn't nearly as swollen.

As the days went on I noticed more and more improvement. I now get home from work after working a ten-hour day and my leg is not swollen up from a kneeling or squatting position without any assistance and I do not have the pain in my knees either.

I no longer have to come home and spend all my time laying

down. I feel a lot better and have a lot more energy. My life is finally more than just working and resting. I have been able to almost stop taking the ibuprofen. I may take two or three a night before I go to bed but that's a lot better than 16 a day!

"I started suffering from chronic pain in my feet and ankles..."

—Submitted by Charles Bond

I was always into sports that kept me in pretty good physical shape. Naturally these activities were a little hard on my joints and feet as I weigh well over 200 pounds.

Around the time I turned 32 I started suffering from chronic pain in my feet and ankles this went on

for about three years. I would get out of bed some mornings and fall flat then hobble around for hours until the pain became so normal that I hardly noticed it. As an athletic man used to having every resource of my body at ready command this was outrageous to me. After drinking about 6 oz of

Noni a day for three weeks the pain was gone. I stopped taking Noni soon after that but a few weeks later the pain came back. I started drinking Noni again and continued for about six months after I received relief from the pain again. In the last year it has not come back.

"It's been three months without taking any pain killers..."

—Submitted by Cathy Field

I have three degenerative discs in my back. I was always in pain around my hip joints. I started drinking Noni on Feb 17th. I

discovered with a couple of days, no more pain. It's been three months without taking any pain killers. I drink 2-3 ounces a day

and I am pain free. What a feeling and I will never give it up.

"It was a battle getting out of bed and down the stairs..."

—Submitted by Alfred Kleinert

I was given Noni to drink by my daughter, Michelle in 2011.

I was 62 years old then, with my own business and sporting background. I have always suffered with constipation and in my later years restless sleeps. I found that over the years I suffered with stiffness in the joints. It was a battle getting out of bed and down the stairs. I had pain everywhere. I have a little arthritis

in the hands and it was painful too.

I used to suffer from extremely bad cramps especially after tennis.

When I started taking Noni, I was not sure it would work. I was extremely skeptical. In the first week, I slept better and all of a sudden I started going to the toilet every morning. I never ever used to go in the morning. Over the

next few months I felt much more energy. I could now go down the stairs with no problems. The pain was gone. The Arthritis pain was gone. I even lost a bit of weight!!!

The most significant result has been my recovery after each game of tennis. I no longer have any cramps. I play tournament tennis more and love it.

I feel and look better now than ever before.

“Each day has gotten better since I was introduced to Noni...”

—Submitted by *Ellen B. Diedrich*

Today is the best day of my life. Each day has gotten better and better since I have been taking Tahitian Noni.

Which brings me to why I walk with a cane. On June 19, 1986, I took my first and last sky diving jump. I fell 2800 feet with a malfunctioned parachute. When I landed, I couldn't move the lower half of my body. I was immediately taken to St. Anthony's Hospital in Rockford, IL and later transferred to Milwaukee Country Hospital in Wauwatosa, WI where I was treated for a T12L1 compression fracture in my back and a tibia plateau fracture of my left knee cap.

At first, the doctors didn't think I would live, much less walk again. I am partially paralyzed below the waist and have a spastic bowel and bladder.

When I left the hospital, I was wearing a Milwaukee Brace and I had a brace on my left leg. The doctors anticipated that I would have that brace the rest of my life. One month later, the braces were gone.

The recovery process has been a long one and I continue to recover more of my bodily functions. The body is truly amazing.

On Saturday, February 7th, I received a call from my good

friend, Ruth, at 6:15 a.m. She said, "Ellen, you need to come over here right away. I have some Noni that I want you to take". "But, I am still sleeping." Ruth said, "I don't care, you aren't now, so get over here." I had never heard her sound so excited about anything like this since I have known her.

So, over I went to find out what all the excitement was about. She proceeded to tell me about this Noni and what it was doing for people all over the country. Not only did she pour me two ounces of Noni and told me how to take it, she also applied Noni on cotton balls to a very large scratch that I had on my left cheek. She also had me try the Hoa that day. I will be forever grateful for Ruth and her wake-up call.

I said, "Ruth, look at my hands, they are not tremoring". Since my accident my hands would tremor and more so when I got tired. I couldn't believe what I was seeing. We continued to talk as I finished up the Noni. I then went home with my first bottle of Noni, a gift from my friend.

The first day after I had begun to take Noni, I had four NORMAL bowel movements. I have also been prone to diarrhea at least once a week and since I have started taking Noni, I have not had diarrhea. Now, that is a miracle.

On the second day, I got up feeling full of energy. I take medication for anxiety and the side effects have caused my legs to be lazy, sluggish and more numb. But this morning when I had gotten up (after 8 ounces of Noni), my legs were not lazy, numb or sluggish at all. I also get up in the morning feeling very stiff and in pain. I noticed that there was no pain. Being prone to muscle spasms at night has been relieved by my taking Noni as well.

About two weeks after taking Noni. I noticed that my toes began to ache. Having experienced this kind of pain before, I knew that I was beginning to get substantial feeling back in my feet. I can feel the inner part of my foot. I feel like my whole body is coming alive. My left ankle bent and then came back to its' original position rather than my falling down. I am able to feel a full bladder and bowel and discharge it. I am not experiencing any numbness (carpal tunnel) in my fingers due to walking with a cane for close to 22 years.

I have more mental energy. I am more alert, more rested. I have the desire to do a lot more.

Ruth, thanks again for the wake-up call.

“The doctor told me my career was over...”

—Submitted by *Ken Erickson*

I have never written a testimonial or given an endorsement for a product before. However, I feel that the time has come to let everyone know about the fantastic product.

First, let me say that I am 49 years old and I have been a professional law enforcement officer for over 22 years. Last September, I was diagnosed with degenerative arthritis in my left hip

and knee. The state doctor told me that my law enforcement career was over, effective that date and that I would never be able to reenter the profession.

He further told me that I would have to have my hip replaced in about 2 years. This was a devastating blow to me. I have since reentered college to obtain my degree in Business Administration to find a new career.

About three weeks ago a friend introduced me to Noni. The first thing I noticed was that in only 2 days the pain in my hip and knee subsided quite a bit, by the 5th day, the pain was completely gone. I have never felt better in years. I am going to keep on using

Noni and just maybe I won't have to have my hip replaced. However, if I still have to have it replaced, I know I will be able to heal that much faster.

“I sleep like a baby, have tremendous energy, and no more depression...”

—Submitted by *Rebecca Rivera*

I can hardly believe how great I feel. For the longest time I suffered from severe hip pain, didn't sleep well, felt terribly tired all the time and from time to time felt somewhat depressed. It all started when we visited an 86 year old friend and he gave us a bottle of Noni. This man told us that he felt like a 15 year old; that not one bone of his body ached, etc. The man looks great, has tremendous energy and a very clear mind. My husband brought

Noni home and started drinking it daily. One afternoon he convinced me and I drank about a teaspoon of what I felt was the worst thing I had ever tasted. Well anyhow the next day when I got up I was amazed that my hip didn't hurt. I went food shopping and I walked the whole supermarket with out any pain. I then went to a second supermarket and I couldn't believe it NO PAIN. I then remembered that I had taken Noni the day before. I rushed home and asked

my husband if it was possible that Noni could have worked so fast. He said he didn't know. But ever since then I've been taking it the pain has disappeared. Not only that but I sleep like a baby, have tremendous energy and no more depression. I'm now 58 but I feel I did when I was a teenager. I'm so thankful to God everyday for providing us with this miracle medicine.

“I thank God for Noni every day...”

—Submitted by *JoAnne Weed*

I've had extreme back pain for over 30 years. My chiropractic care made me feel better, but I knew that I would always remain in their constant care. In 1990, I had my first CAT scan. They found a swollen disc in my lower back. It showed arthritis in the surrounding area. I had some therapy, but I soon realized I simply would have to keep on enduring this pain; it never went away.

As the years went on I had a few freak falls which definitely added to my problems. In 1995, I fell off a horse, and the pain worsened. A lot of physical therapy and chiropractic care was necessary. I also began having a lot of neck and shoulder pain and numbness in my hands and arms,

especially at night which caused much loss of sleep as well.

Upon arising in the morning it would take me one-half hour to get my legs moving well and get my back to endure the pain. I now had to seek some new help so I began acupuncture; it helped at first, but I was still experiencing problems with my lower back and ended up with a dropped foot. My chiropractor sent me to my first MRI, thankfully. The test showed the swollen disc, stinosis and spondylitis.

After more acupuncture and manipulation my walk was back to normal. However, I was still experiencing extreme neck and shoulder blade area pain, and the numbness in hands and arms still bothered me.

Two doctors and an occupational therapist told me I had Fibromyalgia. I had more chiropractic care, myotherapy, cranio-sacral therapy, and the list goes on and on. I was seeing a bit of a change with these therapies, but wouldn't you know it, my insurance company discontinued my coverage for these alternative methods.

The doctor costs and out of pocket expenses became so extreme that I could no longer pay for them, and simply had to endure the pain.

One evening the pain was so great that I almost admitted myself into the hospital.

It's a good thing I didn't because the very next day I found out about Tahitian Noni! I read the

information and thought, "What do I have to lose?"

That was the day when I took my first portion of Noni. On that day, I physically worked hard away from home; still had pain, but when I arrived home I had an unusual amount of energy and endurance so I began cleaning the house for three hours. My adrenaline helped me through till

11:00pm, and my body had a sense of peacefulness about it.

The second day on Noni was a very rushed day. I noticed I didn't have as much arthritic pain in my lower back; I actually had a warm knitting feeling in that area. It seemed amazing, and I wondered if I was imagining this!

The third day I awoke and found I had slept through the

night. My hands and arms weren't numb anymore, and the greatest thing of all was that I had no pain in my neck, shoulders or back.

I haven't felt this pain-free in years! And also, my teeth which were sensitive to hot and cold are now quieting down.

I thank God for Noni every day!

"Thank you God for this wonderful gift that is helping so many..."

I am 36yrs old and all my life I have had problems with my knees I have been to many doctors and chiropractors and had many x-rays done and nobody could ever tell me the problem I was having with my knees and of course the older I was getting the worse it was getting at age 32 I had a full physical done and the doctor's told me I had the knees of a 60yr old just what I wanted to hear.

Thanks to my father Tom for introducing me to Noni after starting to take Noni in August,

about 30 to 45 days later my father asked me how my knees were and I said come to think of it I had not been having any pain.

(It was so subtle I didn't even realize what it was doing "Noni").

Not only that the arthritis I was getting in my fingers is gone, and I have only had the flu 3 days since 1996 and I use to get the flu at least twice a year and be down for a week to two weeks at a time.

This is one of the Best Immune System Builders I have seen and it has helped me so much in my

life that it is truly a blessing to be pain free in my knees this is truly a Gift from GOD and I am sharing it with as many people as I can so if you believe in miracles or if you don't please try this and at least commit to 90 days and maybe you will find this to be a miracle for you as well...

Thank you God for this wonderful natural gift that is helping so many...

"I could not walk upright, stayed in the bed, and did very little..."

—Submitted by Dee Gibbs

I suffered many years, with severe knees, shoulder, lower back pains. Numerous times I could not walk upright, stayed in the bed, did very little, the pains

were too severe! Noni has decreased the pains to the point I am functioning with more control. My hair grew, my nails grow now, when they weren't before. The

longer I take Noni I feel other things in balance in my body.

You know the difference when you stop taking Noni! Noni is good to me!

"It was as though a huge weight had been lifted off my shoulders..."

—Submitted by Marjorie E. Mueller

I will be 80 in October. For more than 25 years my two middle fingers on both hands would lock up, and I never had any idea when it would happen. I've had to use the other hand to try to unlock

them by holding my hand in very warm water and had to begin working my knuckles before they would unlock. It hurt, and I was afraid I would break my fingers trying to open them.

I also have Diabetes, Sinus, Arthritis among other things.

In July I began taking 1 oz. Of Noni per day. By the third day my body felt so good. It was as

though a huge weight had been lifted off of my shoulders.

After a week I had so much energy that I did so many things that had been left undone since I injured my back by falling on the ice in January of 1996, including cleaning out the garage!

My fingers have not locked since I have been on Noni. I had also been very depressed since

last November, and I am no longer depressed. I feel great! Also, I had been coughing a lot every day due to sinus drainage; now that is almost gone.

I had a canker sore in my mouth and put Noni on it at night and the next morning it was gone!

A few weeks ago I received a cut on my arm that was quite deep, bleeding and open. I lifted

the skin and put Noni on it; it stung for a second, but soon the pain was gone completely, and it closed the cut.

After placing a bandage on it I could hit the cut with my hand and it didn't hurt a bit. Since I am a diabetic, it normally would take a long time for anything to heal and not be sore. I was just amazed with the results!

“I can thread a needle again. I can actually see the eye of the needle...”

—Submitted by Jean Bartel

A few years ago I was told that I was very young to have MACULAR DEGENERATION but not much could be done about it. I was told to look at a grid every day to see if there were any changes, and then to call the doctor. I was also told that some doctors think vitamins and minerals might be helpful, and if in 5 years "they" said "Yes, vitamins are helpful," I would have 5 years on it.

Note: Many people do not know what Macular Degeneration is. The Macula is the most sensitive part of the retina. The Macula focuses on the center of our field of vision, controls reading and fine detail work, and eventually people have only peripheral vision. For example, you could see the outline of a clock, but not be able to tell what time it is.

The beginning of June, I could not read a page or two without getting so tired that I had to lie down for 15-20 minutes. So I had just about stopped reading when

my husband and I decided to take our first trip to Hawaii. Let me say it was very depressing not to be able to read more than a few pages at a time about a place I had wanted to go since childhood.

On June 11, I started taking Noni. After a week I noticed my back did not hurt any more from the ARTHRITIS and curves in my spine, and I felt FANTASTIC!

On August 27, I realized that I could make out the As, Es, Cs, Os in print. Before that the print was blurred, and I would guess most of the time as to what the sentence said. In checking the grid (that I hadn't looked at for a while), I also realized that there were VERY FEW wavy lines, so I am extremely anxious to see my doctor in October.

September 19: I can thread a needle again. I can actually see the eye of the needle!

Update: October 24. I went in yesterday for my yearly check-up on the Macular Degeneration. The doctor came in and said that the Macular Degeneration was not

worse. I asked, "Is it better?" He answered, "Well, it is easier to see if something is worse than better, and you are the better judge of that."

So I told him about the reading, etc. He seemed very interested, and I think was ... because he was the one who told me to go ahead and take vitamins in case five years down the road the "experts" would say, "Yes, vitamins really do help with Macular Degeneration."

Since I first found out about the Macular Degeneration in December last year, I have had three more prescription changes for my lenses. Now my eyes are back to what they were before. I will say, Thank you Lord.

Prayers are answered, and how many other people are also praying for help or a miracle that we might be able to help with God's wonderful gift to us of Noni.

We simply have to tell all the world about this special program and benefit of Noni!

“As a test, I quit taking Noni, and required more pain medication...”

—Submitted by Amy Faber

I was diagnosed with lupus in 1999, at the age of 17. I had an extremely serious case. It affected

my heart, my brain, and my lungs. I had pleurisy for 7 years, and I had to sit up in bed to sleep.

I took high doses of steroids for ten years. As a result, I have had

to have multiple joint replacements.

I have had to have both shoulders replaced, both hips (the left one twice), and my right knee. During a ten year period, I was constantly in the hospital, once for an entire year. I had psychosis and grand mal seizures from the steroids.

About nine months ago, a friend suggested that I try Noni, because someone he knew had tried it and gotten good results. I

was very skeptical, but I decided to give it a chance.

The first change I noticed was that I wasn't taking my pain medication as often.

As a test, I quit taking Noni, and I required more pain medication. So, I started taking Noni once more and again noticed that my level of pain was lower.

I started weaning myself off of my medications. I did this one medication at a time. When I first began taking Noni, I was on five

different medications. I am now down to just two, one of which is for my thyroid. I had been on these medications for eight years.

Last year at this time I had to wear air casts because of the pain. I no longer need them, and this is the least amount of medication I have required since becoming ill in 1979.

This is the most active and the least sick I have ever been!

“I’m no longer on pain medication. I truly feel like a new person...”

—Submitted by Sandra Best

I found out about Noni two months ago. I was having a lot of pain in my knee from a bad skiing accident. The pain never seems to go away or get any better. Then I found out about Noni. Since I've been taking Noni, I have realized after only a week the pain no

longer existed. After a week of not having Noni the pain came back. It was hard for me to bend down without the pain being very intense. I got some more Noni and the pain was once again gone. I never intend to be without Noni again, I have also realized other

symptoms being taken care of because of Noni such as back pain and leg pain. I feel better in many ways because of Noni. Because of Noni I'm no longer on pain medication. I truly feel like a new person.

“I have never found anything that works like Noni...”

—Submitted by Judy Carpenter

I have had pain in my body, especially my lower back for years due to suffering injury in a severe car accident in 1983 (as well as having fallen down stairs and being unable to walk for a while and three other car accidents through out the years). I learned about Noni in May of this year when a friend of mine asked me to try it. I decided to try it. My logic being, it is a natural fruit juice with no added sugar: what could it hurt? And besides, it just might help. Anyway, I decided to give it a try. I did not notice any

difference for about two weeks, then I began to notice that I did not have as much pain in the morning as I usually did. But that did not convince me yet. I kept taking it every morning and night. After another week, I felt even better with regard to lessening of pain, to the point that I pulled weeds from a 40 ft. row of onions. Before, if I had done even half of that, I would have had to put an ice pack on my neck and shoulders and hope that I didn't get a migraine not to mention being "stove up" as Grandma

used to say. But I did not have to do any of these things! I told my husband about it and he was amazed, too! He knows what I have been through. This is MAJOR! To not be in pain is SOOO wonderful! I have been taking Noni for over four weeks (two ounces each night and morning) and I am going to continue to take it. I have tried many things that were supposed to help with all kinds of illnesses and injuries, etc. but for me, I have never found anything that works like Noni.

“I would be walking down the street, then all of a sudden I would fall down with the pain shooting through my leg and ankle...”

—Submitted by Dorothy Forbes

I first started to take Noni for arthritis after hearing about it from a friend. I am 65 years old, and I work part time as a dental assistant. I could not get out of bed in the morning before doing a series of exercises which took about fifteen minutes. I was seriously thinking of retiring, I was in so much pain. I couldn't make a fist because of the swelling in my hands. My hips, knees and ankles were also giving me lots of pain, I would be walking down the street, then all of a sudden I would fall

down with the pain shooting through my leg and my ankle.

After the first week of taking 30mls of Noni each morning on an empty stomach, I felt some noticeable relief getting out of bed.

After showering, I applied Noni to the affected area. I did this 3 times a day. After the third day the itching stopped. Therefore, I was not scratching and scratching pieces of skin... It is BLISS not having the discomfort of psoriasis ... I'm not saying it's gone, but the

relief of having it under control is mighty powerful.

If ever I feel the skin tingle or itch on the affected area I just rub in Noni with a cotton ball. The affected area now has scar tissue, and healing. The pain of my arthritis is 95% gone, and I haven't fallen down since feeling relief from the pain. I was now on my third bottle of Noni, when this all occurred. That's two and a half years ago now, and I haven't retired yet. There is still life in the old girl!!

“Almost a year later – more astounding results continue to appear...”

—Submitted by Tom Reese

I'm an insulin-dependent adult diabetic [type II diabetes Mellitus]. Tuesday night two weeks ago [August 14th, 2001], we bought our first bottle of Noni. I started that night on 2 oz of Noni twice daily. By Saturday the 25th, I noticed I didn't require as much insulin as usual. Sunday night the 26th increased to 3 oz and have continued twice daily at that rate. Sunday and Monday nights I had to get up in the night due to low blood sugar [my body wakes me up when it is "crashing"]. I had to eat a sweet snack because I had too much insulin in my system. I had already cut back on the amount of insulin I had been taking.

I'm astounded !! I still need to take some insulin, but time will tell if that need goes away. I'll give it the time !!

Almost a Year Later – More Astounding results Continue to Appear ! ! ! !

A couple of months after I wrote the testimony above, I noticed that I was beginning to experience a return of some sensation in areas of my feet that had suffered severe nerve damage [diabetic neuropathy, it is called] – I could begin to sense if the floor I was walking on bare-footed was warm or cold – something I hadn't been able to feel in a number of years.

Several years ago, I had participated in an investigational study at the University of Texas Southwestern Medical School that involved the use of a European medication intended to stop or reduce nerve damage in my feet. The damage had continued to increase following this study. I thought that once a nerve "died",

that there was nothing that could be done to restore lost nerve function. Well, Noni continues to prove conventional medical wisdom to be mistaken.

I do not have full feeling back in my feet, and I don't know if I ever will, but the improvement in nerve function continues. For quite some time, I had not been able to maintain my balance when standing in the dark or with my eyes closed. As you may know, the many nerves in the bottom of our feet provide our brain with critical feedback needed in maintaining our balance. But about two months ago – in June 2002 – I suddenly discovered that I no longer had to lean against the wall of the shower when I closed my eyes as I washed my hair. And I have noticed that when standing at meetings, I am more steady on my feet.

“I could never say enough about Noni! I only I had it when I was younger...”

—Submitted by Mrs. Lucille Zingarelli

I am 62 years old. I have diabetes and had developed sores on my legs and they itched all the time. I had a hard time keeping my diabetes under control. I also have Arthritis in my left knee.

I have been taking "Noni" for over two months now and my legs are all dried up and the sores are gone, and they don't itch anymore. Also, the diabetes is controlled. Every time I take a test it says "controlled".

Noni has also helped my colon and now I am a regular as can be. I could never say enough about Noni! I only wish I had known about it when I was younger and had all my stomach problems.

“I was told I would be blind in a matter of years...”

—Submitted by Ted F. Pevear

I have had diabetes for 15 years. My sugar levels continued to rise to around 500. After being put on Glucophage and Amaryl, my numbers went down to around 250. Still too high. I began to have

diabetic retinopathy and was told I would be blind in a matter of years. I panicked and I was very upset that nothing could be done for me. This is when I discovered Noni. After taking Noni for about a

month, my blood sugar levels came down to around 80. I have been normal for about 6 months. My diabetic retinopathy has gone and my vision has more sharp.

“I am positively surprised! First, my mood has improved...”

—Submitted by MW

I am male, 37 years old and have type 1 diabetes since age 12. A friend of my wife and her husband take Noni since 3 years and are always raving about what it did for them so my wife convinced me to give it a try. I am now taking it since about 3 weeks. I started with the recommended dose of 30 ml in the morning but because I want to give it a maximum chance to succeed I decided to take 3x 50 ml per day about a week ago.

I am positively surprised! First, my mood has improved. This is something many people seem to experience with Noni. Second, my sleeping pattern is a lot better. Before Noni I usually went to bed at 11.30 p.m. - 12.00 and had a hard time to wake up in the morning. Now I can easily sleep early (9 p.m.) and can just as easily rise early (5.30 a.m.). Due to Noni? Who knows? Third, my blood sugars are much easier to control now. My meter shows the average reading

of the last two week's measurements. It is 121 now – very close to normal. It used to swing between 135 - 145 before Noni plus blood sugars were swinging wider than they do now. I find it much easier to keep my sugars near 100 than ever before. There were still swings but not large ones. I have not done big changes in my eating habits. I am only drinking a lot of water (even if I am not thirsty) because I read that it is beneficial. No other diet change.

“This was a fate worse than death – I thought often of suicide...”

—Submitted by Jack Shelburn

I live in Northern New Mexico. About 36 years ago, when at the age of 11, I became a Type 1

Diabetic. The doctors assured my parents and me that with proper care and regulation of my blood

sugars, I would be able to lead a normal life. In those days, the methods for monitoring blood

sugars were sketchy at best. Blood sugars were monitored by urine, which showed a reading from 6 hours earlier, and only gave general levels (low, medium, high, and very high).

When I was 25 complications from the diabetes began to appear. My lower extremities began to hurt and ache excessively due to poor circulation, a common complication of diabetes. Doctors and specialists in diabetes treatment informed my wife and I that I would have to learn to live with the pain. My wife refused to accept this diagnosis and proceeded to search her books on nutrition for an answer. She was searching for Noni even then.

Happily, even though Noni wasn't available, she was able to relieve all of my symptoms with a combination of vitamins, minerals, and herbs.

At 29 I was afflicted with abnormal blood vessel growth in both of my eyes (medically known as Diabetic Retinopathy). Untreated, blindness would result. This necessitated 14 laser treatments (9 in the right and 5 in the left). Though I lost some of my visual acuity, the danger of blindness was averted.

In the latter part of 1995, my doctor informed me that my kidney function was declining, indicating that my kidneys were failing. He hoped that my recent bout with the flu and pneumonia were the actual cause. After more tests in February of 1996, he informed me that I definitely had ESRF (End-Stage Renal Failure). He immediately advised me to become listed for a kidney transplant and informed me that if I continued working, I could expect to require dialysis within 6 months. If I would retire from my job, I could possibly prevent the need for dialysis for 2-3 years. Reluctantly, I retired on March 31, 1996 at age 44.

The next 2 years were spent arranging for the transplant. After the first acceptance for kidney transplant I became aware of a new procedure, which would require a dual transplant. One for the kidney, to save my life, and another for a pancreas to end the diabetes and, hopefully, prolong the life of my new kidney and improve my quality of life. I became officially listed for the dual transplant, and began the long wait for the anticipated call.

In the meantime, my health gradually deteriorated to the point where I could barely function. I would sleep 10-12 hours a night and then take naps during the day for an additional 6-8 hours. I could barely walk, and helping around the house, making repairs, or anything else became not only difficult, but impossible. I became very depressed. I had been active all of my life and had worked hard all of my life. I felt my life was over, and that this was a fate worse than death. I thought increasingly more often of suicide.

It was then that Noni miraculously entered my life. My wife, Stella, had met Susan LeCompte once at a meeting for some other health-oriented company almost a year before. One day in November of 1997 Susan called my wife and asked her if I was still sick and feeling bad. My wife confirmed that I was. Susan then told my wife of Noni and the benefits it could bring to my life. My wife never hesitated, and told her to bring some of the Noni to her to try. The next day Susan arrived with the Noni that proved to be the miraculous turning point in our lives.

For two days I took the recommended dose of Noni (1 oz.) and became so ill that I had to stop taking it for two days thereafter. But an amazing thing had happened: I was no longer suicidal. I wasn't even depressed

any more! Two days later I started with a much smaller dose and gave my stricken kidneys a chance to expel the toxins from the detoxification process, as they were able to. After a week I needed only 7 or 8 hours of sleep a night.

I quit taking naps. After 2 weeks I awoke one day, cleaned my workshop, straightened my tools, and began to finish my projects and make needed repairs on my house and cars. My blood pressure, which had elevated to the level of 200-230 over 90-110, in spite of 6 different medications from my doctor, who had run out of any other drugs to offer, began to decline. A month later it was down to 140 over 85, averaged. (Normal levels are 120 over 80.)

My blood sugars, which had been fluctuating from a low of 20 to a high of 600 mg/l, sometimes in the time span of 30-40 minutes, were stabilized, first at a high level and then tapering off to a lower insulin requirement for control. Control of my blood sugars was so much easier because the drastic swings from high to low were corrected.

Although Noni helped me feel better and improved my overall quality of life during this period of time, it could not stop the progression of my kidney failure. Kidney function is monitored by a blood level called creatine. A healthy person's creatine level is 0.8-1.0. When my creatine level reached 2.0 my doctor recommended transplant. When a person's creatine level reaches 5.0 dialysis is required. As my condition progressed I knew that if I did not receive the transplant that dialysis would be unavoidable. At this same time my younger brother was already on dialysis because his 15-year-old kidney transplant was failing. When I would visit him at the dialysis clinic, the nurses who were aware that my creatine level was 12.5

would wonder why I could even stand up, much less drive myself everywhere, walk, climb stairs, work around the house, mow the lawn, and help my brother with his work (his creatine level was 5.5).

Because of an injury to my leg from working at home, I was hospitalized for a build-up of fluid inside a muscle (called compartment syndrome). Though I resisted, the doctors would not allow me to leave the hospital until I agreed to start on dialysis. This process did not agree with me at all. To cope with it, I turned to the only source of relief I could think of: Noni. The medical staff were skeptical, but I continued to take increasingly larger doses of Noni in order to endure this ordeal. During this time my normal dose of 6-8 ounces of Noni increased to a minimum of 16 ounces a day, and even more on extra-bad days.

My reaction to hemodialysis was so negative that in the first week of June, the doctors began to consider changing me to

another form of dialysis, called peritoneal dialysis. After an especially bad episode of dialysis, which put me in the hospital with a dangerously low calcium level, my wife and I prayed that some alternative would be found. Remember that much anticipated call I mentioned earlier? At 9:30 on Sunday, June 7, it arrived... there was a donor! We had only a few hours to pack for the trip to Minneapolis to receive my transplant. Of course the most important item to pack was 3 full bottles of Noni!

We drove the 75 miles to the airport in Albuquerque and caught the flight to Minneapolis at 1:40 PM. We checked into the hospital at 6:20 PM, and I was immediately prepared for surgery. Surgery began at 9:00 PM, and 8 1/2 hours later I was put in recovery. The doctors told me to expect to remain in the hospital at least 14 days. I took Noni every day, much to the chagrin of the nurses. My doctors did not object because I

provided them a list of all of the mineral, vitamin, and chemical components of Noni, which showed nothing objectionable. They deemed me to be in the best of health, especially for someone with a history of 37 years of diabetes and kidney failure, which I attribute, of course, to Noni.

My doctors in Minneapolis have run blood tests 3 times a week for 2 months, 2 times a week for 2 months, once a week, once every 2 weeks, etc. Now I go for labs only once a month. According to the doctors, my blood levels for kidney function and blood sugars are the closest to normal of the more than 5,000 patients they have followed. The only difference between them and me is Noni.

It is now 14 months since my dual transplant. I continue to take Noni daily, only a minimal dose now (4-6 oz.), every day. I feel great, and every day I feel better, thanks to Noni and modern medicine. I owe my life to both.

“I thank God for the healing effect of Noni...”

—Submitted by Vivian Handley

Noni has had a positive impact on my health. I am a Type II diabetic. My last blood work at my medical clinic showed my blood sugar had averaged 116 for the past 3 months. That's a great improvement from the high readings I had previous to taking Noni. I am now able to take less insulin.

My leg which had been badly affected by neuropathy (a

complication from the diabetes) greatly improved the first few weeks after I started to drink this wonderful product.

I started taking Noni in September when I was in the midst of chemotherapy due to breast cancer. To my surprise I never lost all of my hair. In fact, by the time I finished the chemo treatments, I had new hair coming

in where it had come out previous to my starting to drink Noni.

My doctor recently was able to cut back on the amount of thyroid medication that I take. Also, he cut my prednisone dosage back that I need to take for asthma as my breathing has improved.

I thank God for the healing effect of Noni.

“I can feel my feet again. I have reduced the amount of insulin...”

—Submitted by Ernie and Janet Perschau

I have been a diabetic for 46 years and had poor feeling and circulation in my hands and feet.

This has improved very much. I can feel my feet again. I have reduced the amount of insulin intake also.

I had surgery on my shoulders 5 years ago and never did recover the movement in my arms and shoulders. I couldn't raise my

arms and had pain whenever I did any hard work. The doctor said I had scar tissue.

This has all improved as I am back in the barn doing milking and can reach pipeline again and do all the other hard work on the farm in the barn with dairy cows. I have more energy and just feel so much better.

Ernie started using Noni after my improvement. After taking it for a couple of months, the results he noticed were no more backaches, muscle cramps, snoring is not so loud or else not at all. Now if he does do something to give him a backache, we rub his back with Noni supplement and its better in no time.

“About three months later I could see out of one eye...”

—Submitted by a Diabetic

I have diabetes which affected my eyes to the point that I went blind. I had laser surgeries that did not solve the problem.

I was introduced to Noni nearly a year ago. I started taking three ounces a day and about three

months later I could see out of one eye. To this day, I have continued to have sight in this eye. I have not begun to see out of the other eye yet, but do not have the pain in it that I always had. Last week

the doctor said that my eye looked just fine.

Also, I can read fine print without glasses, where as I could not before, even when wearing my glasses. I am continuing my daily intake of Noni.

“In 3 weeks of taking Noni every day, my insulin was cut in half...”

—Submitted by Ruth Close

Celebrate! Celebrate! That is how I feel every day since I was introduced to Noni a year ago.

I am an insulin dependent diabetic for 16 years. I had tried every alternative trying to find something that would help me feel better and be able to take less insulin.

In 3 weeks of taking Noni every day my insulin was cut in half. I had so much energy; leg cramps were gone, and I was sleeping much better at night. It was hard to believe the results, but it made a real difference in my health status.

One of the things diabetics worry about is burns and cuts. I

had put my hand on the stove which I thought I had turned off. Screaming in pain I quickly poured some Noni on the dishcloth and held it on the palm of my hand. In 11 seconds (I counted) the pain was gone! My hand did not blister, drain or hurt the rest of the evening. In the morning I looked, and all I could see was a reddened area, and that disappeared in another 24 hours.

That is truly amazing for a diabetic. Having taken it faithfully for a year I noticed other differences – my hair is growing faster and becoming thicker; my finger nails are growing stronger and are not breaking off.

This past winter we were in Zimbabwe, Africa, doing medical mission work and visiting mission stations. I took my Noni with me and remained healthy the entire time. I wish Zimbabwe was one of the countries that Noni was going into to be distributed in because the aids virus is killing babies, mothers, and fathers by the thousands. TB is everywhere because it is a secondary infection of aids.

As a registered nurse for 30 years, it was hard for me to believe that several ounces of Noni a day could change my life in such a dramatic way. After having major surgery on September 30th

and healing up so fast the words the medical doctors used were:

"amazing, unbelievable, incredible!" What can I say but

"Thank you, Noni for bringing this to me."

“Within a week of taking Noni, my blood sugar had gone down to 120...”

—Submitted by G. Wilson

I'm borderline diabetic, I've been overweight a large portion of my life, and consequently, I have arthritic knees, they're completely blown out, and I also have other health problems with pain and a lot of other things of this nature.

When I started taking Noni, the first thing I noticed, not right off, but within two days, a lot of the pain in my knees from the arthritis

had subsided. It's remarkable how quick the pain goes away, and there's no longer any pain from protecting my knees and back.

One of the things that I was really tickled about, is that before I took Noni, my blood sugar was up around 190 to 220, and it stayed there. Because of that, sometimes I'd have a heart flutter, and if the

heart speeds up I have to do all kinds of things to slow it down.

Well, within about a week of taking Noni, my blood sugar had gone down to 120, and it's been as low as 110, and that was remarkable to me.

I'm really impressed with this product, it's a very unique product, and I've got all of my family on it, and it has remarkable results.

“I awoke to the fact that I was now able to sleep all night on the same side without pain...”

—Submitted by Tom Bender

I am a seventy-four year old who has been a diabetic for over thirty-five years. I have experienced the usual problems that come with age and diabetes.

Several years ago, I had two back operations within a six-month period. The problems that necessitated the second operation seriously weakened the muscles in my right leg. After that operation, I began walking with a walker. I eventually graduated to a cane and was able to limp around without the cane, although I felt more comfortable with it, especially when my arthritic right knee would act up.

I started taking Noni, one ounce per day, around the first of

November. At first I noticed little or no difference.

Since my back operations, I had been sleeping on my side. The problem with this was that about every two hours the pain in my arthritic shoulder would wake me up, and I would have to roll over to my other side. One day I awoke to the fact that I was now able to sleep all night on the same side without pain!

About the same time I began to realize that after getting out of bed or up from a chair I had to take fewer faltering steps before I could move at my slow pace. Today I am able to get out of bed or up from a chair and move off with relative ease. I find that my

mobility is improving almost daily. In addition to the increased mobility, I find that I have little short lived or no body pain whatsoever.

Other good things continue to happen. Foot care is very critical for diabetics. The pulse in my feet has always been relatively strong, but I have been losing the feeling in my feet over the years. Again a realization occurred; I was beginning to feel the insoles of my shoes and the carpet when walking barefooted with my feet. At the same time my leg cramps at night began to subside.

“Almost immediately I felt I had more energy...”

—Submitted by Ren P. Smith

I Have been a type one diabetic since I was a teenager,

and had my first two kidney transplants 12 years ago.

I would like to tell you what Noni has done for me. I started taking Noni Saturday, September

14th. Almost immediately I felt I had more energy. I was sleeping less at night, my sleep was more restful and I had more energy during the day.

I had not experienced a temperature or touch sensation in my feet for more than 15 years because of neuropathy.

After taking Noni for three days I felt the coldness in my feet and I could also feel the carpet and tile floors in my home.

I have had arthritis in my hands for the past few years, which has been getting worse. The swelling in my fingers has gone down and the redness around my joints has disappeared. I am not

experiencing pain from the arthritis and I can even open jars again.

I have blood work done regularly because of my transplants. For the first time in more than 12 years my creatinine level is normal. The doctors determine how your transplant is doing by creatinine level in your blood. All other levels that they test are also excellent and have not been this good since before my transplant.

The other thing I do on a regular basis is take my blood pressure. Because I have high blood pressure I have been on medication for a number of years. The first part of November I

noticed my blood pressure was getting to low (98/56) and I was getting lightheaded. I decided to stop taking one of my blood pressure medications, Procardia.

Within a few weeks my blood pressure was still to low and I stopped taking all my blood pressure medication since the first of November. Now my blood pressure readings are 120/78.

The only thing I am doing differently is drinking Noni. I am excited to be feeling so much better and I am thankful to the people that introduced me to Noni. Thank you.

“I was very frustrated and saw little hope for me to ever improve...”

—Submitted by Dr. Gregory A. Lewis, D.V.M.

Noni actually saved my life. I am 51 years old, a veterinarian for the past 29 years, and thought things were going great. I was diagnosed with adult onset diabetes about three years ago, along with high blood pressure and high cholesterol. as I had been trained in the ways of traditional medicine in preparation for a career in veterinary medicine, I followed the treatment protocols outlined by my physician for the next three years. well, needless to say, I had little if any improvement at all, had some lingering side effects from the medication itself, despite a myriad of changes in dose schedules and substitute medications, and I was

very frustrated and saw little hope for me to ever improve.

I was introduced to Noni by a lady who has since become my fiancée, and it changed my life. I began taking an ounce in the mornings and an ounce in the evenings and in about ninety days, I was within normal ranges for blood glucose, blood pressure, and cholesterol. I was astounded and so happy, I ditched my medications and have maintained my normal values.

I had also injured my back a year earlier and felt that it was an obvious disc protrusion due to the severe pain and motor dysfunctions I experienced. However, I knew a trip to the doctor would result in cat scans,

MRIs and the like, and probably a trip to the orthopedic surgeon, neurosurgeon. Knowing what I know about post-op neurosurgery in back cases, I looked for help outside the box so to speak. turned to massage therapy, acupuncture, and chiropractic, all of which failed to ease my terrible pain and alleviate my clinical signs of nerve dysfunction.

When I started taking Noni for my other problems, I was amazed how fast my back pain started to diminish. In only three months, I was pain free again, and couldn't believe it.

I know it was Noni that saved me from surgery and will never be without it again

“After she had taken a bottle and a half, the sores had totally cleared up...”

—Submitted by Pharmacist Allan Bailey

[Allan Bailey has been a pharmacist since 1990. He is also a master herbalist, a certified iridologist (one who studies the

color, markings, and changes in the iris to detect disease), and a natural health counselor.]

I'm a naturopathic pharmacist who counsels people about natural health. I try to teach my

clients to maintain better level of health and minimize their need for drugs and surgery by using natural products.

Whenever I travel to foreign countries, I try to talk to the local healers about their remedies. I first learned about Noni on a visit to French Polynesia. The Polynesian healers referred to Noni as one of the most important plants they used in their herbal therapies. One researcher in French Polynesia, who'd studied the uses of over three hundred herbs, felt that Noni was one of the most vital healing plants.

I took some Noni home with me and began to drink it regularly. It helped me get more restful sleep, so I felt energized and refreshed when I woke up. I noticed that I could do more during the day than I had in the past, because Noni gave me added energy and endurance.

I decided to give Noni to my diabetic mother. She had tiny sores all over her arms and legs that had not responded to any treatment for three years. I had her take a tablespoonful of Noni three times a day. After she had taken a bottle and a half, the sores had totally cleared up. Noni also gave her more energy and more enthusiasm to exercise, which helped her control her blood sugar.

I have a close friend whose arms had been wasting away and had violent arm and leg twitches. After two weeks of drinking Noni, he called to tell me, "On the seventh day of drinking that Noni you suggested, I didn't have any twitches and I haven't had any since then. I'm starting to feel more strength in my arms." That was six months ago, and he's continuing to improve. Noni has done so much good in my family

that I decided to recommend it to my clients.

One man had an ulceration on his leg that was prone to erupting. The skin around the ulcer was itchy and irritated. After he drank the Noni and applied it topically for a few weeks, the ulcer was completely healed and surrounding area didn't bother him anymore.

Now the circulation and color are coming back. He still soaks a bandage in Noni and wears it on the spot where the ulcer was, just to make sure Noni's always working on the area. Noni has generated more calls from clients about its benefits than any other product I have ever recommended. On a daily basis I see people who have benefited from it amazingly.

"It will have far-reaching and dramatic effects on your health..."

—Submitted by Dr. Robert L. Bodin, D.D.S.

I have found a health product that I would like to introduce to you. I believe it will have far-reaching and dramatic effects on your health. The product is from the virgin forests of Tahiti and is made from a fruit that has been used for its medicinal value in that area for thousands of years.

I have introduced several friends, patients and relatives to

Noni and they have had beneficial results. We have had personal reports from friends that range from eliminating cold sores on our daughter-in-law and other patients in less than a day, to increased concentration of children at school; thus, resulting in grade increases on projects and papers.

Several of the women that have taken it have reported less

severe menstrual cramps, elimination of headaches and an overall aid in eliminating the intensity of many other problems on the list of potential uses. The people engaged in heavy work and/or sports have had decreases in stiffness and other maladies from such activities.

"There is sufficient research data to substantiate this product's validity..."

—Submitted by Dr. Maria Odgbaro, M.D.

I am a graduate of the City University of New York Medical School. While training at Waterbury Hospital in Connecticut, my husband, who was an Education Administrator for the New York City Board of

Education, was diagnosed with liver cancer. I gathered information on all the clinical trials going on in the Tri-state area on liver cancer, however we ended up at the Cooper University Teaching Hospital in Camden

New Jersey with Dr. Order – an authority on liver cancer. Ten weeks later my husband died. It was this tragedy that sparked my interest in alternative medicine. If I had the information I have now, my husband might still be alive.

I have been on several radio and television stations such as WLIB, WHBA, WWRL and Manhattan Cable, during which I appealed to medical schools to start including the natural approach in their training and expand their curriculum to include more courses in nutrition. I am constantly invited to give lectures on Alternative Medicine at colleges, community centers and churches. The Harlem State Health, Holistic Health Watch and the Natural Way Health for the Community are a few of the places I have been invited to speak at.

In my experience with different natural products, Noni tops them all! Patients are faxing in their testimonials everyday. They are reporting results of relief from a variety of conditions such as diabetes, high blood pressure, persistent coughs, asthma, cancer, chronic fatigue syndrome, and arthritis to name a few.

I particularly like the mechanism by which Noni works. It stimulates and boost the body's immune system therefore enabling it to heal itself. If anyone asks their physician whether or not they should use Noni, and they reply "NO," please contact me because

the doctors ignorance does not account for your health. There is sufficient research data to substantiate this product's validity.

As I pointed out earlier, in medical schools we are not taught very much about nutrition and herbs. My suggestion is to be open and try something new, especially when the old conventional ways are not working for you.

I would recommend Noni to anyone. Even those who are healthy for a general health tonic. An ounce of prevention is worth a TON of treatments!

“Fifteen of my patients with chronic back pain found that Noni completely relieved their pain...”

—Submitted by Dr. Bryant Bloss, M.D.

[Dr. Bloss is an orthopedic surgeon certified by the American Board of Orthopedic Surgery. He graduated cum laude in pre-med from Georgetown College in Kentucky and received his medical degree from the University of Louisville. Dr. Bloss served as the team physician for a number of sports teams in Indiana. He has had a surgical practice in Evansville, Indiana, for thirty-four years.]

Although I primarily practice conservative orthopedics, I am heavily involved in research on arthritis. My brother developed rheumatoid arthritis in college, so I am always interested in any new information on the subject.

My neighbor brought over the first HEALTH NEWS edition on Noni, but I passed it off for two months. When I finally got around to reading it, I saw the article on

arthritis and thought, "Hmm, maybe there's something to it."

Before I used Noni in my practice, I tried it myself and had a lot of personal success with it. I used to be unable to sleep on my stomach because of back pain. Noni has also increased my energy level. My opponents on the tennis court have noticed that my reaction time is much faster.

Since then I have used Noni on seventy of my patients. Fifteen of my patients with chronic back pain found that Noni completely relieved their pain. Eight other patients had knee pain from osteoarthritis until Noni made their pain virtually disappear. Several of my patients with type II diabetes lowered their blood sugar with Noni.

One diabetic patient with chronic back pain found that for the first time in fifteen years, he

could bend over and pick up balls on the tennis court. He could also golf again without always being laid up afterward. The other day he told me that he'd had a case of Bell's palsy. His family physician had told him he'd be laid up for six weeks with a patch on his swollen eye, but he doubled the amount of Noni he was taking and in three days all his symptoms were gone.

Three of my asthma patients experienced dramatic improvements in their asthma coughs after using Noni.

I've been especially aware of the improvements in the lives of my arthritis patients. Many of them have had significant results. Two people, including a patient and a physician, have called to say that Noni took away the stiffness in their hands within twenty-four hours.

“I have seen incredible results in my patients and others who use Noni...”

—Submitted by Dr. Delbert Hatton, D.C.

[Dr. Delbert Hatton, D.C., earned his doctor of chiropractic degree from Palmer College of Chiropractic. He also has a bachelor's degree in biology.]

For about forty years, I had a constant nagging ache in my lower back from unevenly formed vertebrae. The pain prevented me from doing normal household activities. After only six weeks of taking Noni, the pain disappeared.

I began recommending Noni to my patients last fall. Since then I have had nothing but success with it. The most amazing situation I

know of is a woman with AIDS. Since she has been drinking Noni, her T-cell count has gone from 169 to 400 and her symptoms have stabilized. I also have a relative with lung cancer whose tumors have decreased in size since he's been taking Noni.

Several years ago, a patient of mine was traumatically injured in an auto accident. He broke several ribs, his shoulder, and his knee. Since then he's had a lot of problems with arthritis, especially in his knee. When he started using Noni, the pain in his knee went away immediately and he had a

gradual decrease in the pain in his ribs and shoulder. Now he is a happy, pain-free man.

One patient had broken the bones in her ankle and had lingering pain and swelling in the injury for a year and a half. Only ten days after she started taking Noni, the pain and swelling were gone.

I attribute this to the Noni fruit's ability to open up the cell wall, allowing nutrients to be absorbed and waste material to dissipate from diseased or damaged cells.

“Not only does Noni provide many benefits on its own, it also increases the effectiveness of other treatments...”

—Submitted by Dr. Steven M. Hall, M.D.

[Dr. Hall is a board certified in family practice. He attended medical school at the University of Utah and completed his residency in Saginaw, Michigan. For two and a half years, Dr. Hall was the only doctor in a small town in Maine. Since 1991 he has had his own practice in wellness medicine.]

Since completing my residency I've thought a lot about what true health and wellness mean. Over the years I've studied several philosophies that have led me to where I am today — practicing alternative, or wellness, medicine.

I treat people with chronic conditions like chemical sensitivity, chronic fatigue syndrome, and chronic pain. These patients have had no success with traditional treatments.

I have found these are the kinds of conditions that Noni helps

the most. Not only does Noni provide many benefits on its own, it also increases the effectiveness of other treatments.

The major key to Noni's effectiveness is that it contains significant amounts of proxeronine, which becomes xeronine when ingested. Xeronine is important because it helps the body turn enzymes on and off.

Trying to operate your body's enzymes without xeronine is like driving a car with a sloppy link in the steering column — your steering is sluggish and it's difficult to control the car. If your body has enough xeronine, it's like having the tight, precise steering of a race car.

Anything that improves enzymes activity has wide-ranging effects, because all of your body's functions depend on enzymes.

Some of the best results I've seen with Noni were in patients with inflammation problems such as arthritis, tendonitis, bursitis, or carpal tunnel. In our culture, the kind of diet we eat makes it easy for our bodies to turn on the inflammatory process.

Thirty to forty percent of the calories we get are from sugar, which means that we are, by definition, malnourished. This makes it hard for our bodies to regulate themselves. I think Noni helps the body regulate itself and control the inflammatory process.

Noni is incredible because it offers help to people who could not be helped by traditional medical science. Instead of giving people the standard vitamin and mineral supplements, we can help their bodies reach another level of cellular and molecular regulation.

I've personally had debilitating back pain for over ten years. I have three degenerative discs and a large Schmorl's node on the anterior edge of L2 with osteophyte formation. I've tried everything I could think of: Chiropractic, Hellerwork, Naturopathy, Yoga, acupuncture, aerobics, massage, dialoguing...all with slowly progressive worsening of my pain. Three weeks on Noni and the pain and spasms were gone. I could get out of bed without 20 minutes of stretching, pick up my six year old again, chop and load firewood...the list goes on. I feel like I have a second chance at life.

In the last 4 months, using Noni on select patients in my practice, here is just a sampling of what I've seen:

A 35 y/o male with high pressure job and stressful personal life with exhausted

adrenals, multiple food and environmental sensitivities, fatigue, mental illness. We'd already been treating for months with diet, DHEA, seriphos, CranioSacral therapy and counseling...all with marginal results. Adding Noni to his regimen, in a matter of weeks his fatigue was gone, his mind clear and he could liberalize his diet without adverse consequences.

A 75 y/o male with metastatic prostate cancer, most recent PSA of 56, added Noni to his conventional treatment regimen and within two weeks, his PSA was 1.1.

A 63 y/o female, three years ago recovered from 15 year bout with Chronic Fatigue Syndrome, experienced a relapse in August following a viral infection. She added Noni to all of the natural things she had been doing for the previous two months and within 5

days was 90% better. She is now essentially back in remission.

A 38 y/o female with migraine headaches with every menstrual period her entire life, had tried Oriental Medicine, cranial osteopathy, Hellerwork, hypnosis all without relief. She has now had four periods in a row without a headache.

Three teenagers with severe acne have completely cleared and been able to stop their antibiotics.

A 19 y/o female with 18 months of Mono-like syndrome-fatigue, night sweats, aching. She had to quit college, quit her job, and move back home. One week on Noni and she was better.

This list could go on and on. This product is so helpful to so many that I strongly encourage you to try it and let the product speak for itself. I'd be willing to bet that you'll be glad you did!

“After being on Noni for three days, she threw her cane away, got up from a sofa, and ran across the room without pain...”

—Submitted by Dr. Mona Harrison, M.D.

[Dr. Harrison received her degree from the University of Maryland and went on to become the assistant dean of Boston University School of Medicine. As chief medical officer for D.C. General Hospital, she directed the trauma center, emergency center, and outpatient services. She currently specializes in pediatrics and family medicine.]

As a doctor, I find it necessary to stay current with the alternative medical products on the market. I have to know what effects they may have on my patients.

I learned about Noni a few months ago from one of my staff members. After two weeks on Noni, she had experienced dramatic results, including the

virtual elimination of her varicose veins and a long-term digestive problem.

I sent several bottles to patients around the country. I told them to try Noni, but didn't let them know there was anything extraordinary about it. The following results have been documented by other physicians and are not just my own observations.

One of my patients was suffering from kidney cancer with metastases, or the movement of malignant cells, to her lung and brain. She had been given only two weeks to live. Within that two-week period, she took Noni and it cleared up her lung lesions. That was back in November (1996) and she is still with us.

Another patient who had positive results with Noni was a woman with degenerative arthritis who'd been in pain for approximately twenty years. She'd had knee replacements in 1990, but that didn't solve the problem. She had to walk with a cane and had a hard time getting up from a sitting position.

After being on Noni for three days, she was able to throw her cane away, get up from a sofa, and run most of the way across the room without pain. She knew that Noni had done it, because it was the only thing she had changed in her life.

Another patient who had liver cancer and a swelling of fluid in the abdominal area. After seven

days on Noni this acidic fluid cleared up completely.

She had the first case I mentioned were terminally ill cancer patients who no one anticipated would make it, but they are alive today because of Noni.

I also had a patient with macular degeneration, a dark spot on the back of her eye, who was helped by Noni. Her vision had deteriorated so much that she was essentially blind. She'd been to some of the best ophthalmologists and top medical centers, but they hadn't been able to help her.

After two and a half weeks on Noni, her ophthalmologist documented that there was a regeneration of cells to replace the ones that had deteriorated.

Another woman had a cyst on the back of her neck. She had felt it under the skin for months. Noni was able to draw the cyst out to the point that it could be lanced and removed without a problem.

Noni also dramatically improves high blood pressure. One woman's blood pressure was

170/100 and we could not budge it. After two months on Noni, it's 130/80.

All of these results stem from Noni's enhancement of the activities of the pineal gland. This vital gland is where serotonin is produced, from which melatonin is synthesized. Melatonin helps regulate sleep, mood, puberty, and ovarian cycles.

In the brain, serotonin and melatonin affect conditions multiple sclerosis. With MS, a pigmented area in the brain called the *substantia nigra* is missing some of the needed pigment. Noni restores this chemical material to the brain, causing a favorable response in people with MS.

There are serotonin receptors in the digestive tract as well, so Noni can improve digestion. Noni also balances the body's pH levels, which affect one's ability to absorb minerals and vitamins.

Noni enhances the function of the thyroid and thymus glands, helping to ward off infections and other problems with the immune

system. It can even reverse depression, because it allows neural hormones to work. Noni helps the pancreas to balance blood sugar. Women who drink Noni have fewer cramps, and men who drink Noni have less swelling in their prostate.

Noni basically enhances whatever medical treatment a patient is receiving. I've spoken to ancient healers in Hawaii who consider this to be a sacred fruit and they aren't at all surprised by the incredible medical results we've had with Noni.

The modern world of medicine is finally starting to catch up to the knowledge of ancient times. We now have the equipment necessary to evaluate what it is about the Noni plant that allows it to cause such dramatic improvement in so many areas of the body. Noni, an ancient remedy, is finally being validated by breakthroughs in modern technology.

“Noni is the only holistic health product I use in my practice...”

—Submitted by Dr. Samuel Kolodney, D.C.

[Dr. Kolodney is a doctor of chiropractic medicine in Pennsylvania.]

Drinking Noni has strengthened my entire body. It helps wake me in the morning after my son has kept me up most of the night. With Noni my eyes open right up and I'm ready for the day. Noni even cured my athlete's foot.

Noni has been great benefit to my patients with arthritis. After three weeks on Noni, one woman's arthritic pain completely went away. Another man had such severe arthritis he couldn't even pick up a pen, but after a month on Noni he was able to grasp objects easily again.

Noni is the only holistic health product I use in my practice. There are few products that are as

generally beneficial as Noni – that's why I recommend it.

I prefer to focus on health and bring my patient to the consciousness that they can help themselves feel better. Noni helps them do this because it improves the entire spectrum of health, not just a single problem. Noni helps you body generate life force and revives your body's natural ability to heal itself.

“I used it myself and gave it to my son without telling anyone...”

—Submitted by Dr. Richard Picks

[Dr. Richard Picks received a degree in naturopathy from Bernadean University. He currently works as an educator, speaking on motivational and nutritional topics throughout the United States and Canada.]

I am involved with natural health care primarily because of my son. He has a bone disease and a special kind of arthritis that confine him to a wheelchair. My son has been in a tremendous pain since he was very young. As

I've looked for answers to help him, I've found answers for thousands of people.

Noni sparked my interest because of its reputation for massive pain relief. In the natural health care field, we face the challenge of not being able to do much for a patient who has moved into an acute or degenerative stage of pain. When I heard about Noni from a friend, I decided to do my own detective work on it. For eight months I used it myself and gave it to my son without telling

anyone. My son's pain dissipated until it was almost gone.

Noni is effective because it helps cells massively regenerate. Once this regeneration goes into effect, people really start to reap the benefits.

Another exciting thing about Noni is the delivery system. Since it's a liquid and not another pill, it's very easy to take, both psychologically and physically. Noni fits into everyone's lifestyle.

“It would be severe enough to put me in bed for several days...”

—Submitted by Kim

For several years prior to my marriage I had dealt with significant cramping prior to my menstrual cycle. Shortly after getting married seven years ago the problem escalated to the point that at times it would be severe enough to put me in bed for

several days. The doctor eventually diagnosed the problem as endometriosis. The medication that was prescribed provided some relief, but the problem never really went away. My parents introduced me to Noni and I started drinking a couple of

ounces a day. Two weeks after starting Noni I was due for another period. To my surprise and gratitude I didn't have the usual symptoms and for the first time in a long time I had a normal experience. Thank you Noni.

“This product is what I have been praying for...”

—Submitted by Christie Welch

I first found out that I had endometriosis back in 1991. I had a laparoscopy and had the endo lasered off. My Dr. told me to get pregnant to help get rid of the endo she could not get rid of, due to where it was located. I got pregnant within 3 weeks. The endo pain got really bad again in 2000. I had another lab. The Dr. said that it is growing under the top layer of skin in my abdominal cavity, and that they can't see it to laser it! She advised me to get pregnant again!! I'm thinking there

has to be something else to get rid of this pain besides pregnancy!! I got a call from Leigh about Noni. We talked for 2 hours!! I was so excited but a little skeptical about the product. I did not ask Leigh if the product had ever helped anyone with endo, just to make SURE that the power of suggestion wasn't going to interfere with my experience of the Noni. I got my bottle of Noni, and took the first dose and have had NO PAIN in my lower left abdomen since!!! Before Noni, I

was taking 1,600-2,400 milligrams of ibuprofen a day to try to get rid of the pain, and some days, the pain would NOT go away even WITH the ibuprofen!! I was lucky if I had 5 days out of a month with NO PAIN on the ibuprofen!! This product is what I have been praying for!! I am so grateful that I decided to try Noni!! I can do my housework without pain, I don't have to lie in bed with a heating pad on my abdomen for days at a time, I feel GREAT!!!!!!

“My energy, clarity of mind, and excitement for life just skyrocketed...”

—Submitted by Joanne Pharo

In 1977, after giving birth to our twin girls, I was so very tired. Seemed natural to be at the time, except it never went away. It was the beginning of 25 years of chronic fatigue syndrome, (which didn't "exist" at that time) and that wasn't all. Within a short period of time, I developed severe allergies; food, inhalants, chemicals, odors, and drug sensitivities. Asthma, hypothermia-fevers, panic attacks, major mood swings, and of course; depression. Over the years, I've also had blood poison a few times, as well as cellulitis, breast cancer, and fibromyalgia. Of course, all of these things have their own variety of symptoms as well. Doctors, tests, medicines, alternative therapies, diets, and supplements were many and costly. Some helped, most didn't. Few helped very much or for long. We even moved a few times trying to get away from mold, and other major allergens, which so stressed my body, it would trigger the CFS, leaving me incapacitated. I would be in bed or on the couch, in such a fog and pain, days on end, not even being able to concentrate to read or watch TV. So desiring to sleep, yet often not able to even doze off. It was a major effort just to get a shower each day, totally wearing me out. Eventually I was able to find ways to keep certain stresses from triggering a lot of

symptoms. Some stresses are totally unavoidable; weather changes, or hormone changes, etc. It sure is a tight rope walk, and balance is easily lost.

This past year, my pain and weakness in my limbs, was getting worse. I discovered that CFS was nearly identical to post-polio syndrome, which eventually can disable a person to the point of a wheelchair, if they don't strictly reserve energy. Both conditions also can show damage to the reticular area of the brain, which explains why multi-system failure happens. I reluctantly gave in and received a handicapped parking placard (the beginning of July 2002), so as not to use up my energy in a parking lot, on days I was able to venture out at all.

By God's grace only have I survived all of this, with family and friends support. Only by His grace did I discover Noni from French Polynesia the end of July 2002! I started drinking only a tiny amount, since I was so allergic to many things, including many fruit acids. But praise be to God, I wasn't allergic! So I went up to 2 ounces 3 times a day fairly quickly. Within 3 weeks—all pain and weakness in my limbs was gone! My energy, clarity of mind, and excitement for life just sky rocketed! I was even sleeping much better.

By the end of 1 month, I realized my G.E.R.D. (gastro esophageal reflux disease) was gone, and after years of expensive daily prescribed medicine; no longer needed. For about 9 years I also used nystatin for Candida, which made my tongue white, and often with inflamed, red welts, making my tongue very sore, especially when mold is high. Disappeared! Allergies are getting better, and using less medicine for that, as well as asthma is so much better. I have found on high stress days, (allergy, weather, etc.) I will put 1/4 ounce of Noni under my tongue every hour or so. It really helps tremendously to get me through those times, so stress won't trigger a CFS or fibromyalgia episode.

Noni has also done wonders for my Dad. He has suffered with headaches for 50 years. They are the kind that make him feel anxious and nervous. Since he's been drinking Noni, from Tahiti, he said he's had whole weeks go by without a headache at all! I asked, "when was the last time he could remember having no headache?" He replied, "It's been 50 years!" He's nearly 82, and somehow, I don't think he's going to be giving up his Noni!

Noni has been such a wonderful answer to many peoples' prayers.

“Something as simple as peeling potatoes would cause pain for days...”

—Submitted by Sharon Crandall

I have had what was diagnosed as Chronic Fatigue Syndrome and Fibromyalgia for six years. Fibromyalgia is like

arthritis, only in the muscle. The symptoms are worse with physical exercise or activity. Something as simple as peeling potatoes can

cause two days of pain. Pain is often delayed one or two days after the activity.

Some doctors think that since the magnesium levels are usually low in fibromyalgia patients, the muscles actually tear. Muscles can tear in athletes with lack of stretching and over-activity, but this is way beyond normal and stretching also causes delayed pain.

Most patients also have sleeping disorder, as the muscles don't relax enough to let you sleep properly. For many patients, numerous nights are spent rocking back and forth in pain for hours, before getting a few hours of fitful sleep.

The last six years have been spent doing what little work I could do out of my home. Much of the time was spent on relative's couches when unable to work at all. A little over two years ago I went to a chiropractor who gave me some nutritional products for 12 weeks. My energy level started to increase, but none of the pain subsided.

I dreaded bending over to pick anything up or get something out of the cupboard or refrigerator. I usually waited for my daughter to do it for me. It was painful for me to get out of a chair or get in and out of the car. I could manage to do dishes and maybe go to the store for a few things, as my total activity out of my chair.

I dreaded walking very far, because of the pain, and if I couldn't find a close parking space, I would give up and go home. If I was going to have to walk very far in a big store I could get an electric cart. My daughter

sometimes wanted me to shop with her. In order to do that we would rent a wheelchair from the mall.

I often could not sit all the way through church. It was a painful event to go to a movie. If I went to a family gathering, after being there an hour or so, I couldn't wait to get home and sit down. My underlying energy level was quite good, but pain wears you out quickly, and all you want to do is get where you can lie down or recline in a soft chair.

It would usually take a full day or two to recover from traveling any distance.

I started Noni at the end of September, and at the end of my first week I felt my movement was more free. I didn't walk so haltingly, and could move about easier.

Then I made a trip to Utah for my son's wedding, and I noticed it did not take me long to recover from that trip. I helped do some cooking for the wedding which was still painful, but my recovery time seemed less. I was off Noni for a few days but on the way back to Phoenix, I opened another bottle. I could tell that it helped make the trip much easier. I felt it was really worth pursuing it further.

I continued to improve. I started sleeping better, taking less ibuprofen. I noticed it was easier to bend over. I mopped the bathroom and had much less repercussion from it. As I continued through the month I started to think about what I

wanted to do with my life, instead of how to get through the day.

At the end of being on it for two months, it really started kicking in. I am in my third month now and I am amazed at what I did over Thanksgiving. The day before, I baked a turkey, made dressing from scratch, made gravy, cooked and mashed potatoes, peeled yams, made a yam dish, went to the store and chauffeured my daughter to school, to work and back.

I was bending over and putting things in and out of cupboards and the refrigerator, doing dishes, etc. On Thanksgiving, we went to my sister's for dinner at 1:00, stayed and played games until into the evening. My nap was to fall asleep in my chair for a few minutes. The next day, I went to Prescott and Sedona with my family. We did some shopping at several stores, drove around to see the sights, etc., and got home at 12:30 that night. My nap was about 15 minutes in the car sitting up. All this three days in a row!!

After being on the product for about a month, both my daughters independently commented on how I now have life in my face that wasn't there before. I look forward to continued improvement.

Since Noni also enhances anything else you are taking, if I have pain at night now I just take some Noni or some calcium/magnesium tablets, which now work beautifully to relax me and get me right back to sleep.

"I am very thankful for a divine product coming into my life..."

—Submitted by *Unnamed*

I am 34 years old. I had all the worst symptoms that comes along with fibroid tumors. For the severe cramps I needed 220 mg naproxen tablets just to get

through the day. Because of heavy flowing I could barely go out of the house. The flowing extended sometimes over 20 days. I was very anemic and tired

all the time and experienced bad PMS.

I am very thankful for a divine product coming into my life called Noni that has helped to

tremendously change my life. I now have a normal cycle, no severe cramps, and I do not take

even the mild meds. I no longer have heavy flowing & PMS. I am continuing to saturate with Noni to

help with reduction & dissolving tumors.

“Where there was despair, there is hope for a normal future...”

—Submitted by Joy Sawyer

After surgery 4 yrs ago, I developed an M.R.S.A. infection which I think caused my fibromyalgia and chronic fatigue. Fibromyalgia and chronic fatigue are worse than a death sentence because you are in pain 24/7 (morphine took the edge off but never got rid of the pain completely). You are constantly tired, with the inability to fall asleep without medication, or to stay asleep once you finally did fall asleep. Your body can't repair itself without regenerative sleep. I suffered from depression, also had osteoarthritis, 2 heel spurs, both rotator cuffs were badly damaged and I even developed tennis elbow.

My day usually consisted of: getting up at 8:00AM, when I took my pain medication and going back to bed until the pain subsided enough that I could get up and eat breakfast which is usually between 9 and 10 AM. By the time I showered and got dressed it was about 12 or 1 PM. On a good day I was able to sew, do some painting in bed, work on my computer for an hour or two, or read a book. Then, with a little luck, because by the afternoon, my legs were so swollen that it was sometimes unbearable, I could sometimes make dinner if I sat while I prepare the meal. At between 6 and 7 PM we ate dinner, most of the time in bed, because my legs were so sore that I had to have them up. Still from bed, I crocheted or sewed if my hands were not too sore, while watching T.V. or read until the sleeping pill allows me to finally drift to sleep. There were days I

could barely get out of bed to go to the bathroom because the pain is so intense. I went to the pool for exercise classes when I could manage to move well enough to get there, which was seldom. The pain was so bad that for a while I had to use a walker and got a handicapped parking permit. I did buy the groceries most of the time because I could walk if I used a cart but someone usually brought the bags into the house and helped put the food away.

I could no longer do the things I love to do such as garden, walk our dogs, or for that matter walk around the block! I could not take care of my home and family anymore. Most of my family is in Montreal where I was unable to visit because the pain of traveling that distance put me to bed for 3 days after each way. I no longer attended church. I missed too many classes because of pain that I quit going to the arthritis pool class. Loud noise, hot and cold, bright light and even touch became a problem. Going to a movie in a theater was out of the question because the volume was too loud. Bright light caused headaches. I could no longer take a hot bath or shower or use our hot tub, the water was too hot. Being touched, if the touch was a little firm, hurt me. In short, these disorders ruled my whole life.

I met a lady who gave me some Moducare capsules so I figured that I had nothing to lose! I was hesitant to try this treatment because I was not a believer in natural medicine and thought it too expensive for something I thought might not work. After about 10

days, I started to notice little things that I could do that I hadn't been able to do for over 3 yrs. Because Moducare seemed to have alleviated some of my pain, I was able to reduce my morphine from 60 mgs. per day to 40.

My friend, Pat, told me about Noni. I was still a disbeliever in anything that didn't come from a pharmacy but she convinced me to try it. She called me every day to check up on me and after a month, I told her that it wasn't working, my pain was worse and stopped taking it. She said I was just detoxifying and to persevere. I said no way, forget it, it's too hard, I can't deal with the pain. Within about a week I called her back asking for more Noni because the pain was even worse. It took 4 months of taking 2 oz. Morning and 2 oz. at night but thanks to Noni and Pat, I was able to further decrease the morphine to 20mgs. As of 11 days ago, I stopped the morphine all together and I am pain free. I have started physiotherapy and am slowly working at building back the strength that I lost having spent so much time over the past 4 years in bed. My legs are no longer swollen, I have been to the movies, taken a hot bath, shower, hot tub. I can go home to visit my family. Depression is a thing of the past. I can not only walk again but I can run! I have even been able to go back to church. Best of all I can LIVE my life as it was meant to be lived!

Where there was pain, there is no longer. Where there was despair, there is hope for a normal future.

“Doctors suggested that I give up my job, and go on disability...”

—Submitted by Denise Watson

Two years ago I was diagnosed with Fibromyalgia (FMS) and Chronic Fatigue Immune Deficiency Syndrome, (CFIDS). At the time of my diagnosis, I had been searching out answers to my physical problems for years by the time I was finally diagnosed.

According to my doctors, my future was very uncertain, particularly around the area of my ability to continue to work and lead an active life. It was suggested that I consider giving up my job, and going on disability.

As a small business owner and a very active person of 38 years old at the time, this news was devastating, as was how I was feeling. Without going into extreme detail, my immune system was flat, and I was unable to fight off infections and pain.

In January I was bedridden for 2 1/2 weeks, without the strength to stand at my kitchen counter and get a glass of water. The muscle pain had become too severe that I suffered spasms that nearly crippled me, and the fatigue was unbelievable. My mother moved from Florida to Chicago to be with

me through this. She was a Godsend, as I wasn't able to grocery shop, cook or maintain myself without help.

Previous to my collapse, I had researched, called and visited "specialists" across the country. My medical bills and travel expenses were soaring. I did the traditional approaches, a variety of drugs to decrease pain, increase Serotonin production, as well as self-injecting Gamma Globulin, B-12, B-1 and B-6. Results were temporary. I then tried Homeopathy with some relief of pain, but continued fatigue.

When I was finally able to return to work, it was for 2 hours at a time, then 1/2 day. I still needed help preparing meals etc. When I was finally able to work a full day, it was not without taking naps in my office both in the morning and afternoon.

In October my mother brought me a bottle of Noni and I must admit that I took it very reluctantly, expecting no results. And initially, I didn't notice any. After much persuasion from my mother, I increased the amount of Noni that I was taking.

Within 3 months my energy level was so increased that I was no longer napping at work and I was suddenly able to stay awake after work. Previously, when I came home from work I would sleep until the next morning. My life consisted of just trying to make it through a day.

The next thing I noticed was that my pain was decreasing. It was miraculous!

Two weeks ago, I visited my local doctor. She was astonished at the change in me. We didn't do a lab work-up at that time because I showed no physical signs of either illness. No swollen lymph glands could be detected, my lungs and heart were excellent, and I did not react physically to be the muscle tests she performed. She was stunned and astonished. She asked me what I had been doing and I told her that I had stopped all injections and that I was drinking a product called Noni. Needless to say she told me to continue and she requested information.

Thank you for the introduction to Noni, my life has been changed!

“I now thank God for each pain-free day and for his gift of Noni...”

—Submitted by Delores Blesi

I am a retired teacher, 64 years of age.

The pain started years ago. It would be in one place one day and in another place a different day. It would start unexpectedly for no apparent reason. I used to think my lower back was out of place. The pain would last 2-3 months sometimes. It also went all

the way up the middle of my upper back on both sides of my spine.

All the while I was having severe pain in other areas. Specific spots on my back felt as if a corkscrew was being turned into them. My whole back itched constantly and ferociously. My elbows were so tender, I couldn't turn over in bed and just barely touching them while bathing was

excruciating. In my shoulders, front and back, shoulder blades, upper arms, ribs and knees the pain burned like a hot iron.

After sitting for a while I could barely stand up because of a painful catch in my groin. I started having severe charley horses and experienced a general weakness. I could barely lift a coffee cup, and

peeling vegetables for dinner was out of the question.

Finally, I was told that I have Fibromyalgia. It was a relief to have a name for my pain and to

know it was not terminal, although I often commented "Life is not worth living this way".

About 6 months ago, I began taking Noni. It wasn't long before I

experienced relief from pain and more recently a returning of strength. I now thank God for each pain free day and for his gift of Noni.

"It is truly a miracle. I will not go a day without it..."

—Submitted by Bonnie Burgin

Noni the miracle food has provided me with hope when all else was lost.

For the past ten years plus I've worked as a Certified Nurses Aide. When I attained employment with the State of Illinois Veterans Home I was on top of the world, making more than three times more a month than ever before! But, there was a price; this was a labor job with heavy lifting, long hours and all manners of body manipulations involved.

I am a young 50 year old, now riddled with excruciating pain. This all came to be in May of 1997 when I incurred yet another insult to my back.

First, I began having a great deal of stress incontinence with several Ute's. IU changed my working schedule to midnights with hopes of less lifting and some ease to the pains incurred.

As my mother once told me, "all things come to a head, eventually." Mine did! I now began spotting blood which culminated in gross hematuria (blood in the urine).

The Dr. diagnosed me with Fibromyalgia, UTI, and Kidney Stones. After tests upon tests he further found two bulging discs with aggravated disc disease. On top of all this my blood pressure was very high (at risk) and my blood sugar levels were jumping up and down like a yo-yo. This is

way too much for one so young, for anyone!

The Urologist, not satisfied with the previous results did further testing and in the Cat-Scan found a spot that he described as a cyst or a possible tumor in my bladder. The stress at this point is indescribable. I was a nervous wreck and scared!

While complaining and pouring my heart out to my sister, she decided I needed to try Noni. She had been taking it only a short time herself so it was still in the trial stage for her. She told me to try it anyway after all what could it hurt. She was right, but I didn't know it then. I've always trusted her so I began taking Noni as instructed.

Within two weeks I noticed the pain had eased. I wasn't depressed and I had a general feeling of well being. It was unbelievable! I was calm! When I went in for my bladder surgery my blood pressure was better than I've seen it in years, 130/60. My sugar level was a perfect 87 and the best of all was after surgery when the Dr. told me he couldn't find the thing he saw on the x-ray and Cat-Scans. It just wasn't there. The Dr. remarked that he was puzzled and would continue to check me for recurrence.

It's four months now, and it's still not there!

Things were happening fast ... too many to mention in this brief overview. The main thing I wanted to impress is that the nagging pain I can't remember being without is minimized to something less than a nagging toothache, and every day it seems to hurt less and less.

Like I said, I have been diagnosed with Fibromyalgia, Arthritis, Sciatica due to my back and the bulging discs. I am not trying to sound like an alarmist; I just want you to know I'm discussing serious pain, and doctors usually try to help you adjust to life with pain.

Well, Noni is helping me to adjust to life with little to no pain at all. it's wonderful!

The worst of all was the doctors' determination and advisement that I never do my chosen work again. That should have been the straw you know, but my Noni keeps me stress-free, and I have hope!

Noni is not a cure-all, it's not a medication; then what is it! It is truly a miracle. I will not go a day without it.

When UPS went on strike I ran out. Within a week the pain returned. It hit me so hard that I took to my bed and was back on pain pills. I'll always remember that pain, and I thank God daily for Noni and thank you again Noni International.

“It is the only product that has helped me...”

—Submitted by *Rose Fischer*

Five years ago I was diagnosed with Fibromyalgia and have lived with constant pain every since. Taking all kinds of pain pills and nothing ever taking the pain away, even to tolerance level. A few months ago, my pain was to the point that I thought I was having a heart attack in my chest, to the point of sending me to the hospital. I was having migraine headaches constantly. Taking two types of depression pills, no energy to do the things I needed to do around the house, family members helping me with daily house chores. I am a very

independent person and have always done for myself and others, so it was hard for me to sit and watch while my sister and friends did my house work. I quite my job because of the stress not only of the job, but the pain I live with daily. Two weeks ago my fiancé heard about Noni and did research to find out more. He told me about it and ordered the Noni. We have been on it faithfully and I have noticed that I am no longer taking as many pain pills, which was tearing up my stomach. We are both Diabetics as well, and for the first time since he was

diagnosed his blood sugar was down to 110, instead of the range of 150-200+. I take insulin and it is keeping mine within 80-100 when I wake in the mornings. Noni is showing us both that it is working. We tried Noni because of the testimonials that we read. Noni is targeting certain areas, one at a time. I was not sure about trying Noni, but now I feel the daily results of Noni, I truly believe that Noni is helping, it is the only product that has helped me. I encourage all to try Noni.

“I didn't look for miraculous results – and didn't expect any – but as time went on, they happened...”

—Submitted by *Vickie Bryant*

When I first started drinking Noni, I really didn't know what to expect. I just knew my parents believed with all their hearts they had found the most wonderful product for health care on the market. They wanted me to try it and see how it helped me. I didn't look for miraculous results and didn't expect any but as time went on THEY HAPPENED!

I have up and down days as does anyone, but I do owe my current health and well being to my use of Noni and Noni Products. I truly believe in these products as I know they really work for me!

I have been using Noni for one year now and I feel better than I have ever felt! I owe my well being to the fact that I am drinking Noni and I am a much better person

since my Mother introduced me to Noni, and insisted I drink it!

I had been diagnosed with Fibromyalgia, and the pain was a daily battle for me. I have been on one type of pain killer or another for years. Now one year later, I don't battle the pain of Fibromyalgia like I used to. I have had my ups and downs for a while, but learned to adjust my dosage as needed.

I also suffered with debilitating Migraine headaches. I still have occasional headaches but nothing near the severity that they were, and are getting less and less as time goes on.

I previously needed to wear eyeglasses daily, and I really needed them. Now I no longer need to wear them at all and can see perfectly, even better without them!

Even with the new strains of flu that is going around I have found I don't catch the bug, or If I do it is no where near like other around me and lasts a much shorter period than others not using Noni.

I have personally found myself in much better health and much less pain since I started drinking Noni. I am now free of all pain killers, thanks to Noni!! I have much more energy, better health and more self assurance than I have had in years!

Other people that I know have experienced much of the same energy and feelings of general well being since they have started using Noni as well! It has even been helpful with the well being of my puppy, all with none of the side effects of the prescription medications, and Noni is an all natural product!

“I will give up food before I give up Noni...”

—Submitted by Deborah Hensley

I originally purchased Noni for my husband. At the time the pain in his back was so bad that he couldn't sit, stand or lay down and had to keep moving. He had to have help dressing himself.

We started him on Noni four times a day, hoping if one ounce a day was good, this would be even better! After four days my sister, who had given him Noni to take, asked him if it was helping. He put both hands up and said, "I can't tell if it's doing anything."

Then he stopped and started looking at his left hand where he had a very painful skin cancer for four and half years. He looked at it and couldn't believe it; the cancer was gone, and now there was new pink skin!

As for myself, I have been suffering with Fibromyalgia for years... to the point of almost total disability, terrible pain, no cure,

and of course, this resulted in extreme depression. I have endured this with no relief, and no hope in sight, even though I have tried every treatment that was suggested to me. Nothing I tried had helped, even minutely.

Three years ago I discovered what it was, and at this point was almost unable to walk. I have a three year old whom I was almost unable to care for. My life was almost useless. Even By putting my feet on the floor to get up in the morning I experienced excruciating pain. I had begun to use two walking sticks to get around. I have not been able to sleep on my left side in three years, and then only on my right side for a short time.

To make a long story short, I took Noni the first night, and within 15 to 20 minutes every joint in my body started aching and hurting

like crazy! This lasted about 45 minutes. The next night I took it and had no reaction, but my hip was really hurting, so I rubbed Noni on it.

For the first time in three years I slept the whole night through! Consequently, I rubbed it on any painful joint with a wad of cotton and let it air dry, and it has worked immediately every time. I rub it on my neck and temples when getting a headache, and it stops that too. I do the same for back pain.

This has been the best pain reliever I've ever used, and that is really saying something. All I can add is: I will give up food before I give up Noni! There are additional areas where it has helped me, but for sure if you have Fibromyalgia, please try it.

“The Doctor had a needle intended for relief, but ended up missing the vertebrae and shot it through my spinal cord...”

—Submitted by Kim C.

I went to a Doctor to relieve the horrible pain in my lower right side of my back...The Doctor had a needle intended for relief, but ended up instead, missing the vertebrae and shot it through my spinal cord!

Since then, I now experience pain in my lower right and left side of back including the sacral area. Lifting, moving, stretching all became an impossible task which lead to excruciating pain and suffering. Another time later, I became sick with a virus which caused a severe temperature and numbness in all my body

members. Not having any idea what this could be or why this was happening to me, I was frightened! The Doctors put me in the hospital and "ran some tests" on me to find out why I couldn't stand on my legs or have full use my arms. Having no explanation, except Myalgias, it seemed as though it was getting better and as time went on, I wanted to believe I WAS better!

I wasn't better at all – every day simple tasks of going to the store for groceries, taking my son to school, or even cooking dinner; all became an unattainable,

unreachable event in my life. I was spending more time in bed because of the fatigue, the unyielding pain and exhaustion I was enduring. I'm happy to say, a really good friend of mine introduced me to Noni, and since then, "I never say NO to Noni!!" I started taking a tablespoon in the morning and at night in my flavored hot tea but then realized I probably needed a lot more! So, I took a little under a quarter of a cup in the morning and at night. After finishing the first bottle, I then dropped it back down to two

tablespoons in the morning and at night. It has truly changed my life!
I am able to first of all, get out of bed!! But most of all it has given me a quality of life I had before I

was diagnosed with Fibromyalgia, and sick with back pain and suffering! My quality of life has definitely been upgraded to accomplishing my normal daily

activities and then some!! Remember,... "Don't say 'No' to Noni!!"

"My robe fell away from my legs and, in absolute awe, I saw my lesions were gone..."

—Submitted by *Betty A. Boatman*

I am 58 years old and suffer from Post Traumatic Fibromyalgia. Having had it for almost 3 years, the major problems I've dealt with are: 1) severe pain plus flare-ups; 2) depression; 3) chronic fatigue; 4) zero energy; 5) constipation; 6) sleep deprivation, and 7) memory loss.

On April 7th I was introduced to Noni. Having nothing to lose, I started taking it.

Four days later (on a Saturday) I woke up full of energy with much

pain, I couldn't believe it. By the following Tuesday I didn't have any depression, my pain was cut in half, I didn't have one flare-up, I had energy plus, and I was not constipated all week.

All this in one week? A miracle!!

I do have a one footnote to this. I forgot to measure my daily dosage. I drank 1/2 cup every morning and every afternoon!

I have Hypertrophic lichen planus and had it for 40 years.

The Mayo Clinic doctors tried helping with cortisone shots (50 to each leg) to bring down the lesions.

One morning as I was putting on my socks, my robe fell away from my legs and, in absolute awe, I saw my lesions were gone! I have pink skin again after 40 years.

Thank you for giving me back my life. God bless Noni.

"Having headaches almost every day..."

—Submitted by *Fidan Noriega*

I've been suffering from headaches since I was 14 years old. I was having headaches almost every day. Headaches are very unpleasant, especially when you need to work from 9am to 6p.

Since I was introduced to Noni more than a year ago, I can't say that the headaches are completely

gone, but I get them so rarely that it is hard to believe it. Besides Noni gives me a lot of energy to work extensive hours. I love Noni. Only one thing you need to remember – DO NOT GIVE UP IF YOU DO NOT SEE IMMEDIATE CHANGE, for some people the product will take longer to work. I

saw the difference after one month.

Taking Noni before breakfast and dinner became a daily routine and makes my health so much better.

Enjoy the miracle!

"Any day without a migraine is a great day..."

—Submitted by *Chris Osborne*

My name is Chris and I have suffered with migraine headaches for the last 28 years. Recently a fellow co-worker told me about Noni. He didn't "sell" me Noni, he let Noni sell itself. I started drinking Noni about a month ago.

Last week, while at work on the midnight shift, I felt a migraine coming. I had an unopened bottle of Noni in my locker and thought this would be the moment of testing. I drank about 4 ounces of Noni and went back to work.

About an hour later, I drank another 4 ounces because I could feel the headache trying to take hold. My shift had ended about 4 hours later and while driving home I realized, "I never got the migraine!" NEVER in 28 years

have I ever been able to shake, ease or stop a migraine from

running it's full course...at least, not until now. I always would say,

"Any day without a migraine is a great day."

“Noni is the best supplement I have ever taken, and I intend to continue taking it for life...”

—Submitted by *Clyde Lunsford*

I had been suffering from debilitating migraine headaches for several years. In addition to the migraines, I had sinus problems. I had persistent lower back following an injury while exercising. In addition, I had high blood pressure and high

cholesterol. A friend introduced me to Noni. After taking Noni for one week, the migraines left and the sinus problems disappeared. My blood pressure is well within a good range and my cholesterol count is down. I have more energy and an overall feeling of well-

being. I don't feel as stressed as I did before Noni. Noni is the best supplement I have ever taken, and I intend to continue taking it for life. I strongly recommend it as it strengthens your immune systems and helps to fight off infections and diseases.

“I averaged 30 pills per month, with a headache of some kind almost every day...”

—Submitted by *Vicki Northern*

My migraine/stress/sinus headaches had become so frequent that I averaged 30 caffeine/aspirin/codeine pills per month, with a headache of some

kind almost every day. I started taking Noni the day after Christmas, and I have only had 2 headaches since then – what a miracle for me! I am so grateful to

my niece for introducing Noni to me. I can tell that I am more alert and have more energy also.

“This product has given me back twenty years of my life...”

—Submitted by *Diana Voss*

From my earliest childhood I remember having the severe pain of a migraine. Leaving the fun as a teenager and young girl because of a migraine. No medicine was available at the time. And I would feel suicidal at the thought of another migraine. I found some relief when Imitrex came on the market but my husband would have to pin me to the floor to give me a shot. I eventually lost the fear of a needle to the migraines. The pill form came out and I thought it was great. Until my daughter started having migraines and she couldn't take the medicine. I saw her making sacrifices and missing things the

way I had. The cost of the medicine was so expensive it was unbelievable to me. How could I possibly afford this? I would suffer as long as I could so I could save the medicine in case I had a migraine in public. Later in life the migraines started becoming silent migraines. Less pain but severe loss of vision and dangerous if you were driving.

I had blood sugar problems every day but was thankful that I wasn't a diabetic. Injecting with a needle was more than I could handle. My praise for our Father for this blessing.

During childhood I had broken my arm and metal plates replaced

some of the bones. This was beginning to cause serious pain in my elbow area. Cortisone shots were giving me some relief and I decided I had to live with any pain beyond that.

About four years ago I had an accident that left me with a neck injury. After four years the pain became too much. Three viakadyns at a time and I was still feeling pain and losing use of my right arm. After x-rays and an MRI it was found I had some nerves pinched and some bulges in my neck discs. Surgery was a must. But I was put on a waiting list. On the internet I went to find some relief. I was willing to try anything

at this point for pain. After three weeks of one ounce a day with the Noni, I was still in pain. John told me to take four ounces for that much pain. But I didn't want to spend that much so I started on two ounces. After a week, I woke up shutting off the alarm with my right arm and realized my pain

was minimal. No more pain pills. It was a gift from God. I also realized neither I nor my daughter had had a migraine for a month. I stopped eating for two days to see if my blood sugar was really helped. I had no blood sugar reactions and I haven't had the

shakes once since I started drinking Noni.

What an amazing product! It has given me energy, stopped my pain and even my fingernails are long and beautiful again. I call them my Noni nails. This product has given me back twenty years of my life.

“My medical doctor told me I was a ‘diagnostic dilemma’...”

—Submitted by Marie Hakala

Over the past ten years I have been the victim of many doctors and of many diagnoses. I've been told I have arthritis, lupus, Lyme disease, MS, fibromyalgia, and disc disease. Also, I've had many bladder and yeast infections. My medical doctor of twenty years told me I am a 'diagnostic dilemma'.

For the past eight months I have been taking 2 oz. of Noni each day: 1 oz. in the AM and 1 oz. in the PM. For about a year and a half prior to my being introduced to Noni I had regained

some of my health by replacing nine prescription drugs with vitamins and food supplements.

I thank God for them directing me to the exclusive Noni. Since drinking Noni, my energy level has improved. I have less joint and muscle pain; my thought process has further improved; I have fewer bladder and yeast infections; I have less back and leg pain from the disc problems, and my balance has improved.

I have a lot less eye pain, and my medical doctor confirmed that my cholesterol has gone down.

Also, the mysterious stabbing pains throughout my body have greatly decreased. I am looking to further improvement in my health as I continue to drink the health-giving Noni.

I would like the world to know that Noni is changing thousands of lives – one life at a time. To any skeptics out there I'd like to say "The placebo effect does not last, but the ongoing cellular regeneration of this great product does."

“My condition worsened so bad, I was unable to pick up my left leg...”

—Submitted by Pat Rizzi

I was diagnosed with MS (multiple sclerosis) in February of 1992. My original symptoms were tingling and numbness in my left hand and foot. Since that time the same sensations appeared in my right hand and foot, but not as bad. My condition worsened so bad that I was unable to pick up my left leg. I walked by dragging my left foot behind me. I lost strength and dexterity in my left hand.

The simplest things were difficult and next to impossible to do, such as turning on the water faucet, opening cabinets and drawers, rolling down the car window. It was very frustrating and made me irritable and impatient. I

could not outstretched my fingers; they would simply droop. My vision began to get blurry and at times get so bad I feared I might go blind.

I have tried physical therapy, acupuncture and various medications. Nothing helped me. I also have arthritis, psoriasis and chronic bronchitis. Every winter I would get a cold that would last from two to three weeks.

In the late fall a friend of mine introduced me to Noni. I started taking it on November 5th. Three days after I started, my arthritic pain went away and has not returned.

Within a few weeks I noticed I was walking better and can now raise my left leg up and step on to a curb. I have also had gradual improvement in my left hand. I can turn on the water faucet, open cabinets and drawers and roll down the car window with my left hand.

I no longer have blurred vision, in fact, my vision seems sharper. I got a cold in January and it only lasted four days, and was not as severe as in the past.

Recently I noticed the flaky patches of psoriasis on my arms were gone and are disappearing from my chest. I also have renewed vitality. I don't get tired

anymore from simply making the bed, and I do not need a nap every afternoon. I am not frustrated and irritable anymore.

I take two ounces of Noni in the morning and again in the afternoon, and I owe all these

improvements to Noni and only in a few short months.

“We came away with the National Championship trophy...”

—Submitted by Tyson Williams

This is the letter I promised you concerning the success that our football team has had as users of Noni.

On January 19th our full contact flag football team was crowned the National Champions after 2 days playing 6 games of "full contact" flag football. On our roster we have 2 ex-professional (NFL and World League) football players and 6 others that have played college level football.

One of the ex-pro players is Samoan and was already very familiar with Noni when I approached some of the members of the team with it since an 8 game tournament in 2 days is very physically draining. I am a very healthy person and therefore take Noni for the help it gives me in energy, and prevention from things that I do not know if I've got or would have been exposed to.

I was nicknamed the "Energizer Bunny" because I play both defensive back and slot back and am 1 of only 2 players on our team to do so and thus the nickname.

Many of my teammates were curious as to my training and diet and that was when I was able to introduce my purple energy drink of Noni. Many of the players on my team are already very good friends and knew that I was taking 2 ounces a day of Noni, but didn't try it until the whole team decided to work out with my training schedule and diet plan for the month before the tournament.

We ended up winning the National Championship in a league that has over 1,000,000

members and 10,000 leagues nationwide and in Canada. Only the top 100 teams in the nation were invited to attend this tournament, and after taking 5th place last year with 8 injuries out of 16 guys, playing 2 less games, this year having 14 of our 17 players on Noni, we came away with the National Championship trophy and only lost 2 players to injury during the tournament and you guessed it that they were 2 of the 3 that did not join the Noni club training schedule.

Since that does not give any specific evidence (although I believe that is was a very direct cause of energy reserve and injury prevention) I have a few specific examples of Noni and the good it did to a few of our team players.

I will start with my quarterback who is rated #1 in the country and who we live and die with. He and I were both nominated to All-American status along with our native Samoan who has grown up with Noni. Our quarterback has a history of severe tendinitis in his throwing elbow and usually can finish a tournament in pain, but struggles through the next 2-3 weeks with severe tingling, sharp pains, and stiffness in the elbow.

Generally he would just be feeling well enough a month later when it was time for our next tournament and the painful cycle would start all over again. In early December after a qualification tournament he had symptoms in his arm as badly as he had ever had them.

I was finally able to persuade him to try Noni for the period

between then and our tournament. Not only did it quicken his normal recovery time from 2-3 weeks to about 1 week, he continued taking it through the time of the tournament and did not reoccur the injury after 8 straight games in 1 day which has not happened for as long as he can remember.

Matu'u is our native Samoan who has grown up eating and drinking the raw fruit from his mothers rearing. He pulled his hamstring severely in the December qualification tournament and was not expected to play in the National Tournament. Not only did he recover in time to play, but he played both offense and defense and shared tournament MVP honors with me for the 100 team National Tournament.

He also was instructed by his uncle in Samoa to topically apply Noni to his injured hamstring simply by using a warm cloth and cold Noni.

This next year as we tour the country on our National Championship Tournament Tour, we are seeking sponsorship from TNI and hope to have it available for trials at various tournament sites to further the good that it does not only helping those who are older and inflicted with diseases, arthritis, asthma, and diabetes etc..., but also for what it does for healthy individuals for energy and prevention from injuries that you will never know you would have received and speeding up the healing process on those that did occur.

“This is the first time I've used something that gives me energy that lasts the whole day and helps me sleep better at night...”

—Submitted by Mike Akagi

I've been running marathons for twenty years and I think I've tried just about every natural health supplement out there to improve and enhance my running.

Every supplement I've used makes claims about being better for me, but then doesn't do anything. All of the products gave me a buzz, but that's all. There were no long-term effects and I didn't feel better from taking them. As a long distance runner, I want something that lasts longer than the race.

A friend of mine, who also runs, recommended Noni. He told me it really helped him with his running so I started drinking it after I had just run a marathon. Noni helped with my recovery from that race and I decided to keep using it during my winter training season.

In the winter I usually run five to seven miles on weekdays and ten to fifteen miles on Saturdays. Sometimes in the morning I'd do a

fairly hard workout and when I trained the next day, my muscles were sore and my joints would ache.

But after using Noni, I haven't had that pain and my overall energy level has improved. I'm really in tune with my body, so I immediately know what things work and what things don't work. And Noni works.

I'm now starting my summer training, so I run ten to fifteen miles on weekdays and twenty on Saturday. Even with the more rigorous training, I don't feel the aches and pains that I used to feel. It's easier to go out and train every morning when I'm not sore.

Because Noni is so effective, I didn't have a cold all winter. During cold and flu season my whole family got sick, but I didn't get anything. Whenever I felt something coming on, I took a little more Noni and it seemed to fight the symptoms.

I recently went on a weekend trip and I forgot to bring my Noni with me. The family I stayed with had kids with colds and the flu and I started to feel sick. But as soon as I got home, I took some Noni and the symptoms were gone in less than two days.

One of the things that attracted me to Noni was the fact that it is one hundred percent natural. I've found that almost every other nutritional supplement has some sort of additive or coloring – which isn't healthy.

This is the first time I've used something that gives me energy that lasts the whole day and helps me sleep better at night. Now I just flow with energy. I don't know exactly what Noni does for your body, but whatever it does it's great.

I have been taking Noni for about seven months now, and I plan to go the distance with it.

“He refused to use his crutches and walked all day without them...”

—Submitted by Sharon Rigge

Our eleven-year old grandson Lee, while playing basketball last April, hurt his ankle so severely that he couldn't put any weight on it at all. His Mom had some crutches handy and that was the only way he could get around.

On Monday he went to the doctor and the x-rays showed that his ankle wasn't broken, but severely sprained and bruised.

The diagnosis by the doctor was that it would take a full month

before he could put his full weight on the ankle.

We learned of this on Monday evening and suggested they use Noni on Lee's ankle.

So this is what happened:

Monday evening they put a generous amount of Noni on his ankle and wrapped it gauze.

Tuesday morning same thing.

Tuesday evening he barely needed the crutches to walk.

Tuesday evening he got another application Noni.

Wednesday morning was the last application.

Wednesday he refused to use his crutches and walked all day without them!

Thursday he was up to full speed and playing as usual!

If anybody is skeptical about Noni all you have to do is wait until they have a cold sore, blister, paper cut, pulled ligament, sprain,

bruise, sore joints, eczema or most any condition on the skin and let them try Noni topically.

They will experience the healing power of Noni within a matter of seconds for something

like a minor bum to a matter of a few days for something a little more serious.

Sharon and I have personally experienced this level of healing

with Noni and so have our friends and other family members.

And every time it happens we are still amazed!

“I creak like rusty hinges when I wake up and start moving around...”

—Submitted by John Zollinger

I have been blessed with extraordinary strength and intensity in athletic events. I have been ranked 3rd in America in the discus (and threw 7' over the world record in practice) in high school. I also power lift. My best squat was 750 lbs. for 2 reps at age 21.

I also excelled at many other sports too. I have been around elite athletes in my college career. My coach at BYU was Jay Silvester, 6 time world record holder in the discus. I knew 2 discus national record holders from Sweden, one as a teammate and the other as an assistant coach. Then I had injuries each year going through college. I was perfectly positioned to continue my success but injuries stopped me short.

Jay told me to continue to throw because I have the potential to compete on the world level if I can stay injury free. I did not have what you would call an injury free athletic career even through high school.

Because of my strength and intensity, I often hit people on the football field with greater violence than my joints could handle. Because of my success, I was the target of cheap plays that have severely damaged some of my joints.

In power lifting I attempted a world record for a non drug users when I was 21 years old and re-injured a disk in my lower back between L3 and L4. All together I have had: my right ankle torn out,

bursa sac damage in my shoulders (the right shoulder, ac joint, was separated so badly that an MD said that I would never throw discus again but the following year I was nationally ranked), damaged my right elbow, left wrist and right thumb.

I creak like rusty hinges when I wake up and start moving around. My wife teases me that I could never sneak up on anyone in the morning.

I currently own a research company that reviews breakthroughs in several areas including health.

One product that I have found that I believe all athletes at all levels should be using is called Noni.

It is common knowledge that a teams entire season or an athlete's entire career can hinge on whether he or she is healthy. This was certainly true in my case.

Recovery is paramount to success. Whether they can recover a week earlier to help their team make the playoffs or be in the playoffs is critical. Seasons can be very damaging on the players. It seems like everyone is banged up or hurting somewhere at the end.

That is where Noni comes in. The juice from the fruit, I believe, will do at least 5 things for athletes: 1 prolong your career, 2 get you back playing your position sooner, 3 have the healthy edge when playoffs come, 4 avoid the flu and other sicknesses that can drain your strength and 5 live a

pain free active life even after your career.

All of our bodies are different.

So far I have noticed, for various ailments, that taking Noni produces in 25% of the cases a miraculous result, 50% have a good to very good result and 25% have a feeling of well being.

The time frames ranges from approximately the same hour to 6 weeks, but most people that I have heard and read about have noticeable results within 2 days to 3 weeks of taking Noni consistently.

The fact is that experts often don't agree and can debate this or that point, and testimonies of how great Noni is can keep piling and piling up and the number of different health applications can continue to increase and go on and on, but the proof is in the pudding. You must try it to know.

My personal results come in between the miraculous and very good. I felt great pain relief in only 2 days. I am going through my many different ailments and checking them off as I have results.

That's the great thing about Noni, it works on so many things. I have not listed them here because of the volume and the list would also be incomplete. There are new applications found all the time. No pill for this and another pill for that, all the time being concerned about the medicine's side effects, just one natural source for so many different things.

“My Dad set three bottles of Noni in front of me and said, ‘I want you to drink all three bottles as fast as you can’...”

—Submitted by Ralf Van de Veerdonk

At 19, my lifelong goal of being drafted by the national Soccer League came true. Twelve years of constant training in Holland and I was chosen as a professional member of the Austrian FC Karnten Club.

After a short time I had a serious experience with pain in my chest, neck and shoulders. It felt like I was being stabbed constantly with a knife and it wouldn't let up. Painkillers and massage prescribed by the Club's Doctor didn't help. Finally after missing several tournaments I was sent to a Chiropractor for treatment. Thankfully, I was pain free for two months and could continue my professional Soccer career. Then the unimaginable happened, the pain returned but this time accompanied by inflammation and excruciating pain in one of my molars.

I was sent back to Holland, but the Dr's previous chiropractic treatments only worked for a few days. He thought it might be related to Rheumatism. Appointment after appointment and still the Doctor's had no idea what was causing the constant pain. They thought it was related to my tooth problem and suggested treatments or removal. I quickly chose removal hoping that this would cure my crisis. The pain persisted with no evidence the tooth extraction was related at all. The follow-up treatment was x-

rays along with constant injections of freezing, anti-inflammatory drugs and painkillers. I was able to participate in training for several weeks in Austria until I experienced different and more excruciating symptoms. Now my tail bone, hips and lower back where ridden with agonizing pain.

Four months had passed since the first symptoms. With the Club Dr. still unsure of the problem, he decided on an MRI scan. The results suggested that the severe inflammation on either side of the coccyx was either over training or the beginning of Rheumatism. With the pain unbearable, hardly sleeping or function normally, I knew it was more then just over training. I was sent for a second MRI, which proved the inflammation had become much worse and the reason for the chronic pain. Finally they took a blood sample and found evidence that high levels of Rheumatism did exist. The lab showed the blood marker HLA-B27 was positive for Morbus Bechterew, a disease that causes severe crippling of the spine, ending with complete incapacitation. There is no known cure or relief of the symptoms. This meant the end of my Soccer career and my health.

It was month eight and I had no hope for the future. My father Eef, was at his wits end and decided to take matters into his own hands. For several years our

family had been using an exotic super drink Noni. Many people had phenomenal health experiences with Noni, drinking just two ounces per day. My Dad set three bottles of Noni in front of me and said, “I want you to drink all three bottles as fast as you can.” Within three hours I had finished the entire three liters. Then the unimaginable happened. The pain intensified one hundred percent. Not knowing what to do, my Dad called a Physician in the Netherlands who worked with Noni. While on the phone, my symptoms began to lessen and I walked to my Dad's office. Shocked at seeing me, we both realized the pain was lessening. By the end of the evening, there was so much improvement, I made the decision to stop all the addictive drugs and rely totally on Noni for healing. It was the first full night's sleep I'd had in months. I began drinking 500ml of Noni every morning and tracked my improvements daily. After three months I was completely PAIN FREE!

It has been several years since that dreaded experience and the Doctors are amazed at my recovery. Whenever I'm without Noni for three days or more, my symptoms begin to return. I am thoroughly convinced that Noni is balancing my immune system and keeping me pain free to this day.

“Noni has saved me from a life of dry, irritated skin, and I am glad I found it...”

—Submitted by Wanda Tucker

I began taking Noni when my sister told me about it in March of 2014. I was suffering from skin irritations (severe dermatitis of the skin) and I began to research the Noni plant and what it does. I found that it can really help the

skin and nails so I said why not. I began to experience less itching and a oil sheen to my skin. I had large dark patches on my skin and those started to heal from the inside out. I also noticed that the split ends of my hair were not as

split. My nails are healthier and my energy level is great. I also no longer drink coffee I just drink Noni leaf tea now. Noni has saved me from a life of dry irritated skin and I am glad I found it.

“I am now off all previous medications for the first time in 13 years...”

—Submitted by Bishop M. Craig

Between January 1985 and April of 1996, I suffered three heart attacks, quadruple bypass surgery (July 3, 1992) and over 60 hospitalizations due to recurrences and complications, primarily arrhythmia. I was told that I was inoperable for seven of those years (from 1/3/85 to 3/3/92).

A cardiovascular surgeon I had worked with at Ben Taub Hospital (Houston, Texas – 1967- 69), Dr. William Berry, MD, operated on me on a Monday afternoon at St.

Joseph's Hospital, and I walked out Saturday morning! That operation saved my life, but all the subsequent medications, and their side-effects, caused numerous, needless hospitalizations, some which were very serious!

After three weeks of being on the Morinda citrifolia (Noni), I find that my heart is beating normally, my cholesterol is in the normal range, arthritis in my right foot is gone, I am no longer impotent (a ten-year side effect of the heart medications), my bowel function is

normal (don't laugh, it's vital to proper health) and my blood work is normal.

Best of all, I am now off all previous medications, for the first time in 13 years this coming January!! I work 6 days a week, 10-12 hours a day, with energy galore!! I am living life again.

Guess What?? Morinda citrifolia (Noni) works!! Whether mainstream medicine agrees or not. People may lie, but EKGs, blood tests, and X-rays don't!!

“A brown recluse spider recently bit me...”

—Submitted by Richard Kates

A brown recluse spider recently bit me. The bite left a small red mark on my right index finger, and it soon became dark red and itchy, swelling to a dome shape the size of a dime. The poison caused me to experience severe flu-like symptoms with fever, nausea, and body aches. I went to the doctor, but all he could do was lance the wound to get rid of any visible pus. I still had trouble closing my hand.

My wife, Kriss, had just learned of Noni and ordered a bottle the next day. Three days after I received the bite, I started using Noni, taking 1 oz twice a day. Over the next two days, I noticed that the swelling was almost gone and the skin color was turning from very dark to pink. My hand continued to rapidly improve over the next few days.

After using Noni for one week, the dime-size area of the bite was

flat. Now, 15 days after the bite, I only have a light mark about the size of a pencil eraser, and it is getting smaller. My sister-in law experienced a recluse bite several years ago and had eight months of problems with it. From what I have learned about toxin, I am very fortunate to have had Noni in my life.

“After just a week of taking Noni, I no longer have heartburn and bloating...”

—Submitted by Sandra Phipps

I have had acid reflux problems and bloating after eating for around 20 yrs. I was eating a bottle of antacid a week and in Jan. finally went to doctor. They prescribed Prevacid which really helped but the PRICE!! 259.00 a month.. I can't afford that.. so in desperation I started asking questions to anyone I meet if they knew of anything all natural that would help. My farrier was working on one of my horses about a month ago and his wife told me

about her mother that is in her 80's drinking something called Noni... I had never heard of it. I am so glad I did!!! I am happy to say that after just a week of taking Noni, I no longer have heartburn and bloating. I also, noticed that I was not having hot flashes during the day and at night I was not waking up 5 to 10 times with night sweats!!! And that meant I was sleeping all night. And boy the energy I have!!! I don't know what I will feel like in a month or 2 or 3

of taking this fantastic product. I also, noticed I am not aching in my joints and morning stiffness in feet is slowly getting better. Tonight I started my 77 yrs. old mother on Noni and she is going to start giving it to her 17 yr. old dog that is having problems with hip and breathing. I will keep you updated on her progress. I just wanted everyone to know how thrilled I am with Noni and I love the taste.

“I was divinely directed to this gift of God, Noni...”

—Submitted by Rev. Esther Lindquist

After several years of being on health supplements, which were good but did not take care of every situation in my body, I was divinely directed to this gift of God, Noni. I had severe digestive problems, too much acid in my system, muscle spasms in the thighs, and poor circulation which I have had for many years. I also would have leg cramping in bed at night and I always wanted to stretch which would bring on the cramping.

I started on Noni over two and a half years ago and the acid is all balanced out, no more canker sores, cold sores, or even colds. Have not had a cold since I have been on Noni, if I felt like one was coming I immediately took two ounces of Noni and it knocks it right out of my system. Digestive is not a problem unless I have something I should not have. I could feel the Noni working in my circulation for several months, and now it is not doing that, so I believe it is moving out any

problems, that were there. As an added bonus I had a liver cleansing which was a surprise to me, but definitely needed.

No more muscle spasms or leg cramping. I have also used Noni to apply to burns and a wart started appearing on my nose and I dabbed Noni on it a couple of times and it fell off. I am an active 74 year old and a minister of the Gospel and I thank God daily for what He has for us and to help us to get and stay healthy.

“Dr. Calpin said that I did not have to go on the AIDS Drugs...”

—Submitted by Lonnie

I have been HIV positive since February 1999. With good fortune on my side, I have been asymptomatic. I have never taken any AIDS drugs.

My determination has been to stay totally healthy and to stay off AIDS drugs. So far so good. In the

last two months, my T-cell count has been taking a negative turn, slowly slipping into the 400 range, and then into the 300 range.

To give a perspective when the T-cell count drops to 500 or below AIDS drug therapy is strongly recommended.

On December 1st I started taking a natural "miracle from paradise" called Noni. My friend insisted I take Noni to promote healing since I was going into the hospital on December 4th for surgery on my heel. She said it would help me recover quickly

from the extensive surgery. I agreed to try Noni.

On December 2nd I took my usual HIV test. On December 16th I took another HIV test. That day my doctor told me he was concerned and that if the results of this test turned out to be the same as or lower than the results of the December 2nd test he would have to put me on the AIDS drugs.

On Thursday, December 19th, Karen head of the research

center, called to give me "great news".

The test on December 16th revealed that my T-cell count had jumped to 482 and my ratio had gone up to 41.5%. Dr. Calpin said that I did not have to go on the AIDS Drugs. Of course, I am thrilled beyond description.

Here are my test results since September 1996:

09/12 – (Viral load – 11,000) *
(T-cell – 331) * (Blood Ratio - 39.1%)

10/01 – (Viral load – 11,000) *
(T-cell – 382) * (Blood Ratio – 45.8%)

12/02 – (Viral load – 11,000) *
(T-cell – 369) * (Blood Ratio – 37.4%) Started Noni 12/01/96

12/15 – (Viral load – 4,300) *
(T-cell – 482) * (Blood Ratio – 41.5%)

“Pain was something that was starting to control my life...”

—Submitted by *Steven B. Sanders*

First some history about myself. I've had Ankylosing Spondylitis for 27 years. I've hurt for a very long time. Pain was something that was starting to control my everyday life and I was about ready to give up.

I've been on every arthritis drug they make, including prednisone and and cortisone shots (every 3 months).

May 14th 2001, I was in the arthritis clinic in Oklahoma City, complaining of severe pain in my

neck. The doctor recommended a cortisone shot in my neck. But he wouldn't give it to me that day, he wanted me to have a MRI done first. I agreed, and he set a time for me to get it done.

May 15th 2001, I drank my first ounce of Noni. Three days later, I was starting to feel less pain. I shared what was happening with me to my friends. They wanted to try Noni too. So I ordered another case within the first week and then another case.

June 4th I had the MRI done on my neck and upper back.

June 14th I was back in the doctor's office. I didn't get a shot that day, even though the doctor said he could see a problem area.

Today is Feb 14th, 2003. and I've not had or have needed any cortisone shots. Plus my sinus problems are mostly all gone, I had used nose spray for years and 2 alegra-d a day. I have more energy, and my blood pressure is under control.

“For those who believe in Mother Nature more than the pharmaceutical companies...”

—Submitted by *Eddie*

I have been taking anti-depressant medication for about two years. I tried to get off the medication, but failed and needed to get back on. However, I've been drinking Noni for some time

now, and I'm off the medication. I don't need it anymore. Although I'm not totally sure if Noni was the main contributor for the improvement of my mental health, I DID notice that my overall health

improved significantly after drinking Noni. I highly recommend Noni for those who believe in Mother Nature more than the pharmaceutical companies.

“I wish I would have had this years ago...”

—Submitted by *Melanie Emerson*

Hello, my name is Melanie. I have had real bad anxiety attacks for almost 10 years. They were so

bad I ended up in the E.R. more than I can count. A friend introduced me to Noni and he said

to try it. I let my husband take it first because any pills or anything I thought I was taking to get rid of

the anxiety would set them off. I waited about a week before I took it, one day I got up and took an

ounce. In 2 days I noticed I hadn't even thought about an attack. I was sleeping better, had more

energy, and my moods change for the better. I wish I would have had this years ago.

“I was rushed to the hospital one night, fearing a heart attack...”

—Submitted by Wilma Thomson

I am a 54 year old woman. I have always been healthy and vibrant. That stopped several years ago when I came down with costochondritis, an arthritis of the chest cavity. I didn't know what was wrong initially, and the illness crept up on me becoming progressively worse. I didn't feel like it was life threatening because the only real problem was unbearable pain.

I was rushed to the hospital one night fearing a heart attack. The specialists were stymied but said it was not my heart. I was sent to a General Practitioner and he immediately diagnosed me with costochondritis upon my telling him the symptoms. He offered to put me on prescription meds which I am leery of as I know anything concocted by man has minor to major side effects, so I asked what the side effects might

be. The doctor stated that there was only 2 types of medications that could help me and both had severe side effects stating that the one pill would deteriorate my liver within a short 6 months and the other medication in about the same amount of time would wreak havoc on my kidneys. I asked if there was anything else I could do. He said that I could live with the pain.

I chose that option, so for the next 5 1/2 years I and my family greatly suffered with my illness. I actually became bedridden and was up only 1-2 hours per day. I stayed home and our family ceased functioning as a unit.

One evening a friend called and told us about a new wonderful natural product with zero side effects, called Noni. He said it was helping everyone with everything because it strengthened the

immune system. I've lived long enough to know that no one thing can do what he claimed but out of desperation to be well I purchased some. I drank Noni for 3 days and on the third day my pain was gone! That was over 6 years ago. I still have my ailment, but it is 95% in check and when a particular bad day comes I simply drink more of this amazing gift called Noni.

I am back to work. I'm back to being a wife and mother. Now, with so much time on the product, my family and friends have found that this is indeed helping everyone with everything. Even my skeptical husband has been aided with recovery from several ailments including hemorrhoids, insomnia and allergies. My friend's claims were true. Noni is the miracle we needed and I'm so grateful for it.

“I knew there had to be something I could do to help her little sore cheeks and ears...”

—Submitted by Bonnie Frazier

I was researching options to treat my then six week old daughter's baby acne. Her case was severe enough to warrant the pediatrician's recommendation of hydrocortisone cream for her face. It wasn't working. After reading article after article of "leave it alone. It goes away after six months", I was getting pretty frustrated. I knew there had to be

something I could do to help her little sore cheeks and ears.

Finally, I ran across a testimonial of how Noni had helped the submitter's niece's baby acne. After studying more about its benefits, I got some Noni and gave it a try. In less than 24 hours, I noticed improvement. I drink an ounce a day and breast feed her. If I don't drink any of my Noni for a couple of days, her

acne comes back. If I drink an ounce a day, you can barely tell she even has acne.

I now recommend it to everyone I know. I even started my husband on it when I read that it is good for pain, as he broke his back years ago and suffers back pain ever since, but refused to go on pain medicine for it's addictive nature. Noni is changing our lives.

“I then soaked a cloth in Noni and laid it across my burned arm...”

—Submitted by Grace Beasley Terrell

I was cooking fried fish, when I finished I turned to turn the stove off.

I was wearing a dress with flaps on the sleeve. One of the flaps fell into the hot grease, I snatched my hand back the sleeve flapped up on my arm. Immediately my arm was discolored. I put ice on and it continued to pain and burn.

I then soaked a wash cloth in Noni and laid it across my burned arm. By my medical experiences I am sure that this was a 1st to 2nd degree burn. However what happen next is that the pain and burning subsided and I could forget that I had been burned.

There was never any blistering or the skin turning dark, no pain, and few days latter the skin that

was burned began to rub off, the new skin was is as nice as a newborn's skin.

Needless to say at 55 I began to use it all over my body with a makeup pad. My skin is very sensitive, I'm not able to use any over-the-counter products. Noni is so mild I can use it any time.

“This has been a Godsend for my daughter and me – nothing short of a miracle...”

—Submitted by Judith Dawn Whyte

My family has been drinking Noni for 3 years now. It took me 3 months to decide to try it. I thought it was expensive and I just couldn't believe that anything my doctor had never heard of could help me. Since then, I've become healthier and far better educated in the area of nutrition and it's direct relation to health. All thanks to Noni.

I have suffered with Bipolar II illness for more than 20 years. I loaded with Noni at 4 ounces per day and eventually cut it down to 3 ounces per day. Within 6 weeks, I began to become a totally new person. After about a year on Noni, I was able to cut my antidepressant medication in half and still feel wonderful. My 3 year old daughter had developed a biochemical digestive disorder that

had become chronic. Her diet had to be very strict. She was forced to take an adult dose of stool softener and suffered through enema treatments every few months. She had constant urinary infections, stomach aches and headaches as her body was completely unable to move toxins out of her system. She had repeated urinary and stool accidents, severe constipation and gas pain. A child's nightmare.

We were told that hundreds of children are visiting biochemical disease clinics and these numbers are rising. After researching extensively in the area of nutrition, I decided to put my daughter on Noni. We weaned her slowly from the stool softeners by loading her system with the child's dose of Noni of 2 ounces but found she

required 3 ounces of Noni in order to take her off the stool softeners completely. We gave her 2 ounces at night and 1 ounce in the morning. After about 2 years at 3 ounces, she now only requires 2 ounces per day. That amount will likely increase as her body weight increases as she gets older. After about 4 weeks, it became obvious Noni was helping her tremendously. No more gas pain, regular bowel movements, no more urinary infections. Our daughter no longer sticks to a strict diet and only has a little trouble with ice cream occasionally. All her symptoms are completely gone. This has been a Godsend for my daughter and me – nothing short of a miracle.

“I have been taking Noni for 4 months and here are some of the results I have experienced...”

—Submitted by *Almeda Harris*

I was first interested in Noni to help with my blood pressure, not knowing or considering other benefits. I have been taking Noni for 4 months and here are some of the results I have experienced:

Lower blood pressure
Joints ache less
Increased energy
Clearer skin, a glow
Sound sleep
Less back pain

Good elimination
I am sure the longer I use Noni the more my health will improve.
Thanks so much for such a wonderful product, I am telling people more and more each day.

“My doctor confirmed that both my blood pressure and cholesterol have improved...”

—Submitted by *Velta Price*

What a difference an ounce (2 tbsp.) a day of exclusive *Morinda citrifolia* has made in my life. Since drinking Noni my medical doctor confirmed that both my blood pressure and cholesterol have improved.

I'm sleeping better and have better balance. It's good to have less pain. Also my complexion is better as are my memory and thinking.

I thank God for preserving the *Morinda citrifolia* trees (that

produce the Noni fruit) down through the ages so that I can now benefit from the healing properties of Noni and enjoy better health at age 83.

“My blood pressure has been high for 10 years...”

—Submitted by *Sandie Sweatman*

My blood pressure has been high for 10 years. My doctors

couldn't get it down. Now that I am taking Noni it is normal. THANKS.

“Remarkable success...”

—Submitted by *Wouter Storm*

I have been drinking Noni for 6 months now and with remarkable success: blood pressure and

cholesterol are ok again, my short breath problem has decreased by say 85% and the chapped hands I

used to have are quite smooth again!

“He feels better and healthier than he has in years...”

—Submitted by *Gail Maddy*

My husband Bob has had Parkinson Disease since 1991.

He does not take any Parkinson's medications because

the side effects are worse than the benefits. He takes herbs and vitamins.

He started taking 1 oz of Noni on March 12th. Since May 15th he takes 4 oz approximately every other day.

Two weeks ago, he told me he feels better and healthier than he has in years.

“He rebuilt my 5th, 6th, and 7th vertebrae with bone from my right hip...”

—Submitted by John H. Nelson

I hurt my neck in a head on accident in 1989. A Doctor in Medford Oregon took a chance that the spinal cord was not severed. He rebuilt my 5th, 6th, and

7th vertebrae with bone from my right hip.

This restored movement of my body but my neck was stiff and painful. A good friend told me

about Noni. It took the pain away and I was able to work my neck.

I now have full movement in it. Praise the LORD for wonderful people that put the tools, the LORD has given us, to work.

“The hole was big enough to place the tip of my little finger into her leg...”

—Submitted by Debbie Lay

My daughters 11 year old friend had a brown recluse spider bite on the lower right outside of her knee. After seven days and on antibiotics, the hole was big enough for me to place the tip of my little finger into her leg. We started putting Noni into the hole

and bandaged it. She continued to keep it packed with Noni and drinking Noni and kept changing the dressing. The wound drained and in two days had a scab. In 3 days the scab came off and the sore was completely closed with a small white dot of infection that

was still draining slightly. Eight days later, the wound is pink and healing up completely.

This is the 5th time we been successful with Noni for Brown Recluse bites in the last 4 years.

“I immediately poured Noni on the burn and within minutes it stopped burning...”

—Submitted by Sandy Best

I was fixing my husband a cup of coffee in the microwave one morning and I left it in there much too long! It was boiling hot. I was turning to go the sink to pour some of the water out when the

microwave door flew forward as I was turning to go toward the sink to pour some of the water out and add some cold. My right had was severely burned. I immediately poured Noni on the burn and

within just minutes it stopped burning. I still have the redness on my hand from the burn the day afterwards but the pain of it was completely gone. Noni, I wouldn't be without it.

“I went to three different dermatologists, spending several hundred dollars on different treatments...”

—Submitted by David Stegall

I have had seborrigh dermatitis for over 6 years now. It began as a small patch of dry, flaky skin, which soon developed into larger patches that would flare up on my face and chest. Also, the flare ups

would develop on my scalp causing dandruff.

I went to three different dermatologists, spending several hundred dollars on different treatments. I was told by each one

that seborrigh dermatitis was not curable, but was easily treatable. However, the treatments could only be used to treat flare ups, not used as a daily defense. So I would go a couple of days with

red, flaky patches on my face and chest until the treatment cleared them up!

Back in August of 2002, a long time friend told me about Noni. I

believed his testimony from the start, as he had been a good friend.

I began using Noni, and after 3 weeks, my flare ups of seborrheic dermatitis stopped.

I have not had a problem since! Noni is truly a gift from God.

“In January a doctor friend suggested I try Noni...”

—Submitted by Pam

I am a 35 year old wife and mother of two children, ages three and one. I experienced many symptoms such as frequent headaches, migraines, severe muscle and joint pain, sleep disturbances, fatigue, memory problems, colds, etc. I have had

CFS for four years. Conventional medical treatment is for symptoms only. There is no cure for CFS at the present time.

In January a doctor friend suggested I try Noni. I started taking Noni right away.

Within 3 to 4 days I noticed less pain, better sleep, fewer headaches and more energy. I believe this is to be due to the Noni since all of the other things I have had have not made any difference.

“I felt the doctors had sent me home to die, and I was devastated...”

—Submitted by Toni Atwood

I am 61 years old; I have 5 children, 16 grand children and 7 great grand children. I've suffered with major Clinical Depression, Bipolar, Post Traumatic Stress Disorder and I was suicidal. I was diagnosed with Epstein Bar Virus, Chronic Fatigue and low Blood Sugar. I had problems with bladder control and I was addicted to cigarettes. I had Emphysema, suffered a Stroke and finally I had Breast Cancer and then I found Noni.

Two years ago, I had become so depressed that I stayed in bed for a year. The only time I went out was to go to the doctor's office, I had no desire to live. I was then admitted into a mental hospital, it was there I had a biopsy and found out I had Cancer. My immune system was so low that the biopsy became infected. My insurance ran out and I felt the doctors had sent me home to die and I was devastated.

I decided to fight the Cancer with Chemotherapy. My first round of Chemo consisted of four

intravenous treatments (one every three weeks). After each treatment, I had to go back to the doctor every day for seven days to get a shot to bring up my white blood cell count. I couldn't eat; I had terrible sores in my mouth and my weight dropped from 130 to 93 pounds. My fever spiked and I had to go to the hospital. At this time I was diagnosed with Emphysema. I went through a series of tests and went home with an oxygen tank.

I knew I had to get myself right with God. I thought I was going to die. I saw a pastor on television and called the church. The following Sunday their transport came by to pick me up, I was so weak I could hardly walk. After church the pastor told me about Noni. I could not afford to buy it, but people in the meetings donated bottles to me and my hope began to rise.

I began drinking Noni at loading dosages before I had the Mastectomy in November of 2000. The surgeon wanted to know why

I wasn't pushing the morphine button for pain; I told him I didn't need it. I told him that I didn't need pain pills either and the reason was – I was drinking Noni. He approved of the product and told me that I was a miracle.

When the time came for my second round of Chemotherapy, I had been drinking Noni for about two months. This round of Chemo was completely different! My white blood cell count was above normal and I did not need any more shots. Noni had boosted my immune system and helped greatly with the pain. I had more energy, I wasn't sick to my stomach, I could eat and I had no sores in my mouth. My oncologist (who did not think I was going to live) was absolutely amazed at my recovery.

I am Cancer free and the doctor treating me for Emphysema took me off the oxygen. The doctor treating my depression for four years, said he could not believe how well I was doing and with no depression. He is also

drinking Noni and he recommends it to others.

I am gaining weight, my hair is growing back thick, I can control my bladder, I have quit smoking, I have an overall feeling of well being and I am really happy for the first time in my life. I share Noni with my family, friends,

neighbors, doctors, nurses and everyone that I talk to and I also share my testimony. My friends tell me that they have seen an unbelievable change take place in my life.

First of all, I thank God for this wonderful gift that He has made and I thank the caring people who

went the extra mile, to pray for me and donate bottles of Noni.

I have earned my PHD (Past Having Doubts) about Noni. Praise God, I am alive, well and happy. Who could ask for more?

“A major lessening of pain in both wrists...”

—Submitted by Kathy Manning

I have been using Noni for over 2 months now and have experienced a major lessening of pain in both wrists. I have stopped

wearing braces at night for the condition. Since this is the only change in my diet, I am extremely pleased to say the Noni is working

well. Thank goodness as I have suffered for many years.

“They were considering putting me on a liver transplant list...”

—Submitted by Sharon Thiesen

In July I was hospitalized with chemical hepatitis. All my liver profile tests were severely high, so I'll just use the AST test, which was 3555 with a normal of about 37. All virus and bacteria tests were negative, so they took me off all medications. At one point they were considering sending me to UCLA and putting me on a liver transplant list. Over the months, the tests started to go down

slowly. Then it jumped from 373 to 543. I was really getting scared because I was feeling bad again also.

Tim, a man my husband works with, sent some information on Noni home for me. I thought I have to try something, so my husband drove to the LA area and picked up two bottles for me. I started taking 2 oz. twice a day and about six days later I had my

blood work done again. IT HAD DROPPED FROM 543 TO 147, and three weeks later it was 59.

I finally told my doctor what I was doing. He told me to stay on Noni!!!

The people at the hospital are now taking it also. They saw the difference not only in my blood, but my appearance and energy level also.

“For the first time in 19 years I did not have any pain...”

—Submitted by Jeannette van Well Groeneveld

I am 34 years old and I live in The Netherlands.

When I was 15 years old, I had a fall and I obviously damaged my left arm. In the years thereafter I must have visited over thirty specialists; not one was positive about what exactly was causing my pain and not one was able to help me get rid of the pain. In the end I gave up hope of finding a solution for my problem.

BUT now I am so pleased. I decided to give Noni a chance to get to work in my body. Shortly after starting drinking it, my body was detoxifying heavily; I was really sick for 4 days.

After that I felt subtle changes in my entire body but especially in my arm. Only 8 days after having my first Noni-on-the-rocks I found that my pain had gone. For the first time in 19 years I did not have

any pain! This is real quality of life for me. I can do so many things I could not do before; I sleep for 6 hours solid every night, whereas before I slept only 1 to 2 hours per night.

Can you imagine what it's like for my husband to experience the kind of person I am without pain for the first time since we met? Do you think our kids enjoy having this 'new' mum around more than

they did the one they knew before?

If you have health challenges of any kind, do yourself a favor

and please do find out what Noni can do for you!

“After seven weeks my pain was gone...”

—Submitted by John Kruithof

I have been a competitive Body Builder for many years.

So I used to lift heavy weights and did lift a lot of heavy things which were not so good for my lower back.

So the lower disc S1 and his 'upper disc neighbor' were squeezed together with only millimeters space in between.

So my nerves were protesting like mad mans and I could do nothing about it. After 1 year of lots of pain, I decided to go into the pipeline of doctor and physician, but they could not find

anything or could help me to get the pain literally off my back.

So I asked for an X-ray and it turned out that the discs were to close together. I was not a Hernia or Ischias and I should live with the pain, the doctor said. I can only give you some medication for your pain.

But I didn't like to take it and you can get used to pain after almost 2 years of it every day. Some days are worse than others.

One day I meet a good friend of mine that I have not seen in a long time and he advised me to

use Noni. I didn't know anything about it so I asked him.

He said: I don't know what it is, but it should be good!

I'm a person with an open mind so I tried it....and after seven weeks my pain was gone!

After 3 months I had no plaque on my teeth anymore and my skin improved 100%.

I'm so happy my friend brought Noni to my life and I can recommend to anyone for any kind of disorder of your body.

“Within 3 days I was bouncing off the ceiling, I had so much energy...”

—Submitted by Michelle Kleinert

I live in Melbourne, Australia. When I was 19 years old I was diagnosed with Chronic Fatigue Syndrome. I was very weak. When I was 21 years old I found a lifestyle that dramatically changed my health to the positive. However, the scars of chronic fatigue were hypoglycemia (low blood sugar) and regular cold and flu among some other issues. At

25 years old my periods stopped and I plotted along. I had good days and off days! I was 30 when I was introduced to Noni. As I had been very sick that winter, I decided to try it even though I knew it couldn't help me. I believed that it did help people but I didn't think I could be that lucky. Within 3 days I was bouncing off the ceiling – I had so much

energy!!! Was it Noni? I was not sure. So I did some little checks to see if my sugar moved - it was stable! Headaches that lasted for DAYS were now only a couple of hours long and the headaches went away without medication. My period within 3 months came back to a normal period cycle and my complexion over the next few months improved.

“My friend brought me a bottle of Noni and told me to drink it...”

—Submitted by Pamela Ballard

I am a 55 year old Aussie girl and the following is a condensed version of my trip on the medical merry-go-round.

After 3 years of hell and hundreds of appointments with various doctors and specialists I was finally diagnosed with Crohns

Disease in 1976. This was only discovered when I collapsed and surgery was performed. The doctors suspected cancer of the bowel.

I have had a minimum of twenty operations to repair and/or remove various sections of

intestine (both small and large). The last operation I had was in 1991 where a plastic tube/bypass was inserted. I have spent more than 20 years living with pain but somehow managed to work full time through most of this nightmare period!

The pain included joint pains, muscle pains and cramps, chronic fatigue, swollen glands, continuous headaches, dry red eyes, night sweats, mouth ulcers, itching skin, burning chest pains, memory loss, constant diarrhea, bouts of nausea and everything else you can think of..... I think I had it!

The medications I took during that period included Metronidazole, Stemetil, Maxalon, Valium, Lasix, Flagyl, Prednisolone, Normison, Pana forte, Voltarin, Prothiaden etc etc. I also tried every known Natural remedy that was suggested to me.

Following the last operation I made a conscious decision to go off all the drugs and try to manage my condition myself. The only medication I would take was

Questran to control the continual diarrhea and weekly Vitamin B12 injections as my body doesn't absorb vitamin Bs. I had to fight continually through the pain and exhaustion, but I refused to submit to it.

In May my friend Renya Maye who has known me through all of this, brought me a bottle of Noni and told me to "Drink it!" So being an obedient friend, I did as I was told. About a week later she called in and asked if "anything was happening yet". By this stage all my joint and muscle pain had disappeared and I was sleeping naturally. I was hooked on Noni! I continued to drink Noni until I left for a 9 week overseas trip in September. I didn't take any Noni with me as the glass bottles were too heavy to carry. There was

nothing else available in Australia at that time other than bottles. The day I returned I called Renya and "demanded" Noni, I was in so much pain. I now do not travel anywhere without my Noni!

The only medication I take now is Questran twice a week instead of twice a day and Vitamin B12 shot monthly instead of weekly, and of course my 30mls of Noni every morning!

Occasionally I have some pain instead of living with constant pain, I go out like a light when I hit the pillow and sleep soundly all night. I wake each morning alert and refreshed and looking forward to what the day will bring. Far cry from what I felt like only 12 months ago.

"I was hospitalized after a severe beating by burglars who left me for dead..."

—Submitted by David

In 1992, I was hospitalized after a severe beating by burglars who left me for dead. This necessitated two blood transfusions and major surgery on my head.

Eighteen hours after being released from the hospital, I had severe pain in my legs, shoulders and back and could not move off the davenport. I was returned by ambulance to the hospital for seven more days and it took five doctors to determine it was Hepatitis C caused by the blood transfusion.

I was immediately put on the liver transplant list at Mayo Clinic, and to cheer me up, they told me there should be one soon because it was winter and there are so many snowmobilers in Minnesota who become "snow donors"!

Medications helped to eliminate some of the pain, but I was so yellow jaundiced that I was afraid to go out in public, so I wore

a cap all the time and dark glasses so nobody could recognize me when I went to buy groceries.

Naturally, I became very depressed and was on anti-depressants, as the pain in my right side was always there. I would roll over on the floor in pain with no relief in sight. The pain is so severe that I was suicidal even with the anti-depressants, and I thought about jumping off a bridge many times. My friends went on three fishing trips that summer but I didn't dare go because it was too far from the Mayo Clinic, and I was always waiting for their call that they had a Liver for me.

A dietitian put me on the right track with absolutely NO RED MEAT and NO FAST FOOD of any kind, mainly 95% fresh fruits and vegetables but could have a little fish and chicken. Because I was extremely careful with my diet, my blood went up to a six in

March, but it needed to get up to 12 and 15!

In June I was thumbing through my address book, and my eyes stopped on Lil Johnson's phone number. I still don't know why I called her, but I did, and she said, "David, where have you been? I haven't talked to you in five or six years?" I explained how sick and near death I was, and that I had just purchased my burial plot and picked my casket.

She said, "You need to get over to my house right now and get some Noni. I hadn't heard of it before, but she thoroughly convinced me, and I was at her home in Stillwater at 8:00am the next morning.

First thing she did was pour me two ounces of Noni. I took Noni two more times before I left with a gift of a quart of Noni.

The pain in my back was already diminishing as I left her home. The next day, Thursday, I

attended the company's first satellite broadcast for two hours, and was elated to learn all about the company.

By Tuesday, I was feeling great, and the yellow in my eyes and skin was disappearing, so I drove to Faribault, MN and attended another company meeting and heard some fantastic testimonies.

Today, I feel like a million bucks and have been sleeping soundly. My bed isn't even messed up when I wake up. My two daughters have signed up as distributors, and our family is so happy to see what has happened to me in the month of June!

I am thankful I am alive today and I will continue to share this wonderful "Gift of Life" to

everyone I hear of who has any kind of health challenge.

I am still trying to determine why I called Lil that day, but I certainly want to thank God for allowing me to still be here, and that she convinced me to come over right away and try this healthful Noni.

Thank you, to the company, for your vision and mission of taking Noni to the world.

“It was like walking on broken glass and I could find no relief...”

—Submitted by Marilyn Rough

Noni was introduced to me by Dr. Marion Daly here in Sarnia. She told me how it had helped her with arthritis and her blood pressure and I was intrigued. When I returned home, I researched the web site and saw that this was a product I was going to try. I ordered my first case over the Internet.

My husband joined me in taking Noni, he was very skeptical. He does not take any supplements but considering that this was all natural and the research showed many good results he decided to take it with me.

I was looking for relief from body aches and pains that I had been experiencing for a long time. We had a car accident 6 years prior and fibromyalgia was a result of that and my husband had twisted his hip joint and had very bad lower back pains developing.

Over the years I had tried the gambit of “hopes” for fibro but they were short term. The roller coaster ride was taking its toll.

I didn't know what to expect from Noni but I will share with you

how it started and how it is continuing to help me.

The soles of my feet had been in major pain for 10 months. It was like walking on broken glass and I could find no relief. I started with 2 oz. of Noni morning and night and in 4 DAYS! I was able to get up at night without pain. It has not come back!

I wasn't looking for anything with regards to my digestion. But I was taking digestive pills and lactaid pills. Shortly after taking Noni, I felt a change and no longer do I take ANY enzymes and I eat beef, dairy, fats, sugars without any problem. I no longer take acidophilus for bowel concerns, I feel clean with the Noni.

August was a changing month. When I started taking Noni, I was concerned about my muscles. Fibro was knotting my feet and I was getting cramped muscles in my calves and my thighs. My muscles aches and pains were knotting all through my body and I could find no relief. This month, I could FEEL the muscles UNKNOT! then RELAX! And then STRETCH! out to their normal position. I AM PAIN FREE WITH

MY MUSCLES! Halleluiah, Praise God!

Don, my husband got out of bed one morning and remarked he had no lower back pain! He stretched, twisted, bent over and NO PAIN. Now he was seeing a chiropractor for 1 ½ yrs. and they both agreed he now only needs to go once a month for a check-up.

The muscle cramps in Don's calves from sport injuries were NO LONGER bothering him. He would get muscle cramps from standing or walking too long, and now – shopping malls, here we come!

Arthritis, it is going away!. A rainy day does not bother me anymore, but it is the one thing that is taking the longest time for complete recovery. I have a couple of joints that need complete healing. The arthritic aches in the joints that come from the fibromyalgia, especially due to the inflamed connective tissue because of the muscle strain is ALL GONE!

Energy, I can keep up and enjoy a day. I can cook a meal, I can enjoy friends, I can work at my business with Noni. I am having fun again.

“After being on Noni for only five days I began to see fantastic results...”

—Submitted by Jim Gardner

My story began 6 years ago. I was earning excellent money in the grocery business and worked 60+ hours a week. That year I decided to get a flu shot which I had never had before, but after receiving the flu shot my health began to fail me. This is what I had to deal with on a daily basis.

Flu-like symptoms, swollen lymph nodes, sore throat, all my joints ached, headaches, rapid heart beat (resting heart rate over 100 per minute), short term memory loss, high cholesterol and triglycerides, platelets, high white blood count, low red blood count, pain from swollen spleen, pain from a swollen liver, pain in the right groin area, painful swollen testes (with a lump on the right one), blurred vision, mononucleosis, tested high for Epstein-Barr virus, severe rashes on my face that weeped and burned.

I was so fatigued I couldn't do anything. In a matter of just a few months I went from 225 lb. to under 160 lb. I am 6'3", so that, was quite a dramatic change.

I went to a lot of different doctors and nobody could give me anything that helped. A lot of the medicines made me feel even worse. I went out of town and had an endoscopy done. Results: nothing wrong. Had a colonoscopy done. They found polyps, one large and pre-cancerous, and they removed all of them. I go back every two years and have more removed, but so far these have been benign.

Still no answers to what was causing all my problems and pain. I went out of town to a dermatologist. He said I was having an allergic reaction to something. He scheduled tests to

see if we could find what they were. The rashes on my face just went away, so I didn't go back for the tests.

A couple of months later the rashes came back, so I scheduled with the dermatologist again. When I got there I couldn't get to see the original doctor, so I saw a new doctor who had just arrived from the Mayo Clinic. He took one look at me and said I had poisons coming out of my body through my skin. He said, "Just a minute", and left the room. He came back 15 minutes later, and said it wasn't poisons, but that I was having an allergic reaction to something. I didn't like the two versions so I didn't go back.

I went to another doctor and asked if my swollen spleen was causing some of my problems. He said, "Well, when the spleen gets big enough, we'll take it out". I asked, "Will this make me feel better?" and he said, "I do not know." Thus, I decided not to have my spleen removed.

I had a doctor here in Watertown refer me to the Mayo Clinic to see if they could help me. After 5 days of testing, they could not come up with the answers as to what was causing my problems. They said all the symptoms I was having were related to Chronic Fatigue Syndrome. They had no tests for that or any medicines to cure it. All they could do was schedule me to come back for three more days in the Pain Clinic. I decided not to do that. I simply wanted to find a way to get rid of the problems I was having.

I heard of a chiropractor in South Dakota who specialized in CRA (Contact Reflex Analogy). He checked pressure points in my body to see what areas he might

be able to help. He started me on a nutrition vitamin supplement program, taking 60-80 pills a day. I took these for several months, and I was able to regain enough strength to return to work for 20-30 hours per week. Still no cure, but I was able to get by from day to day.

I went to another dermatologist here to see if he could help with the reoccurring rashes. I told him my story. He was very fascinated. He felt I needed to have a blood work-up for chemical and environmental poisoning. The results came back very high in most of the things he had tested for me. He recommended a doctor in Texas that specialized in this area. He recommended treatment of more blood tests and to go to Texas to live in a sterile environment to rid my body of these chemicals.

My insurance company wasn't paying any of these bills, and I didn't have any money to do this, so I did not go. The dermatologist here said if I couldn't go that we should try to boost my immune system with vitamin supplements.

I was already doing that. I had just joined a company that had non-caustic, environmentally safe, natural products to rid our home of the toxic chemicals we had been using. They also had great natural vitamins and pycnogenol type supplements. I took 15 a day compared to the 60-80 supplements I had been taking before with better results and substantial savings. Still no cure, but the results were better, and I was able to work 30-40 hours per week on light duty.

As if things weren't going bad enough already: last October I fell and injured my neck and back. I

have damaged a lot of muscle tissue, have a slipped disc, developed bone spurs, a degenerative disc, an developed a lot of arthritis in my neck and back. I have been off work for the last year. In that time, I was feeling pretty good, and had no rash outbreaks during that time.

Then two months ago, the rashes came back, and all the old symptoms came back that I've had for the last six years. I was devastated!!! I didn't know whether the work environment was the original cause of the ailment, but being free of these symptoms for almost a year showed me that it greatly enhanced the problems I was having.

In October my friend, Sharon, came over to our house and told me about a product called Noni. We discussed trying it to see if it would give me any relief from my Chronic Fatigue Syndrome and rash problems. I was so excited about trying this product that I bought a bottle from Sharon and started taking it that night. What a taste!

Here is how much I took. Eight (8) tablespoons three (3) times a day. I wouldn't personally recommend this large dosage for everyone, but I felt this is what I needed to begin flooding my body, as Dr. Ralph Heinicke points out.

After being on Noni for only five days, I began to see fantastic results!

1. I've had 4 teeth that hurt clear down into the jawbone. I had X-rays taken, and nothing showed up.

I am totally pain-free now!

2. I haven't been able to breathe out of my right nostril ever since I can remember.

I am able to breathe out of it now!

3. I've had a disease in my left knee since junior high and both knees have hurt for years.

I have no pain in my knees now!

4. For the last two months I have had trouble focusing my eyes, so I could not read first thing in the morning.

I have no problem now!

Since taking Noni for 10 days this happened!

For the last 2 months I have had to get up in the middle of the night to go to the bathroom.

Now I sleep through the night!

After 14 days on Noni this happened!

My right toes have hurt since I had hammer toe surgery one year ago.

Now I have NO pain in my toes!

After 20 days this happened!

I have been applying Noni on my rashes 4-5 times daily along with a body lotion twice a day because I thought it was drying out too much.

Now the rash is gone, and I am pain free!

After 30 days this happened! Chronic Fatigue Syndrome.

I feel less fatigue now!

I'm able to do the common every day tasks that each of us has to do!

I have more energy now than I've had in the last six years!

I no longer have to take naps just to make it through the day!

The pain from the spleen has dramatically decreased!

After 35 days this happened!

The pain in my testes and my right groin area is almost completely gone!

My neck and back problems I now have (etc.). I now have less pain and more mobility, so I feel it is also helping the injury and the arthritis that I have in those areas!

After 42 days this happened!

I've been applying Noni to a wart on my arm that had been increasing in size. It started bleeding 3 days ago, and today it just fell off!

I have now decreased the amount of Noni I'm taking up to 6 tablespoons, twice a day.

The Chronic Fatigue has taken its toll not only physically, but mentally and financially.

I'm hoping for continued improvement on my Chronic Fatigue Syndrome, but if that doesn't happen I'm quite satisfied with these fantastic results that Noni has given me so far!

I hope everyone of us realizes what we have in our hands with Noni! We have a product that can change our lives forever! Thank you so much, and all the great people who brought us Noni!

“After a few days we had no more headaches...”

—Submitted by Judy Manthe

My daughter Christy, and I suffer from migraine headaches with intense pain.

We began taking one ounce (2 tbsp.) of Noni three (3) weeks ago on January 22nd, once a day.

After a few days we had no more headaches! One day we both forgot to take our Noni and felt a headache coming on, so we took Noni and they went away immediately.

It has been such a relief and enjoyment to finally be able to go through the days and weeks without these devastating headaches. Noni has really helped us both!

“It has been 4 months since my last asthma attack...”

—Submitted by *Marzia Hermez*

I have been drinking Noni for the pass 5 months for a liver problem I have, but found that my migraines and my asthma have gone!

It has been 4 months since my last asthma attack, I would wake up not being able to breath but now I sleep right through the night. My migraines have gone as well. I

have not had one in the pass 4 months.

“I sleep much better and wake feeling rested...”

—Submitted by *Beth Hawkins*

I am 38 years old and am in very good health. I learned about Noni and was amazed at the testimonies I was hearing. I have been drinking Noni for about 2 months and the changes in me have been subtle, but important. I used to have a headache everyday which required Tylenol or something similar. My headaches no longer happen. I sleep much better and wake

feeling rested. My mental clarity is better and I do not get tired in the afternoon. My son took a bad fall at school, which injured his knee, elbow and scraped his chest. I mixed the Noni and oil and rubbed it on his knee, elbow and chest. He was experiencing very little pain the next day. I also had him drink some Noni. I believe if I had not applied the Noni and oil to his scrapes and bruises, he would

have been in considerable pain the next day. I am also using Noni on one of our dogs. He has had a hot spot for quite some time and the supplement is healing it. I recommend this product to everyone who might read this. It is a tremendous product with amazing properties. Try it, be amazed and then tell your story.

“I could not go to the toilet up to a month at a time...”

—Submitted by *Nikki Di Iroio*

My name is Nikki, I am 21 years old and live in Keilor Park, Melbourne, Australia.

It all started 2 years ago when I basically could not go to the toilet up to two weeks to a month at a time. I was bloated and always in pain in my stomach.

I started acupuncture and taking supplements from a naturopath. It was costing me at least \$400 per week and that was just so I could go once a week to the toilet.

Four months ago, I was introduced to Noni by my boyfriends mother. I started drinking 90 mls a day of Noni and 6 weeks later I started going to the toilet every second day! 10 Weeks later, I started going daily if not twice a day!! No more pain. No more bloating, I sleep better and I have so much more energy.

Than I gave it to my mother who had limped from bad circulation in the top of her legs.

She took 60 mls a day and in just 5 short days the pain was gone.

My Grandmother has been on anti-depression tablet for the past 8 years and my mother introduced her mother to Noni and 3 weeks later she came off the tablets. This makes me feel fantastic that I can help all my family with a natural product that works.

Everyone has more energy and everyone keeps saying they feel like they have more clarity in the mind. That's amazing!

“It is brilliant and I do not want to be without it...”

—Submitted by Patricia Wormald

I am a 57 year old lady who is in the process of being diagnosed with some form of Rheumatism. I have to undergo a bone scrape to find out if I have the worst form of this debilitating illness. I am in constant pain and my joints have swollen and I find it difficult to hold things and get dressed etc.

My daughter and Son in Law suggested that I try Noni as they know all about its beneficial properties so 3 weeks ago I started taking it every day.

Immediately I started to feel the effects of Noni. Ever since I can remember I have suffered very badly with constipation to the point where I have to take medication or even suppositories to make me go.

Since taking Noni I am able to go every other day, usually it is more like every 4 days and I can go with ease it is brilliant and I do not want to be without it already. My daughter told me I would need to take it for at least 2 to 3 months

before seeing the effects but even though I started taking it for my Rheumatism symptoms it has immediately helped me with my other on going problem.

I now have some ease some days with my joints but I don't think I have been taking it long enough to see the true benefit of helping with my rheumatism.

I will definitely be taking Noni from now on.

“Drinking just a couple ounces a day has really helped to clear these skin problems and leave their complexions healthy and glowing...”

—Submitted by Joan Hodges

With several teenagers and pre-teens in my family, we've had our share of complexion problems especially around that "time of the month." Drinking just a couple ounces a day has really helped to clear these skin problems and leave their complexions healthy and glowing. An older daughter in

her twenties had developed a troublesome case of adult acne along her jaw line. Drinking 4-6 ounces a day, she saw great improvement in just two weeks. In addition, we have gotten relief from burns by applying Noni topically and seen persistent rashes clear with drinking Noni

and using it on the skin. Bad blisters my 15 year old developed rock climbing have healed quickly in response to Noni. In my family, there hasn't been one skin problem or wound that has not responded well to Noni.

“I feel so great – I have never felt this good with the pregnancies at this stage...”

—Submitted by Lindi Amore

I am 8 months pregnant with my number 3 child. I have a one and a half year old and an 8 year old child.

In the past I lost lots of iron and nutrients and was bed ridden for the past month. I was very non-functional. It is so hard when you are in the last stages of a pregnancy.

Our friend, Sebastian Motto gave us a box of Noni and I started drinking it, just one teaspoon on an empty stomach each morning. On the third day, I felt fantastic. I feel so great – I have never felt this good with the pregnancies at this stage.

I have been functioning from 7am to 1am in the morning all day

and all night without rest, and I still feel great.

The children are now drinking it and they have had relief with the asthma.

Serge, my husband has more energy and is fired up.

It's fantastic to drink something natural for the whole family

“I was diagnosed with having contracted a deadly virus due to blood transfusions...”

—Submitted by Peter E. Erickson

I was diagnosed with having contracted a deadly virus due to blood transfusions performed on me earlier in my life. This Hepatitis C virus attacks the internal organs of the body.

Consequently, the virus decided to wage war on my liver. The results of this seemingly endless battle left me with sleepless nights, painful bowel disorders, severe muscle cramps in my arms, legs and abdomen, plus a non-radiant yellow pigmentation of my skin and eyes. In short, I looked and felt like I was

rotting away. I was also at the top of the list for a liver transplant!

On May 8th I was introduced to Noni. I began taking 2 tbsp. 2 times a day.

By May 13th I was already sleeping through the night; the muscle cramps had stopped, and I was starting to look like a living human being again. I also felt my energy level there when I needed it.

On May 19th, I had an appointment with my doctors, and the comments were, "You sure are looking good. The whites of

your eyes aren't yellow, and your skin is looking great! How do you feel?"

My reply was, "I feel like a million (and I don't mean green and wrinkled)." The truth is I don't wonder where the yellow went; I'm just glad it's gone!

Noni has put me back in the pink and that's answer to prayer. And by the way, my name is now at the end of the list for a transplant, and I'll probably never need it.

“I know Noni is truly a Miracle from Paradise – it has truly changed my life...”

—Submitted by Helen Paul

My name is Helen Paul. I know I have truly been blessed by "Noni", since I first started taking it on October 3, 1996.

About 23 years ago while performing surgery for a Hiatal Hernia the Dr's knife slipped and accidentally cut my spleen, which immediately changed the course of the surgery to a rapid Splenectomy to keep me from bleeding to death.

While still hospitalized they made another attempt to do the Hernia repair, but found my stomach so badly ulcerated so they took part of my stomach instead. Then still later while still hospitalized, I somehow contacted Pancreatitis and still another surgery had to be performed, a Thoracotomy to insert chest tubes to pump off the terrible infection I had.

A hospital stay that was originally suppose to be 3-5 days,

turned into 89 days of pure hell, full of much suffering pain and moments periodically near death. In and out of ICU, sometimes for days at a time spent on an ice bed to help keep my temperature down, from a raging 104 to 105 degrees. I entered the hospital just before Christmas that year and got out just before Easter the next year.

With each passing year my health began to decline more and more, as now with no spleen to help my body fight off infection. One health problem after another.....More surgery.....Two different times to remove tumors from my left chest wall.....Then as my sight became less and less, another to remove one from in behind my eye to try to save my sight. This failed and left me nearly blind in my left eye. All in all I have had 15 major surgeries on my body.

Eight years ago I was diagnosed with Fibromyalgia, which is a disease of the muscle and soft tissue in the body, for which there is no cure.. Almost constant pain and extreme fatigue, sometimes I would find myself so tired I couldn't eat.

On October 3, 1996 I was introduced to Noni. I began to take it 2 ozs. twice a day Within a week I was feeling more rested and energy that I hadn't experienced in years, and the body pain was decreased by 85%. As of December 1, 1996 I have been able to quit all of my Blood Pressure medicines, all the medicines for the Hiatal Hernia, (which I still have after all that time in the hospital, the original surgery I went into the hospital for has never been done.

I know Noni is truly a Miracle from Paradise. Above all I thank God for it.

“In ten days the pain was gone and it still is...”

—Submitted by Joe la Varier

I have had Crohns since I was 33 years old. Back then it was called ulcerated colitis. I was in the veterans hospital at Dwight IL. It is not there any more. A new drug called Ezulfadine had come out and the doctor there said he would like to try it on me? My only alternative was a colostomy bag. The drug worked and I was out of the hospital in 4 weeks instead of a very long period of time. When I was 44 years old it broke out again and I was back in the hospital only this time I had a fistula along with the Crohns. I was put back on Ezulfadine and

again it settled everything down and I was back to work in about 4 weeks. In March I fell and went to the hospital 3 days later with a ruptured appendix. I was given many antibiotics. Because of the gangrene again, the colon started bleeding and I was back in the hospital and this time a specialist called it Crohns. I was on intravenous with Prednizone and oral Ezulfadine. From December to June I was in the hospital and I was really in bad shape. By the following July I was bed-ridden; my life was a mess. We couldn't go far from home because I had

constant diarrhea and the most severe pain ever.

About the last week of this past January I had a call from a friend telling me about Noni. I got out of bed, got in my van and drove 44 miles and bought a bottle of Noni. I started with 1 ounce a day and in three days I had a little less pain and in ten days the pain was gone and it still is. I had a small bloody discharge every night after sundown. I increased my Noni to 6 then 10 ounces a day until it was gone. I now take 3 or 4 ounces a day.

“I also lost 10 pounds in my first month. I have tons of energy...”

—Submitted by Christine

I quit smoking in 2 weeks after 10 years of trying. Been on Noni for 2 months now and will never

stop taking it. I ended up running out of Noni and I knew I had proof Noni worked. I also lost 10 pounds

in my first month. I have tons of energy.

“After just one week, I was asleep in a half hour and slept right through the night...”

—Submitted by Helen Kinham

I was an insomniac for over thirty years. I starting drinking Noni because a friend of mine got amazing results, she had cancer and the only was the difference in

her recovery. I was taking Noni for one week and usually I have to read a few chapters of my book to make myself sleepy but after just one week, yes, seven days, I was

asleep in a half hour and slept right through the night. It's been like that every since. I love Noni!

“So far the pain has not returned. I have also cancelled my knee surgery...”

—Submitted by Doreen Russell

When I was a teenager I developed rheumatoid arthritis which made me bed-ridden for nearly 2 years. I was taken into

the hospital where I spent 8 months undergoing surgery to remove the synovial linings to both knees and both wrists. It took a

further 3 years to walk properly again. I have always attended a gym regularly to keep fit and

active so that the arthritis would not debilitate me once again.

About 2 years ago my left knee was beginning to trouble me again. I tried all the painkillers, rubs lotions and potions on the market to no avail. My knee became so bad I was forced to go to the doctor, who referred me to a specialist, who in turn referred me to a surgeon. The surgeon suggested that I have an arthroscopy to clear out any debris in the knee. The bones of the knee were rubbing together and the only other alternative was a knee replacement further down the track. Surgery was booked for the 12th Nov 2004, about 10 weeks away.

The knee became progressively worse, affecting my hips and ankles due to not being able to walk properly. Many days I had to take to my bed because I could not even put my left leg to

the floor without it collapsing in acute agony. I found this very frustrating as I did not feel tired or ill enough to take to my bed.

Then in the middle of October I received a call from the hospital saying that my surgery would be deferred until the 10th December due to unforeseeable problems in the hospital. I was devastated. Although I was not looking forward to another operation (as I am really bad on anesthetic.) I knew it was the only thing that would hopefully get my life back to normality.

My husband, Peter took me to a local show in Pinjarra, to try and cheer me up. As I hobbled painfully around the stalls I came across a lady talking about Noni. I had heard of the product, declaring its healing properties on the radio in Sydney, Australia. However I did not hear the entire program so did not know where to

buy it. We had looked in various health stores etc but to no avail.

The thought of waiting another 8 weeks for my operation was unbearable. So I thought I'll try anything. I was in so much pain. That day (Sunday) I took my first 30mls and by Tuesday most of the pain had disappeared and by the end of the week it had gone altogether. Since that day I have taken Noni regularly and so far the pain has not returned. I have also cancelled my knee surgery.

I have been taking Noni now for 4 months and, not only am I pain-free, I feel so much better. I have more energy, sleep soundly (I have always been an insomniac), lost weight and my hair is healthier. The other thing I noticed in the last week or 2 is that the cellulite on my thighs have reduced, a problem I thought I was stuck with for life, being 57 years old.

“The diagnosis this time was a large lump, about the size of a silver dollar...”

—Submitted by Betty Peters

I live in a very small resort town in Arkansas. Three years ago I had a mammogram, and it showed a small shadow and what the doctor called a "thickening in the breast". He said they would have to keep a close watch on it.

On November 12th right before Thanksgiving I went for another mammogram. The diagnosis this time was a large lump, 5 1/2 centimeters, about the size of a silver dollar. Then they did an ultrasound, and it showed the same thing, large and bright.

I was told I had to get a biopsy, but I wanted to wait until after Thanksgiving as we were going out of town to Texas to visit our children.

Before we left, a friend of mine brought me a bottle of Noni and said "Drink this, and perhaps when you go for the biopsy it will not be there". I had been praying for help for the situation I was facing, so I doubled up on the amount I was taking, and in the next three weeks, I drank 1 1/2 bottles of Noni.

I wasn't going to take any chance of not drinking enough for it to help me.

When we came back from our trip to Texas, I went in to have the biopsy. The surgeon felt for the lump, but could not feel anything. Then they took another mammogram. They sent me to another hospital in Missouri where

they took 3 more mammograms (in a row) trying to find something. But they found nothing – not even a small spot. Then they did 2 more ultra sounds that same day and found nothing.

The doctor said "You have had a miracle!" And I said, "Yes, PRAISE GOD, it's the Noni."

They all (the doctors and nurses) wanted to know "what is Noni?" I told them about Noni and then said to them, "I will always drink Noni and so should everyone else".

What a blessing! Thank you for sharing your incredible Noni.

“I was wearing a neck brace, two leg braces, a complete body brace, and braces on both my arms...”

—Submitted by Kathryn

I am 63 years old. My medical history is quite extensive and Noni has almost been a miracle cure for me, and for the effect it had on the family.

Years ago I was sick, I have been sick since I can remember.

My health was steadily declining. I didn't know what was making me so ill. I had had over 40 leg operations spanning from 1972 to 1985.

They'd all failed. Not one surgery had worked. I was also in the hospital, in and out, for years with numerous symptoms.

Finally in 1994 after being in a wheelchair for a few years, wearing leg braces and through all the troubles, I got very ill. I couldn't push my own wheelchair anymore, I couldn't take care of my family, I couldn't take care of myself. My family doctor did some extensive testing and found out that I had a multi-connective tissue disease. I was diagnosed with Lupus. I also have Fibromyalgia, secondary to the Lupus, and there were some other autoimmune problems at the time.

Immediately after that diagnosis, they put me on drugs to try to help, but they also discovered that I had been sick for many, many, many years without any treatment. The drugs were not working. I was taking Prednisone, in very high dosages, for five years.

I had gained almost 200 lbs. I had developed Osteoporosis, I was in kidney failure, my lungs were full of fluid and my heart was inflamed. I was failing very quickly.

I was living in a hospital bed in my house. My life consisted of 38 pills a day, trying to manage an 11

year old child.....I had a hospital bed in my house, I had the CLSC there every day to give me a bath, wash my hair, cook our meals, and take care of me....basically.

Then about a year ago, as my health was declining, a dear friend, Greg, who knew Mindi personally, said, "Look Kath you've got nothing to lose. You're dying anyway. Let us try and start you on Noni. I was like, "Oh c'mon.....I've been on all these drugs, what's Noni going to do?"

Well, I listened to him, I listened to Mindi and I started the Noni. A few months later, I was still sick. My chiropractor had restored some functionality in my neck and my back. It was a bit better, but my blood counts were horrible.

Mindi said, "Don't give up. I know of other patients who have Lupus, who have taken 6 or 7 months on Noni before it helped. Don't give up."

I didn't have as much faith as she did, but I thought if she cared enough about me, and didn't even know who I was,.... if she cared enough about my health to want me to get well, I definitely had to continue taking Noni to see whether or not....I didn't want to give up my last hope....and it was my last hope.

Last Christmas I started feeling better. By January, I was getting my memory back. My hair was growing back. I was getting stronger.

A year ago I could not stand up. I was wearing a neck brace, two leg braces, a complete body brace, and braces on both my arms, up to my elbows.

I couldn't sit up. I was in an electric wheelchair 100% of the time. Since I've been taking Noni I have been getting stronger day by day. My general health has improved. I am in my wheelchair, not all the time, but it is still an aid to help me.

I wear my leg braces some of the time. I don't wear my other braces at all. I have complete function back. And....as of my last blood test, just a few weeks ago, for the first time in seven years, they were normal. I have all my blood counts back. I am fine. I am technically in remission. Other than a low B12, I have no problems.

I met André, my partner and the love of my life, and my morale-booster, in January. When he first met me and we started dating I hadn't been out of bed in 5 years. I was a single parent and I had no idea what it was like to even go out with anybody anymore.

I had gotten a little gutsy, thought, "OK", signed up for web personals and let's see where we go.

We started dating and on the first date he had to negotiate a wheel chair and braces to get me in and out of a restaurant, and he thought, "Oh no... oh my God, what am I getting into? You know, meeting this woman who is so sick!" All he saw was plastic, more plastic, drugs and more drugs. Then gradually, since Easter, he has seen me get better, he has put me on a horse, he has been able to take me on vacation, we stay up way past 7 o'clock at night. He has been there to cheer me on every bit of the way and he fully understands that Noni has

saved my lifeand because of that, we now have a life, and we are looking forward to a very long life together. That's about the happiest ending you can have.

On a final note, a year ago, I was taking 38 drugs. Right now I'm down to four. I'm down to four drugs.....no braces.....and my blood tests are completely normal.

I hope that by this coming Christmas, I will be completely drug free and only taking Noni.

“I have thrown all the medications away, with my current doctor's approval, and all I take is my Noni...”

—Submitted by Kathy Andersen

My name is Kathy Andersen and I am 46 years old. I have been chronically ill for about eight years with Lupus, Fibromyalgia, Chronic Epstein Barr, Chronic Fatigue and Psoriasis.

With these illnesses I suffered constant chronic pain, swelling, painful joints, painful muscles, flu like symptoms, confusion, sleeplessness and depression.

I have been to quite a number of doctors, clinics, and even specialists over the years that I have been ill. Most of them said that there was little to be done for me, then prescribed more medications.

I have taken anti-inflammatory drugs, pain pills, anti-depressants, blood pressure pills, muscle relaxers, Lasix, Predisone and Cortisone shots ... just to name a few. These medications have been changed, added to and deleted many times, often making me feel like I would lose my mind.

And sadly, few did much to relieve my symptoms and pain, but only added to my problems as most medications can make things worse it seems.

In October some very dear friends brought me this product

"Noni". Said it could help me and to take it faithfully. I started out with several ounces a day through November, when I ran out.

When my Noni came in the middle of November, I knew that it had been helping because some of the old symptoms had returned. At this time, I made the decision to stop some of the meds and give Noni a real chance to work.

Well, dear friends, after a few days I started to really notice some wonderful changes. And it seemed that each day I was feeling better and better!

Soon all the pain was GONE! I had energy that I haven't had in years, I was able to climb stairs, walk briskly, wash my car, cook and clean, and get out of bed and start my day as any healthy person would do.

I could comb my hair without pain, dress without pain, reach up and bend down, all without pain.

In December, I went to a music concert and had a ball! I started walking more and more each day ... I could go on and on!

I have thrown all the medications away, with my current doctor's approval, and all I take is my Noni. Noni has given me my

life back! My 29 year old daughter says, "This is how I remember my Mom when I was a little girl". My friends are all in awe and several are taking Noni.

*** UPDATE ***

I have several Chronic diseases, and started taking Noni in hopes that I could feel better and find relief for the many symptoms I live with.

Well, little did I know!! I can not believe the difference in my health in only one month!!!

My Lupus symptoms are all gone, no painful joints! The Epstein-Barr, Chronic Fatigue, Fibromyalgia symptoms are "ALL" totally relieved!!!!

I had Psoriasis on my scalp so bad, my whole scalp was covered and I was losing my hair. It is almost gone and my hair is growing back!!!!

I have more energy than I know what to do with and feel WONDERFUL!!!! I stay up all day and do all sorts of things like I used to do. And I KNOW it is all because of the "Noni".

I will take Noni everyday for as long as I live!!! I Love my Noni!!!

“I was told they couldn't help me any more, as everything had been tried...”

—Submitted by Mac and Pauline McMullen

This is our story. According to my doctors tests – I am free of all the problems I've had. The doctor

doesn't understand what I'm doing, but he said keep doing what your doing cause you are

physically healthy and look better than I have ever seen you. If

telling my story helps anyone I will be glad to tell it.

At about 12, I had migraine headaches.

In my early 20's I went to work for the government mixing powder and liquid in wooden like tubs with a boat like paddle. Powder poured in the liquid and we stirred it into a consistency to pour into shell casings for gun powder for 105 millimeter shells. We were underground about 6 ft – no air conditioning. We ate and breathed powder.

In two to three years I became ill with chest problems and colds and etc.

When I was twenty four I had cancer in ovaries and all female parts. They operated three times that year and was put on something called Radium. I believed everything they had to offer at that time for several years. I had pneumonia eight times in four years.

At age 30 my knee broke with brittle bone disease, arthritic type. Some where I lost more of my immune system.

At age 34 I got a disease of my eyes, very painful, they shot cortisone in the eye and gave me Pred forte. My sight would come and go and each time I had less sight until I could not drive. I had narcolepsy – sleep disease. I had

hypoglycemia all my life.

At age 49 Cardiac arrest.

At age 50 Cardiac arrest and a cardiac cath at Lyola Hospital in Chicago. They cleared my main aorta. I had allergies and I am allergic to nearly everything. I couldn't smell or taste for years and my vocal cords collapsed. I had to have an emergency trek in about 1988.

In 1990 I was diagnosed with Leukemia, given Chemotherapy for six years and other drugs, etc. My liver was enlarged and the blood Hemoglobin was very low. I had to have transfusions. My white count ran up to two million. My last hospital stay, I went in hemorrhaging and convulsions and stayed forty eight days in two different hospitals.

I was told they couldn't help me any more, as everything had been tried. During this session I also had two eye surgeries. When I was told at the hospital that I couldn't be helped anymore, I stopped all medications then I tried all sorts of herbs.

On December 30, I purchased my first bottle of Noni. Seven months later I was checked by my doctor who hadn't seen me in thirteen months.

I was told that my hemoglobin was up to ten for the first time since he had known me. My white count was normal. My liver was

normal. I have no arthritis pain – I have no migraine headaches – I have no hypoglycemia – I have no narcolepsy – I can see good again – I have my side vision back and haven't had an eye attack since I have taken Noni.

Got a clear bill of health on everything. So needless to say my doctor was a little surprised. He says I'm fine.

My husband was hit by an eighteen wheeler from the back and it jackknifed and hit him in the front and crushed his hip and sternum and a couple of ribs. Later the upper of his leg had to be operated on because it had turned ice cold and blue. They put a nylon cord in his leg. But by the time I found Noni, he had a clot in the cord and needed an operation once again or it could have turned into gangrene.

We gave him a lot of Noni to try to get his xerone in his body to working and sure enough, when he went back to the doctor he wasn't critical. He went to the doctor with me in June and was checked thoroughly and it was pink, warm and had pulse everywhere. Needless to say the doctor was shocked again.

I'm seventy five years old and my husband is seventy four and this is the best aphrodisiac that we have ever tried for us. I don't speak for anyone else.

“Shortly after starting Noni, I had a mole on my chest that fell off...”

—Submitted by Sherri Donahue

I have found some amazing results with Noni.

The first thing that happened to me was, shortly after starting Noni, I had a mole on my chest that fell off. (sounds silly huh?) My sinus cleared, my lungs have cleared.

I use to suffer from severe cramps each month, but that doesn't happen anymore! My husband had some warts that he'd had for years disappear. He is able to sleep all night now, where before he used to have to get up in the night to go to the restroom.

He also use to snore quite loudly every night, now he doesn't snore quite as loud and his sleep is much more peaceful, and now I can sleep better too!

We have more energy and a general feeling of well being.

“I filled my cup with Noni and started sipping on it all day...”

—Submitted by *Eleanor Forbes*

I've had 2 children and experienced morning sickness on both occasions, but with my 3rd pregnancy I landed in bed very ill. The sickness was so severe. I started taking Noni because I could not even eat anything and keep it down. I filled my cup with

Noni and started sipping on it all day.

Believe me when I say that half way through the day I started feeling better... what relief!!!

I could actually think about food without being ill. So I started on my Noni routine, as soon as I

felt THAT feeling, I would have my Noni....just small sips from my 30 mls shot glass it was almost instant relief.

You know what I love most about Noni, it's 100% natural.

“I noticed a burst of energy within my first week. I was so surprised...”

—Submitted by *Wes Hollingshead*

Back in May I suffered a stroke at the age of 34. It affected the use of my right side of my body. I had to undergo therapy for the use of my walking, talking, and writing skills for about three months. I was completely unable to work a fulltime job. However, when Noni was introduced to me in August and I started drinking it, I noticed a burst of energy within my first week. I was so surprised. Then

within a month of taking this awesome product, I stopped going to therapy because my balance and my motor skills started becoming much stronger. Today I have at least 90-95% of my functions back. This Noni truly is a gift from our almighty God himself. Secondly, my dear grandmother was suffering from Alzheimer's since 1996. Her health start going down hill to a point where she

became confined to her bed, and to add pain to agony, she suffered with terrible bedsores. Her personal doctors said she not live through the month. Well after drinking Noni and having Noni put directly on her bedsores, every last bed sore on her body has healed and she is more alert. Thank You Noni!

“I couldn't lift anything without using both hands...”

—Submitted by *Bruce Bowman*

The triceps in my arm was nagging aching pain for the last 5 years. I couldn't lift anything without using both hands. I don't have to tell you what it did to my bowling average. Bowling was really rough to take.

I started taking Noni and 3 weeks later caught myself picking up a stack of metal plates and realized I hadn't been able to do that in over 5 years. It sure fascinated me!

One month into bowling and still no pain. It's great! I love it!

What? Average? No, sorry, I didn't hear that question! ha ha ha

I'm on my feet most of the day at the day job. I have noticed that my legs do not feel tired as they used to.

Noni is truly a gift from Mother Nature!

“Noni is allowing me to fulfill my lifelong dream of being able to help, love and be a blessing to others...”

—Submitted by *Tim Gillen*

My irritable bowel syndrome (IBS) has cleared up next to 100%

in only 3-4 months of drinking Noni. I have experienced

increased energy and clarity of thought. I have had acute

psoriasis for several years and none of the typical psoriasis/dandruff shampoos have EVER made my flaking stop. I got my first bottle of Noni shampoo and after a few days, my flakes stopped!!! I am so excited about this. Noni is for REAL!!

We didn't order enough Noni about 2 months ago and we were out for about a week. My wife and I both noticed how negative we

were feeling. We were quite aware that it was because of the absence of Noni in our life. Our kids were saying, "We want our Noni!" When we got our next case, we began to feel more positive again! Hallelujah!

I am continually brought to tears because the people I am referring to Noni keep coming up with miraculous stories of gaining health. One guy's heart has

regulated, one lady's arthritis is not giving her trouble anymore, and one lady is not throwing up all the time, every day, because of a thin stomach lining. It is truly MORE BLESSED TO GIVE THAN TO RECEIVE.

Noni is allowing me to fulfill my lifelong dream of being able to help, love and be a blessing to others.

“Grief is difficult; it saps one's energy. I could not sleep...”

—Submitted by *Andrena McEwen*

I am 77 years old. Recently, I awakened from a dream that I was in the clinic and had just had a cholesterol check, and the results were so low that neither the doctor nor the nurse would tell me what the reading was. I became frustrated, but happy.

I realized that after waking from a beautiful sound sleep that it was time for me to share with others what has happened to me since I began drinking Noni.

My husband, Orv, died a year ago February 3rd and the grief had taken such a hold on me that I simply could not let go of him. He was my love, and he was my life. I had cared for him through his many illnesses, and now he was not there for me.

Grief is difficult; it saps one's energy. I could not sleep. I was

using Halcion and Zanax frequently. I was also frightened because my bowel habits had changed. My energy level had become so low; I just wanted to stay home where I felt warm and safe (part of grief).

Suddenly, my eyes began to change, too. My Ophthalmologist said that I have the beginning of macular degeneration and small cataract on each eye, but he said, "Just relax, it's not so bad – not yet!" I began to pray to God for a new focus in my life, which I needed desperately.

In March, I heard about Noni. I shared this with my son, Randy, who said, "Mom, we need to get on this product right away!"

I began taking Noni on April 10th (2 Tbsp. each morning on an empty stomach). Nothing

noticeably happened the first week, but soon thereafter, my bowel function was again perfectly normal.

Now, my energy level is up once again. I find myself "running" up the basement steps when, previously, I had to hang on to the railing and pull myself up one step at a time.

I have recently noticed an improvement in my eyesight. I have lost weight. I am now standing tall with a new confidence and contentment. Noni has changed my life. I shall never forget Orv, but now I can let go of him and live in peace with a new passion in my life that occupies my mind happily.

Thanks be to God; He works in mysterious ways!

“Dr. Hall took her off the HIV meds and put her into a hospice facility to die...”

—Submitted by *Paul Miller*

My name is Paul Miller. I am a UPS driver, and would like to share with you a true miracle, one that I wouldn't believe if I hadn't seen it for myself.

It started Dec. 27th when I received a phone call from my sister, Deborah Gear, in Port Orange, FL. She said she needed

to talk to me as soon as possible, so I went over that night. She said she was having slurred speech and she was going to Halifax Hospital to run some tests.

After two (2) weeks in the hospital and another two (2) weeks waiting for the results, the bad news finally came. My sister,

who has been a nurse for 12 years, was diagnosed as HIV positive and had a condition called PML. PML is a rare form of AIDS and is very deadly. She had about two months to live. In short PML is AIDS of the brain. By the second week of February my sister's right side was completely paralyzed,

and her speech was down to saying yes and no. She went down hill very fast from week to week. I prayed to God if there was any answer for her please let me find it. By the week before Easter the spot on her brain covered about 70% of its mass. She was totally incoherent, didn't know who I was, her viral load was over 800,000, her T-cell count was under 100 and she had 7 sores on her leg that wouldn't heal. She weighed 89 lbs.

Dr. Hall took her off her HIV meds at that point and put her into a hospice facility in Port Orange to die. He said she had 5 days left 10 at best. That was on the Friday before Easter. I was on vacation the next week and I knew I would be going to a funeral.

Friday before I got off work a friend of mine named Ricky told me about a product that might help her called Noni. He told me all about it and then I told him that nothing would help her now, that she was too far gone, but he talked me into buying her a bottle of hope even though I knew it wouldn't help her.

On Saturday I took it to her and told her all about it, though she didn't know I was there. I told the nurses to start giving it to her 6 to 8 ounces a day. They were reluctant and checked with the

doctor. Dr. Hall said she could have it, but it wouldn't help her and the nurses thought the same, but said they would start giving it to her.

Three days later, while on vacation, I went to see her; she had started responding to the Noni. She was somewhat coherent and was trying to say words though you couldn't understand a word. Her Dad, the doctor, and myself thought it was just her last gasp for life before the end.

I came back on Saturday only to see more improvement. She was saying yes and no and was a lot more coherent, she had gained 6 lbs and the sores on her leg appeared to be healing. It seemed too good to be true. It had been a week of improvement, but no one believed it could be Noni, but at this time she was only on sleeping pills, painkillers and Noni.

I started to wonder if it was the Noni. I have seen her every week since December 27. By the second week her sores were completely healed. She was eating like a horse and was, gaining about 5 lbs. a week and was speaking more and more, even in sentences by week 3.

By week 4 she started moving her paralyzed leg and a few days later she started moving her arm.

Every week she got better and better. The doctors and nurses couldn't believe it. Even though they had a hard time saying it they too came to the conclusion that it was the Noni.

She is now walking and talking though she has a long way to go.

On June 30 she was released from Hospice and went home, and now weighs 132 lbs, her normal weight. You see God did let me find the answer; it was a plant that he created a plant that saved her life.

It is now July 10th and the new tests are in. Her viral load and her T-cell count are totally normal; her CAT scan showed a decrease of the spot on her brain from 70% mass to about 3%. The density of the spot that's left is very thin which the doctors say indicates the spot is dissolving itself.

My sister is no longer dying, though she has a long way to go with physical therapy and speech therapy and time to get back and learn the things she forgot how to do. In time she will be okay.

I have my sister back and I thank God and Noni for that. I encourage anyone with HIV, AIDS, or PML to take Noni immediately. It will change your life forever. It has mine, and I'll never forget it.

“I took Noni to get rid of the sores, but how shocked I was when I found how many other things it changed...”

—Submitted by Sheila Waibel

I had 4 BIG sores on my legs from lack of oxygen and I met a woman who said have you ever tried Noni? No, what is that I said. To make a long story short I contacted the person selling it and started taking it, I was ready to try any thing as I could not get rid of them. I am a type two diabetic and had many other problems from

poor health care that a doctor had mistreated me and caused permanent heart and lung damage. From that I have to be on oxygen the rest of my life. So my general health was anything but good. I took Noni to get rid of the sores but how shocked I was when I found how many other things it changed. All the people

that know me noticed the difference and wanted to know what I had done to myself.

Here is a list of things that changed in the first 8 weeks.....

1. After three days of starting Noni I felt much more energy.

2. Skin texture much better, dark rings about my eyes left.

3. My feet started losing their numbness.

4. My legs had lost their muscle strength and now returned (this really shocked me and pleased me). Now I could climb steps much more easily.

5. I gained much more stamina and able to do things I could not do before Noni.

6. My hair is growing in and getting darker.

7. The big ulcers on my legs healed.

8. I could not run the sweeper before without chest pains, now I can.

9. I can stay off oxygen longer periods before I can tell it.

10. After increasing my intake to 4 ounces a day my sight has increased so I can now read street signs which I couldn't do before.

11. Everyday I get feeling better and better, what will I be like in time to come.

My heart doctor has told me I needed a heart and lung transplant and it would not happen, so in essence prepare to die. I had done that 30 plus years ago so that didn't bother me, but oh how nice to feel like a human again.

“Scars that partially disfigured me were starting to take on the appearance of normal skin...”

—Submitted by Gordon Davis

I was forced to retire from the DCFD (Washington DC Fire Dept) after a serious injury/illness incapacitated me. I was retired on my 50th birthday with no hopes of recovery. That was on April 7th. On July 22 we started taking Noni, having only heard about it a few

days before. I noticed several changes relatively soon, my dandruff went away, and I was sleeping better for the first time in a long time. Scars that had partially disfigured me were starting to take on the appearance of normal skin, and in fact, my

facial skin was looking better (big tough ole fireman, eh!!)

We have seen so much more good from Noni, than from any other product we've ever been involved with. Thanks for sharing this wonderful gift with us.

“At the end of three days the infection was gone, as well as the tenderness...”

—Submitted by Kathy Davis

I noticed a difference right away because I had two infected teeth that needed root canals, they were tender also. The infection began draining out immediately, I was elated!! At the end of three days the infection

was gone, as well as the tenderness.

I also noticed "old age" spots on my hands disappearing. I also noticed I was "firming" up and I was able to see improvements in my digestion.

I also had more energy and some thinning spots on my scalp filled in. This all took place in only 3 weeks!! I was also able to reduce my high blood pressure medication by 50%!!!! I've been on that medication for 17 years!

“Blowing my nose was definitely out of the question because that always started a nosebleed...”

—Submitted by King Pickford

I've had nosebleeds all my life due to an inherited condition, basically weak blood vessels in my nose. Sometimes I get them 3 times a week or more...lasting up

to 15 minutes. I've spent money...had tests run...taken supplements...moved to different parts of the country but nothing ever stopped the problem or

changed it for the better much. Naturally I cannot take aspirin or anything that contains aspirin because I could bleed to death...Also I'm not able to drink

alcohol. Blowing my nose is definitely out of the question because that always starts a nosebleed, some worse than others. About a year ago, a customer & friend of mine saw me with one of my nosebleeds & said "You know King, I can't say for sure but I think Noni may help, why don't you try some". I started drinking an ounce a day for the 1st bottle & told him I didn't really notice any difference. He said that

I should continue to drink another bottle & give it a chance so I did. I increased to 2 ounces in my 2nd bottle & began to notice more energy & overall feeling better...I wasn't sure but the nosebleeds seemed less frequent. While I was drinking my 3rd bottle I began to notice the nosebleeds were dripping slower & less frequently. I decided to increase to 3 ounces a day in my 4th bottle and haven't had a serious dripping nosebleed

since...It's remarkable for me to experience life without this embarrassing inconvenience when I least expect it like out to dinner with friends or playing sports etc. My advice to anybody whose had to live with this condition is to start drinking Noni (at least 2 ounces a day) & feel the difference. I'm 54 years old & feeling younger thanks to this wonderful gift of nature.

"I began taking Noni and was able to cut down on my pain medication..."

—Submitted by Brandy Yassa

I had been disabled with chronic pain from two back surgeries for twelve long years. I could not understand how Noni would have any effect on my condition. A friend brought two bottles to me and said "Take Noni!". At that same time, my 16-year old daughter had developed

migraine headaches that plagued her every day, and both she and I were worried that something really serious was going on in her head. Being the mother that I am, I gave Noni to my ailing daughter. From the very first day she had NO more migraines – not one! I began taking Noni and was able to cut

down on my pain medication, therefore allowing me to become more active. My husband got on the bandwagon and reported sleeping better, being able to concentrate better at work, and did not feel like he needed a nap at 2 o'clock in the afternoon. I now have my very sick father on Noni.

"I discarded my cane July 20th and as of August 25th all pain medication had ceased..."

—Submitted by Beverly Cooper

On May 25th a serious fall of approximately 20 feet resulted in a diagnosis of "right anterior & posterior non-displaced pelvic fracture and fractured sacrum"(located on spine above tailbone). There goes my summer, not to mention my business I thought. After my initial pity party I

began drinking 2 oz. of Noni in the morning & 1 oz. before bedtime. I discarded my cane July 20th and as of August 25th all pain medication had ceased. My physiotherapist informs me that she would place me 3 weeks ahead of schedule! I've never felt more energetic, friends can't

believe the recovery time, my skin looks beautiful (having been a suffer of adult acne on and off for years) even my doctor has expressed an interest in Noni. It's funny how fate plays important roles in our lives.

"For the first time in 12 months I could close my fist completely and without pain..."

—Submitted by Valda Flower

Sitting in my office one day, I had a sales person call in – we got talking and I said that I would get

back to her regarding her offer as I needed time to think about it. I had not been sleeping well and was

always feeling very tired and also under stress. "I have something for you that may make a

difference to you – do try it!" she said. "What is it?" I asked. "It's Noni!" So I said I would give it an honest try.

I started taking Noni and yes in just 5 days I was feeling a lot better. The aches in my back first thing in the morning were not as acute and I started to lose a little

weight within 7 days of taking Noni.

Three months before this I had an operation on my left hand (middle finger) for arthritis – I could not close my fist. My hands for the first time in 12 months I could close my fist completely and without pain.

I also have a 13 year old dog that I noticed one morning just sitting shaking her head. This happened over a week in small douse and I thought to myself that if Noni is good for me why not my dog – as she is part of my family. Now my two dogs have Noni weekly. I also use Noni on any abrasions I get when gardening!!!

“One dentist just told me to give up...”

—Submitted by Joan Hodges

One of the unexpected results of drinking Noni has been the GREAT improvement in my gum health. Some people seem to be genetically predisposed to develop gum disease and I guess I fit in that category.

I have had several surgeries to try to improve on my deteriorating gum health. One dentist I saw before being referred to a periodontist about 6 years ago just told me to give up; I was going to lose one of my molars due to bone loss and receding gums from

infections. The first series of surgeries seemed to help and I pursued a determined regimen of increased antioxidants, a high quality multivitamin/mineral supplement and improved dental hygiene, plus regular cleanings each three months. Despite all this effort, 3 years later I needed surgery again.

Right about this time, I started drinking Noni. My healing from this round of surgeries was very quick – even the periodontist remarked on it. Since then, each three

months when I have my teeth cleaned, the dental hygienist comments on the good health of my gums. The only difference in my health regimen has been adding in Noni. My gums are healthy and I am not slated for any surgeries!

My mother who began drinking Noni for her high blood pressure also commented that she was getting good reports of better gum health from her periodontist.

“I now run my dog instead of the slow and miserable 10 minute walk...”

—Submitted by Derrick Z. Venter

I am 42 and was diagnosed with Hemochromatosis (Bronze Diabetes) a genetic disorder, 15 years ago, as was my father. In short – my body does not have the ability to get rid of iron, causing iron overload in all organs. This leads to Arthritis/ liver disease/ kidney disease/ loss of memory/ amongst other ailments. If left unchecked, could be fatal, and to say the least, results in a very irritable and miserable existence. I also have acid reflux brought upon by the myriad anti-inflammatories I had to take for arthritis. Dark and puffy circles under my eyes seemed to me to be a permanent fixture in my mirror. I would cringe

at the thought of meeting someone and possibly having to shake hands as the pain in my hands and fingers were at times excruciating. I often did not want to get up in the morning and disliked myself intensely for the lack of motivation and drive due to chronic fatigue. LET ME STOP RIGHT HERE. On Sept 12, I purchased a bottle of Noni from a friend. On the morning of Sept.15th. MY LIFE CHANGED DRASTICALLY – I woke up, with what I thought was a bounce out of bed – I felt that I had had a very good nights sleep – I went to the fridge – lifted the bottle of Noni – Realized – I had NO PAIN. NO – I

was in shock – what happened? I squeezed my hands, as I unconsciously do – STILL NO PAIN – I yelled at my wife that I had absolutely no pain – I felt energized – I felt that I was experiencing a miracle – I felt strong and healthy. Today, I feel 20 years younger, have no arthritic pain, I am slowly but surely getting off the NEXIUM and PRILOSEC/ The dark rings and puffiness under my eyes have all but vanished, I feel that I am more alert and spiritually uplifted. I feel excited about my future. I now run my dog instead of the slow and miserable 10 minute walk. WOW!!!

“I would get very violent each month and be completely difficult to live with...”

—Submitted by Teryl Watson

I use to suffer from horrible PMS. I would get very violent each month and be completely difficult to live with.

My sister introduced me to Noni when I visited her and made me drink it every day while I was

there. She sent a bottle home with me, and right way I noticed I wasn't feeling violent when my time of the month arrived.

I'd call her everyday for a week and tell her "it wasn't happening". I was so excited and my family

didn't have to go through any angry moods and my violent temperament.

I also noticed I had much more energy and was able to get more accomplished every day.

“Within 3 days of taking Noni I found myself sleeping more deeply and waking feeling more refreshed...”

—Submitted by Tracy Marsh

Hi I'm a 38 year old mother of 2 boys. I found out about Noni through my mother in law, and was very skeptical. But having had a number of symptoms that were affecting my ability to efficiently look after my boys I decided to give it a go.

These are the benefits I received from taking 60 ml of Noni in the first two weeks!:

– Indigestion, which I have suffered on and off from for over 10 years has disappeared. Prior to Noni almost every night as soon as I laid down I would need to get up again and take medication for indigestion.

– Neck and shoulder pain from broken nights sleep (having to get up to my boys) has also gone.

– On about the 4th day of taking Noni I woke up with a sore throat. I gargled 30 ml of Noni and 1 hour later the sore throat was gone and no other flu symptoms appeared.

– Because of the broken sleep I was feeling so fatigued that I was having great difficulty waking in the morning and getting motivated. Within 3 days of taking Noni I found myself sleeping more deeply and waking feeling more refreshed and able to get straight up.

– My husband no longer has any lower back pain. In spite of going to the gym for 18 months, the lower back pain continued – until Noni took it away.

– I'm delighted to say that my husband is now alert well in to the evening. Even after only 5 1/2 sleep at night, with the help of Noni, he is alert and sharp of mind. This was a big issue for him he disliked being so tired and fuzzy of mind.

I am so excited about what Noni has done for my family that I'm talking to my friends about it. I believe it is God's gift to mankind at this time of enormous sickness in the world.

“She laughed and said there was a ‘baby in every bottle’...”

—Submitted by Rachel

In 2013 my husband and I were trying to conceive and we were not having any luck. The doctor had diagnosed me with ovarian cysts which can make it difficult to become pregnant. One day I was discussing this with my cousin's wife, who had also had a difficult time getting pregnant. She shared her story with me: They

had been trying for five years to have a baby. She had heard that Noni could help with fertility. She was skeptical but decided to try it. With in a few months she was pregnant! When the time came for her to want another baby she started back on Noni and was once again pregnant within a short amount of time. She laughed and

said there was a "baby in every bottle!" I decided that it wouldn't hurt to try so in February I got a bottle. In March I discovered that I was pregnant!!! In November my sweet little daughter was born. I swear by this stuff and tell all my friends about it. Thanks for a beautiful baby Noni!

“I had dreadful lesions over 100% of my body, with flare-up after flare-up...”

—Submitted by Loretta Vrengdenhil

I have been doctoring for seven years with a severe case of Psoriasis. I had dreadful lesions over 100% of my body with flare-up after flare-up, sometimes three times a week. I was bright red from head to toe. Then my skin would flake constantly. The inside of my clothes was completely white. It looked as though I was always covered with dandruff.

I had the chills constantly for nine months because of losing so much of my skin so rapidly all of the time. The medical profession was of no help whatsoever! I even went to the Mayo Clinic, and they told me that they couldn't help me, and that I'd have to live with it, as there was no cure.

So back to the dermatologist I'd go. Another prescription for topical steroids, and that in turn made my skin so thin that I'd bruise whenever I bumped or scratched myself.

The itching that goes with Psoriasis is unbearable and relentless. Your skin gets so dry that you crack and bleed so you

are constantly looking for relief I use Vaseline as it is the only thing that stays on for awhile as the lotions dry out so fast. This is a very stressful skin disorder as you are constantly uncomfortable.

There is so much suffering, pain and agony involved as you never feel good or look nice. Then I lost a lot of my hair. I never cared to go away because I was so self-conscious of how I looked.

But the good news is – my good neighbor lady Elaine came over one day and told me about Noni. I'd try about anything, just anything for relief I started on a Sunday and three (3) days later I began to feel so different. My whole insides felt just wonderful.

After a week the chills left and then my energy level started coming back. I had to quit my work last August because I had gotten so sick from it all. Noni caused my craving for sweets to leave.

I took Noni for about three weeks before my skin started to clear up. Then the swelling in my

face, arms, hands, legs and feet started to leave. My legs were so swollen that sticky fluid was coming out of the pores. My skin continues to gradually clear. I feel that it will take time to become completely well after having it so bad for so long.

I started out using 3 ounces (6 tbsp.) three times a day. After several weeks I cut it to half of that. Now I am on 2 ounces a day. I still do have flare-ups, but they are getting less and less and they go away so much faster.

When I do have the flare-ups I double the Noni for a couple of days and then slack off to 2 ounces again. It seems like a miracle has taken place in my life, and I praise God for it.

One more thing, my right shoulder has constantly ached for about 12 years, but after 8 weeks on Noni the pain began to subside. I give all the credit to Noni!

“She suggested taking Noni before my next blood workup...”

—Submitted by David King

I first heard of Noni while shopping in the mall this past Christmas season. I had been to see my Internist for my twice annual visit and he ordered some blood work. I had it done on December 20th and got my results in the beginning of January. My triglycerides were 289 and my doctor was prescribing Tricor to bring down my numbers.

I had sent a bottle of Noni to one of my sisters, who is diabetic and also has high blood pressure. She gets her bloods done regularly and she told me that her pressure had gone down, directly as a result of Noni, because that was the only thing she was doing differently. She suggested taking Noni before getting my next blood workup. I took 2 ounces twice a

day for about five weeks. On February 28th, I received a call from the nurse telling me that my blood work was normal. I asked her for the numbers and she said that my triglycerides were 189! That was great news.

Thank you for this product.

“I had been fighting Candida yeast infection for over 6 months...”

—Submitted by Donna Weese

I am 60 years old, and I had been fighting Candida yeast infection for over 6 months. It became systemic, and I went on medication for 6 months. It was very slowly making some progress, but then I had a setback, and the Candida went from my sinus cavity to the frontal lobe of my brain.

My alternative medical doctor through kinesiology told me that it had gone into my brain. I was not functioning, and I could not think clearly. My husband I had planned

a trip to Washington, D.C., had purchased plane tickets, etc. to celebrate our anniversary, but I was totally unable to go anywhere. I was at my worst during August, September, and October.

On November 13th my son brought me a bottle of Noni, and I took it on Wednesday night Thursday, Friday, Saturday, and by Sunday I felt like a new person once again!

Two weeks later I was tested by my doctor, and he just shook his head and was totally amazed!

He had put me on a very strict diet and medical program which was totally free of yeast and absolutely no sugar of any kind, no beef whatsoever, no fermented products, no bread, etc. He had told me it would take at least 6 months to rid my body of Candida.

Can you imagine how happy I was after only a few days on Noni!

I had been totally fatigued for so long, but now I had lots of energy and felt as though I was 30 years old again! My blood sugar totally stabilized, too.

“It was almost impossible for me to shop without the use of an electric cart...”

—Submitted by Joann Barnes

I am a 62 year old female with severe chronic obstructive pulmonary disease. I have been disabled for 7 years. This last year has really taken its toll on me.

My last pulmonary function test showed that I have only 20% of my airways open. My lung specialist has told me he did not know what else to try on me, that he could send me up to the Mayo Clinic and maybe they would have something new out that he did not know about yet. I am using 4 bronchial dilators; I have been on and off Prednisone and at times it is necessary that I use a nebulizer, plus other meds.

The last few months it has been almost impossible for me to shop without the use of an electric cart. I've just had some real tough times. Many days I would leave my mail in the box until someone came over and would bring it in for me. I have a lot of days where I just sit, and it is difficult to even move around the house.

I was introduced to Noni at Christmas. It was given to me as a gift from my nephew. It has truly changed my life. My airways are opening up and I am breathing much better.

I am full of energy, and I am out walking about 3 days a week.

There is no need for an electric cart; I am able to walk through the stores and push a cart.

I started noticing a change the first week I was on Noni. I have been able to cut back on the use of my inhalers, and I am so excited about this product that I will never be without it again! I feel like a new person.

I am so much more comfortable since being on Noni. I sleep better, have energy that I have not had in years, and my mental attitude is great.

“I had to use a CPAP machine in order to breathe at night...”

—Submitted by Susan Wilson

I was suffering from sleep apnea and had to use a CPAP machine in order to breathe at night. I would wake up three or more times at night. I was always

sleepy and tired at work as a result. I suffered from allergies and took several OTC medications that provided me with only short-term relief. Thanks to Noni, I no

longer use the CPAP and I get restful sleep. The headaches have disappeared and I no longer take allergy medications. My skin is smoother and clearer and I have

an abundance of energy. I will continue to take Noni from now on, and plan to have my husband

and daughter take it as well. Thank God for Noni!

“Other health products we tried resulted in money down the drain...”

—Submitted by Raffale Zupan

My wife Anita and I have been taking Noni from Tahiti since November because we heard first hand testimonies of the health benefits of Noni. From our first hasty swallow of Noni to present day, our well being has improved – we are just thrilled to share it with others and here’s why:

– skin complexion improved

- peptic ulcer cleared
- indigestion gone
- restful sleep, no restless
- energy level & alertness up
- acne on face cleared

We have taken various medications for each ailment for many years, spending the dollars because our health is important. Other health products we tried

resulted in money down the drain. Then we heard about Noni – we thought that it may help with one ailment, maybe two. But the product is superb and the results speak for themselves. We are glad we gave Noni a try. It’s nice to be proven wrong with a genuine product that is God given and is an answer to our prayer.

“After 10 minutes of wiping and soaking the knee area, the pain went away just like that...”

—Submitted by Manuel Mangahas

I tore one of my knee cartilage 2 years ago carrying heavy equipment at work (I was told, that knee problems come with age... ugh!). The cartilage has healed since then but it bothers me with intermittent pain from time to time. About 6 months ago, this pain was determined to stay. My friends advised me to try drinking Noni and apply Noni topically on the skin where it hurts. So one night, when my knee was in pain again, I tried that idea to see if it actually

works. I was skeptical about this but I just thought to try it anyway.

After drinking one ounce of Noni, I poured another ounce into a bowl, then dipped a serviette and placed the soaked serviette on my knee area where the pain was centered. I did saturate the knee area several times with Noni. To my amazement, Noni was absorbed by the skin. There was a soothing and tingling effect at first. After 10 minutes of wiping and soaking the knee area, the pain

went away just like that! I couldn’t believe it, I even massaged the area where it used to hurt and felt no pain ! I was pain free for the rest of the evening. Amazing!

A slight knee pain returned the following evening, even though it was not as bad as the day before. I did apply Noni topically again. Just like clockwork, the pain eased off. The third night, just some slight pain. The fourth night, no more pain and am still pain-free today!

“At first I was very skeptical but she talked me into it...”

—Submitted by Karen Papa

I’m a 32 year old woman who has suffered with severe colitis for 15 years. I am always in and out of hospitals having blood transfusions as I bleed constantly from the bowel. I was taking strong drugs like prednisone and

immuran with small improvements but nothing that could get me through the day without diarrhea and pain. A friend introduced me to Noni and at first I was very skeptical but she managed to talk me into it. I’m so glad she did as I

have had amazing results. I no longer bleed and my energy levels have greatly improved. Also my blood count has been higher than it has in years. I’m now on to my fifth bottle and I will be taking it forever.
